Air-Conditioning in Modern American Architecture, 1890-1970 Joseph M. Siry, 2021-02-01 *Air Conditioning in Modern American Architecture* 1890 1970 documents how architects made environmental technologies into resources that helped shape their spatial and formal aesthetic In doing so it sheds important new light on the ways in which mechanical engineering has been assimilated into the culture of architecture as one facet of its broader modernist project Tracing the development and architectural integration of air conditioning from its origins in the late nineteenth century to the advent of the environmental movement in the early 1970s Joseph M Siry shows how the incorporation of mechanical systems into modernism s discourse of functionality profoundly shaped the work of some of the movement s leading architects such as Dankmar Adler Louis Sullivan Frank Lloyd Wright Ludwig Mies van der Rohe Gordon Bunshaft and Louis Kahn For them the modernist ideal of functionality was incompletely realized if it did not wholly assimilate heating cooling ventilating and artificial lighting Bridging the history of technology and the history of architecture Siry discusses air conditioning s technical and social history and provides case studies of buildings by the master architects who brought this technology into the

conceptual and formal project of modernism A monumental work by a renowned expert in American modernist architecture this book asks us to see canonical modernist buildings through a mechanical engineering oriented lens It will be especially valuable to scholars and students of architecture modernism the history of technology and American history The Grove Encyclopedia of American Art Joan M. Marter,2011 Arranged in alphabetical order these 5 volumes encompass the history of the cultural development of America with over 2300 entries Albert Kahn Albert Kahn,Brian Carter,2001 **Albert Kahn** Roger Matuz,2002 A Biography of the German Born Jewish Architect Who From the 1880s Through the Early 1940s Designed Elegant Homes Factories for Henry Ford and Industrial Plants to Support the United States War Effort **Adolf Loos** Panayotis Tournikiotis,1994 Viennese architect Adolf Loos was one of the most important pioneers of the European Modern Movement Born in 1870 he was an early opponent of the decorative trends of Art Nouveau believing instead that architecture devoid of ornament represented pure and lucid thought His rationalist design theories were put into practice in the Karntner Bar Vienna 1907 Steiner House Vienna 1920 and Villa Muller Prague 1930 Surprisingly there is no other monograph on Loos in English currently available Adolf Loos joins Adalberto Libera and Albert Kahn in Princeton Architectural Press s historical monographs series and presents this great modernist s complete works through numerous illustrations *Kafka's Architectures* Ayad B. Rahmani,2015-01-02 Adopting Kafka as a lens to examine modern concepts in architecture this book pries open new interpretations in Kafka scholarship Each of eight chapters takes up an architectural element with which to explore meanings central to both literature and architecture Stairs function as vertical access but in Kafka s hands become an instrument of science testing the merit of natural selection Kafka s doors open and close less to allow passage than to reconcile one psychological interior with the next Notions of plumbing and hygiene begin to acquire new meaning The architecture of Mies van der Rohe begins to make more sense especially his tabula rasa approach to design signifying less a harsh disdain for site and more a response to a reality in which the ceremony of the stairs had died and was replaced by the pervasive flatness of the modern floor **Albert Kahn Memorial Issue, Featuring Some Recent Work of Albert Kahn Associated Architects and Engineers, Inc** ,1943 Henry Ford Vincent Curcio,2013-07-25 A compact lively biography of Henry Ford the brilliant businessman and icon of American modernity whose towering ego and anti Semitism complicate his legacy **Inside the Crystal Palace** April Kay Jacques,2008 **Detroit and Rome** Michele V. Ronnick,Marlise Beaudoen,2005 A comparative study of urban form and the reuse of buildings in modern Detroit and Rome Italy This exhibition catalog includes 3 U scholarly essays and 25 catalog entries describing the Usage history of buildings in Detroit Rome The Green Vision of Henry Ford and George Washington Carver Quentin R. Skrabec, Jr.,2013-03-25 Henry Ford and George Washington Carver had a unique friendship and a shared vision This book details their paths to green manufacturing and the start of the chemurgic movement in America It covers a number of little known projects such as their efforts to use ethanol as a national fuel the use of soybeans for plastic production and the use of waterpower for factories

This study of their collaboration shows how capitalism can drive the green movement and expand American industry *The Works* Betsy H. Bradley,1999 While tracing the important developments in industrial architecture over a one hundred year period she demonstrates that as the United States became an industrialized nation the goals pursued in industrial architecture remained straightforward and constant even as the means to achieve them changed **Henry's Lieutenants** Ford R. Bryan,2003-12-15 Although Henry Ford gloried in the limelight of highly publicized achievement he privately admitted I don t do so much I just go around lighting fires under other people Henry s Lieutenants features biographies of thirty five other people who served Henry Ford in a variety of capacities and nearly all of whom contributed to his fame These biographical sketches and career highlights reflect the people of high caliber employed by Henry Ford to accomplish his goals Harry Bennett Albert Kahn Ernest Kanzler William S Knudsen and Charles E Sorenson among others Most were employed by the Ford Motor Company although a few of them were Ford s personal employees satisfying concurrent needs of a more private nature including his farming educational and sociological ventures Ford Bryan obtained a considerable amount of the material in this book from the oral reminiscences of the subjects themselves *On Frank Lloyd Wright's Concrete Adobe* Donald Leslie Johnson,2013 The book provides a unique in depth and critical analysis of Wright s concrete block houses set within their historical biographical and theoretical contexts In particular it shows the full impact upon Wright of his contemporaries architects Irving Gill and Rudolph Schindler In doing so it allows a full appreciation of Wright s Gill s and Schindler s buildings beyond their architectonic and experiential qualities *Autopia* Peter Wollen,Joe Kerr,2002 The reach of the car today is almost universal and its effect on landscapes cityscapes cultures indeed on the very fabric of the modern world is profound Cars have brought benefits to individuals in terms of mobility and expanded horizons but the cost has been very high in terms of damage to the environment and the consumption of precious resources Despite the growing belief that a Faustian price is now being paid for the freedom cars have bestowed on us we are none the less manufacturing them in ever greater numbers Autopia is the first book to explore the culture of the motor car in the widest possible sense Featuring newly commissioned essays by writers critics historians artists and film makers as well as reprinting key texts it examines the effect of the car throughout the world including the USA Western and Eastern Europe Japan China Cuba India and South Africa In this book the car is treated neither as a technological fetish object nor as an instrument of danger Instead it is examined as a hugely important determinant of 20th century culture neither wholly good nor an unmitigated disaster and certainly endlessly fascinating Contributors include Michael Bracewell Ziauddin Sardar Al Rees Martin Pawley Donald Richie and Peter Hamilton Key texts by Marshall Berman Jane Jacobs Roland Barthes Marc Auge and others
