Abraham Pais

Albert Einstein:

Albert Einstein Albrecht Fölsing,1997 Drawing on sources that have only emerged or become accessible in recent years this in depth biography establishes anew Einstein s complexity Folsing also tries to reconstruct the physicist s thoughts in the context of contemporary research *Subtle is the Lord : The Science and the Life of Albert Einstein* Abraham

Pais,1982-09-23 Since the death of Albert Einstein in 1955 there have been many books and articles written about the man and a number of attempts to explain relativity In this new major work Abraham Pais himself an eminent physicist who worked alongside Einstein in the post war years traces the development of Einstein s entire oeuvre This is the first book which deal comprehensively and in depth with Einstein s science both the successes and the failures Running through the book is a completely non scientific biography identified in the table of contents by italic type including many letters which appear in English for the first time as well as other information not published before Throughout the preparation of this book Pais has had complete access to the Einstein Archives now in the possession of the Hebrew University and the invaluable guidance of the late Helen Dukas formerly Einstein s private secretary **Albert Einstein** Jeremy Bernstein,1996 Albert Einstein did not impress his first teachers They found him a dreamy child without an especially promising future But some time in his early years he developed what he called wonder about the world Later in life he remembered two instances from his childhood his fascination at age five with a compass and his introduction to the lucidity and certainty of geometry that may have been the first signs of what was to come From these ordinary beginnings Einstein became one of the greatest scientific thinkers of all time This illuminating biography describes in understandable language the experiments and revolutionary theories that flowed from Einstein s imagination and intellect from his theory of relativity which changed our conception of the universe and our place in it to his search for a unified field theory that would explain all of the forces in the universe

Goldenstern,2007-06-01 A biography of the life and achievements of Albert Einstein one of the most important scientists of the twentieth century **Albert Einstein: A Biography** Abdul Montaqim,2012-07-30 ABOUT THE BOOK Albert Einstein is regarded by many people as the greatest scientific mind in the history of the world Why Well there are many reasons but one of the most important is that his theories led directly to the creation of the atom bomb and with it the dawn of the nuclear age Not only did his work in theoretical physics in particular his famous $E=mc^2$ equation indicate that it would be possible to build a massively destructive bomb the like of which had never been seen before Einstein himself urged the United States

government to go ahead and build it Most historians agree that Germany's invasion of Poland on September 1 1939 marked the beginning of World War II in Europe But about one month before that date on August 2 1939 Einstein who was living in America at the time wrote to the then President of the US Franklin Delano Roosevelt outlining the ongoing scientific breakthroughs made by Enrico Fermi and Leo Szilard that could lead to the creation of extremely powerful bombs of a new type and suggesting that the government should fund manage and speed up the progress towards such weapons In the letter Einstein explained that the key element used in these scientific chain reaction experiments was an element called uranium which would become critical to the making of the bombs in the immediate future To that end he recommended that the US government should give particular attention to securing the supply of uranium ore particularly as the US had no significant uranium mines of its own Einstein further pointed out that Germany had stopped exports from the uranium mines it owned in Czechoslovakia implying that if the US did not develop the new bombs Germany will EXCERPT FROM THE BOOK By the standards of most scientists Einstein lived a varied and interesting life living in several different countries over the course of his 76 years formulating theories that not only changed the scientific establishment but also transformed the world and getting married twice the second time to Elsa L. Wienthal his first cousin on his mother's side and second cousin on his father's side It was with Elsa that he emigrated to the United States in 1933 the year when the Nazis came to power in Germany under the leadership of Adolf Hitler At that time Jews were becoming increasingly targeted by the Germans The Nazi propaganda chief Joseph Goebbels declared that Jewish intellectualism is dead even as he encouraged students to organise mass public burnings of thousands of books defending their actions as their right to clean up the debris of the past Einstein was reported to be on a hit list and it was probably only a matter of time that the Nazis came for knocking for him or worse if he had stayed in Germany But he did not He emigrated to the US at the age of 54 and stayed there for much of the rest of his life becoming an American citizen in 1940 Elsa had died several years earlier in 1936 of heart and kidney problems And Einstein did not marry again He and Elsa did not have children together but Einstein had two sons Hans and Eduard and a daughter Lieserl from his previous marriage to Mileva Maric It's unclear what exactly his marital problems were when he was Mileva but he separated from her in 1914 leaving her and their two sons in Zurich while he lived in Berlin It's also unclear what happened to their daughter as no mention is made of her anywhere During this difficult time in his life Einstein had asked Mileva for a divorce but she was reluctant or unwilling It has been reported that he promised that he would give her all the money from the Nobel Prize if she agreed to a divorce He had not won the Nobel Prize at that time but won it later in 1921 Buy the book to continue reading Follow hyperlink on Twitter *Albert Einstein* Arthur J.
