When Gabrielle Robinson found her grandfather's Berlin diaries hidden behind books in her mother's Vienna apartment she made a shocking discovery her beloved Api had been a Nazi. The entries record his daily struggle to survive in a Berlin that was 90% destroyed. Near collapse himself Api a doctor tried to help the wounded and dying in nightmarish medical cellars without cots water or light. The dead were stacked in the rubble outside. Searching to understand why her grandfather had joined the Nazi party Robinson retraces his steps in the Berlin of the 21st century. She reflects on German guilt political responsibility and facing the past. But she also remembers Api who had given her a loving home in those cold and hungry post war years. This a must read for anyone interested in the German experience during WWII. Ariana Neumann author of *When Time Stopped*. For two centuries wars had grown ever larger with the use of more terrible weapons and rising casualties culminating in the cataclysmic global events of 1939-45. And then quite suddenly large international wars have all but disappeared. What caused wars to grow in size to such an extent and then shrink so precipitously? Is this a permanent state of affairs or could big wars make a comeback? Lawyer and historian John P Storey explores these questions by looking at the evolution of military technology and tactics over the long history of warfare. From ancient bronze spears and chariots to World War II tanks and warplanes from the nuclear weapons of the Cold War to the drones and robotics of the future the changes in our methods of waging war has had and will continue to have a major impact on their size and destructiveness. The sobering conclusion Storey makes is that based on past trends and the weapons in the pipeline for the future there is a much higher risk of there being much bigger wars in the coming decades. **Into the Reich** Prit Buttar, 2025-09-11 Enriched by extraordinary first hand accounts this is a fascinating history of the dying days of the Third Reich as Stalin sought to consolidate his own empire. In January 1945 the Red Army launched a powerful offensive across the Vistula River to drive the Wehrmacht out of Poland with the intention of securing a start line for an operation that would ultimately result in the capture of Berlin and the end of the war. But as Prit Buttar expertly reveals there were other issues at play. Stalin was determined to push the boundaries of the Soviet Union further west restoring land lost by the tsars and securing vast industrial and mineral wealth. While negotiations took place between the Allied powers regarding the fate of Poland the Red Army burst through the German lines liberating Auschwitz even as the SS drove concentration camp inmates onto frozen roads in a series of death marches. The Wehrmacht staged a desperate fight back with their last major

armoured offensive on the Eastern Front Launched in February 1945 from the German Polish border it forced a halt to the Soviet forces on the banks of the Oder before the rush to Berlin Written by an acknowledged expert on the Eastern Front and packed with first hand accounts this is the definitive account of the strategic goals both military and political of Stalin his generals and their armies as they raced into the Reich and of the German forces who stood in the way
