Berlin Green Guide Europe City And Regional Guides:

Berlin Green Guide Michelin,1997 The Michelin Green Guide to Berlin presents background information on Berlin s geography history and artistic heritage Detailed city maps enhance the descriptions of the different areas and guide you on your walks and drives

Green Urbanism Timothy Beatley,2012-09-26 As the need to confront unplanned growth increases planners policymakers and citizens are scrambling for practical tools and examples of successful and workable approaches Growth management initiatives are underway in the U S at all levels but many American success stories provide only one piece of the puzzle To find examples of a holistic approach to dealing with sprawl one must turn to models outside of the United States In *Green Urbanism* Timothy Beatley explains what planners and local officials in the United States can learn from the sustainable city movement in Europe The book draws from the extensive European experience examining the progress and policies of twenty five of the most innovative cities in eleven European countries which Beatley researched and observed in depth during a year long stay in the Netherlands Chapters examine the sustainable cities movement in Europe examples and ideas of different housing and living options transit systems and policies for promoting transit use increasing bicycle use and minimizing the role of the automobile creative ways of incorporating greenness into cities ways of readjusting urban metabolism so that waste flows become circular programs to promote more sustainable forms of economic development sustainable building and sustainable design measures and features renewable energy initiatives and local efforts to promote solar energy ways of greening the many decisions of local government including ecological budgeting green accounting and other city management tools Throughout Beatley focuses on the key lessons from these cities including Vienna Helsinki Copenhagen Stockholm Zurich Amsterdam London and Berlin and what their experience can teach us about effectively and creatively promoting sustainable development in the United States *Green Urbanism* is the first full length book to describe urban sustainability in European cities and provides concrete examples and detailed discussions of innovative and practical sustainable planning ideas It will be a useful reference and source of ideas for urban and regional planners state and local officials policymakers students of planning and geography and anyone concerned with how cities can become more livable

Sport, Recreation and Green Space in the European City Peter Clark,Marjaana Niemi,Jari Niemelä,2009-12-31 Green space has become a major issue in European cities in recent years as a result of enhanced environmental awareness urban marketing planning policy and growing population densities Up to now however the subject of sports areas and grounds has attracted little research despite the fact that since the First World War such public and private areas from football pitches and running tracks to golf courses and tennis courts have often comprised one of the most important and extensive types of green space in the European city This book presents a pioneering comparative and multidisciplinary analysis of the development use and impact of sports areas in the European city from the start of the 20th century up to the present time Employing a range of historical spatial and ecological approaches it examines when and why

sports areas evolved the contribution of municipalities and the private sector the role of gender and class and the impact on the urban landscape and ecology Chapters cover urban sports areas in Finland Britain the Netherlands Germany and Italy illustrating the contrasts in the provision of green space across Europe **The Urban Climatic Map** Edward Ng,Chao Ren,2015-09-07 Rapid urbanization higher density and more compact cities have brought about a new science of urban climatology An understanding of the mapping of this phenomenon is crucial for urban planners The book brings together experts in the field of Urban Climatic Mapping to provide the state of the art understanding on how urban climatic knowledge can be made available and utilized by urban planners The book contains the technology methodology and various focuses and approaches of urban climatic map making It illustrates this understanding with examples and case studies from around the world and it explains how urban climatic information can be analysed interpreted and applied in urban planning The book attempts to bridge the gap between the science of urban climatology and the practice of urban planning It provides a useful one stop reference for postgraduates academics and urban climatologists wishing to better understand the needs for urban climatic knowledge in city planning and urban planners and policy makers interested in applying the knowledge to design future sustainable cities and quality urban spaces Urban Green Spaces and Human Health Yuan Li,Diogo Guedes Vidal,Abdullah Akpinar,Ding Li ,Hongxiao Liu,2024-06-12 An important aspect of sustainable and regenerative urban development is to improve collective well being standards The United Nations endorsed the 2030 Agenda for Sustainable Development in 2015 which establishes seventeen Sustainable Development Goals SDGs to end poverty protect the planet and improve the lives and prospects of everyone and everywhere by 2030 Urban Green Spaces have a significant impact on the living condition and public health which are closely associated with several SDGs including good health and well being SDG 3 clean water and sanitation SDG 6 industry innovation and infrastructure SDG 9 and sustainable cities and communities SDG 11 Here the concept of One Health gains high relevance by recognizing that interconnections among humans animals and environment is a key issue in public health and wellbeing that stimulates interdisciplinary collaborations to develop a more holistic understanding and effective action against public health threats **Green Accounting in Europe — Four case studies** Anil Markandya,Marcella Pavan,2012-12-06 Conventional economic accounts which measure Gross National Product GNP and related indicators of national performance do not fully allow for the damages caused to the environment in the course of producing and consuming goods and services Nor do they fully account for the fact that some resources are being depleted in achieving the living standards that we enjoy today This failure is important because policy makers are guided by the changes in macroeconomic indicators such as GNP Moreover such indicators are not a good guide to the sustainability of present practices of consumption and production This book provides practical estimates of one key area of neglect in the present national accounts the measurement of environmental damages The book sets out the methodology for making such estimates and then applies it to data from four countries Germany Italy The Netherlands and

the UK The results show what can be achieved in the way of consistent damage estimates and what the key problems are

Making Green Cities Jürgen Breuste, Martina Artmann, Cristian Ioja, Salman Qureshi, 2023-03-16 This book shows what role nature can play in a city and how this can make it a better place for people to live People planners designers and politicians are working towards the development of green cities Some cities are already promoted as green cities while others are on their way to become one But their goals are often unclear and can include different facets Presenting contributions from world leading researchers in the field of urban ecology the editors provide an interdisciplinary overview of best practices and challenges in creating green cities They show examples of how to build up these cities from bits and pieces to districts and urban extensions Each example concludes with a summary of the collected knowledge the learning points and how this can be used in other places The best practices are collected from around the world Europe America and Asia Contributions cover a wide range of biophysical and cultural backgrounds within these three continents including the Central Southern and Eastern European region as well as Latin and North America The new dynamic urban development of Asia is illustrated by case studies from China and the Indian subcontinent The reader will learn which role nature can play in green cities and what the basic requirements are in terms of culture pre existing nature conditions existing urban surroundings history design and planning
