Jonathan Chaplin, Gary Wilton, 2015-12-14 The current political economic and financial crises facing the EU reveal a deeper cultural indeed spiritual malaise a crisis in the soul of Europe Many observers are concluding that the soul of Europe cannot be restored to health without a new appreciation of the contribution of religion to its past and future and especially that of its hugely important but widely neglected Christian heritage which is alive today even amidst advancing European secularization This book offers a fresh constructive and critical understanding of Christian contributions to the origin and development of the EU from a variety of theological and national perspectives It explains the Christian origins of the EU documents the various ways in which it has been both affirmed and critiqued from diverse theological perspectives offers expert theologically informed assessments of four illustrative policy areas of the EU trade finance environment science and also reports on the place of religion in the EU including how religious freedom is framed and how contemporary religious including Muslim actors relate to EU institutions and vice versa The book fills a major gap in the current debate about the future of the European project and will be of interest to students and scholars of religion politics and European studies

The Political History of European Integration Hagen Schulz-Forberg, Bo Stråth, 2014-06-03 The Maastricht Treaty in 1992 was based on neoliberal ideas of a market driven European economy and democracy and continues to be seen as a step towards a new stage of unification towards a more federal Europe based on market integration The authors demonstrate that European integration as a federal project actually came to an end around 1970 The European Economic Community EEC the precursor of EU was never thought of as a democracy The authors locate a shift in thinking about legitimacy and further integration in the 1980s when the idea of a European democracy was connected with a plan for the internal market the market would pave the way for democracy Since then there has been a growing tension between the official line about a democratic EU and the institutional capacity to carry it through This tension undermined integration The book suggests that instead of democracy through market there are signs of increasing social disintegration political extremism and populism in the wake of economic integration Providing a more realistic historical understanding of European integration this book will be of interest to students and scholars of political science history and European studies The Treaty of Nice Finn Laursen, 2006 This book gives a detailed analysis of the making of the Treaty of Nice the current treaty of the European Union adopted in 2000 It analysis the interests and strategies of the various actors including the 15 Member States during the negotiations and tries to explain the main institutional changes re weighting of votes in the Council of Ministers future changes in the composition of the European Commission extended use of qualified majority voting and easier conditions for a smaller group of Member States going faster in the integration process enhanced cooperation Walter Hallstein □ Jurist und gestaltender Europapolitiker der ersten Stunde Ingrid Piela, 2012-01-01 **The Franco-German Relationship in the EU** Douglas Webber, 2005-08-30 This text examines the Franco German relationship in the EU in relation to different policy sectors It assesses the nature and importance of the relationship for the policy process **Visions of Community in the Post-Roman World** Walter Pohl, Clemens Gantner, Richard Payne, 2016-03-03 This volume looks at visions of community in a comparative perspective from Late Antiquity to the dawning of the age of crusades It addresses the question of why and how distinctive new political cultures developed after the disintegration of the Roman World and to what degree their differences had already emerged in the first post Roman centuries The Latin West Orthodox Byzantium and its Slavic periphery and the Islamic world each retained different parts of the Graeco Roman heritage while introducing new elements For instance ethnicity became a legitimizing element of rulership in the West remained a structural element of the imperial periphery in Byzantium and contributed to the inner dynamic of Islamic states without becoming a resource of political integration Similarly the political role of religion also differed between the emerging post Roman worlds It is surprising that little systematic research has been done in these fields so far The 32 contributions to the volume explore this new line of research and look at different aspects of the process with leading western Medievalists Byzantinists and Islamicists covering a wide range of pertinent topics At a closer look some of the apparent differences between the West and the Islamic world seem less

distinctive and the inner variety of all post Roman societies becomes more marked At the same time new variations in the discourse of community and the practice of power emerge Anybody interested in the development of the post Roman Mediterranean but also in the relationship between the Islamic World and the West will gain new insights from these studies on the political role of ethnicity and religion in the post Roman Mediterranean **EU Antitrust Law and Sport**
