Stinchcombe, 1995-12-11 Plantations especially sugar plantations created slave societies and a racism persisting well into post slavery periods so runs a familiar argument that has been used to explain the sweep of Caribbean history Here one of the most eminent scholars of modern social theory applies this assertion to a comparative study of most Caribbean islands from the time of the American Revolution to the Spanish American War Arthur Stinchcombe uses insights from his own much admired Economic Sociology to show why sugar planters needed the help of repressive governments for recruiting disciplined labor Demonstrating that island to island variations on this theme were a function of geography local political economy and relation to outside powers he scrutinizes Caribbean slavery and Caribbean emancipation movements in a world historical context Throughout the book Stinchcombe aims to develop a sociology of freedom that explains a number of complex phenomena such as how liberty for some individuals may restrict the liberty of others Thus the autonomous governments of colonies often produced more oppressive conditions for slaves than did so called arbitrary governments which had the power to restrict the whims of the planters Even after emancipation freedom was not a clear cut matter of achieving the ideals of the Enlightenment Indeed it was often a route to a social control more efficient than slavery providing greater flexibility for the planter class and posing less risk of violent rebellion **Agriculture Handbook** , 1979
