Building a Better MCAT: the Design, Redesign, and Use of the Medical College Admissions Test, 1971-1980 Christopher Lening, 2006 *Trouble in the University* Mildred A. Schwartz, 2014-07-17 In *Trouble in the University* Mildred A. Schwartz analyzes how changes in U S higher education affecting the health care professions and in the relations between universities and the state have created conditions that can give rise to corruption Explanations for how the connections between changing conditions and organizational structures can lead to illegal and unethical behavior are uncovered through the study of the University of Medicine and Dentistry of New Jersey Because that University s experiences were not unique they can be used to demonstrate how higher education has become vulnerable to corruption Identification of the structural and cultural sources of corruption also suggests possible ways it could be avoided

Veronese,2021-12-30 This book provides family doctors with a wealth of evidence based indications and tips regarding geriatric medicine and approaches for the management of older patients to be applied in daily practice After discussing old and new features of healthy ageing and the approaches required in Family Medicine Consultation the text introduces key elements of geriatric medicine such as frailty sarcopenia and the comprehensive geriatric assessment CGA before describing a range of characteristics unique to older patients in different contexts with a dedicated section on Palliative Care The role of polypharmacy and the importance of quaternary prevention and deprescribing are also addressed Finally the book emphasizes both the importance of a humanistic approach in caring and the approach of research and meta research in geriatrics Though many texts explore the role of primary care professionals in geriatric medicine the role of family doctors in older people care has not yet been clearly addressed despite the growing burden of ageing which has been dubbed the silver tsunami Family physicians care for individuals in the context of their family community and culture respecting the autonomy of their patients In negotiating management plans with their patients family doctors integrate physical psychological social

cultural and existential factors utilizing the knowledge and trust engendered by repeated visits They do so by promoting health preventing disease providing cures care or palliation and promoting patient empowerment and self management This will likely become all the more important since we are witnessing a global demographic shift and family doctors will be responsible for and involved in caring for a growing population of older patients This book is intended for family medicine trainees and professionals but can also be a useful tool for geriatricians helping them to better understand some features of primary care and to more fruitfully interact with family doctors

Can a Health Care Market Be Moral? Mary J.

McDonough, 2007-06-08 Since the 1970s health care costs in the United States have doubled insurance premiums have far outpaced inflation and the numbers of the uninsured and underinsured are increasing at an alarming rate At the same time the public expects better health care and access to the latest treatment technologies Governments desperate to contain ballooning costs often see a market based approach to health care as the solution critics of market systems argue that government regulation is necessary to secure accessible care for all The Catholic Church generally questions the market's ability to satisfy the many human needs intrinsic to any care delivery system yet although the Church views health care as a basic human right it has yet to offer strategies for how such a right can be guaranteed Mary J McDonough a former Legal Aid lawyer for medical cases understands the advantages and disadvantages of market based care and offers insight and solutions in *Can a Health Care Market Be Moral* Drawing on Catholic social teachings from St Augustine to Pope John Paul II McDonough reviews health system successes and failures from around the world and assesses market approaches to health care as proposed by leading economists such as Milton Friedman Regina Herzlinger Mark Pauly and Alain Enthoven Balancing aspects of these proposals with Daniel Callahan's value dimension approach McDonough offers a Catholic vision of health care in the United States that allows for some market mechanisms while promoting justice and concern for the least advantaged
