Horowitz, 2013-12-02 While the clash between what has been called the modern and undeveloped worlds has led to America's military involvement in the Middle East and other places few people realize the tension between the modern and the traditional within the United States Beginning in the 1920's professional intellectuals and academics began influencing the nation's public policy on matters as diverse as education economics and public health In this thoughtful work David A Horowitz analyzes the tension between the so called New Class of knowledge professionals and their critics who accused them of being out of touch with the common sense of everyday people strangers to the American Way even Communists America's Political Class Under Fire is organized over nine periods of 20th century history providing a window into everything from the Scopes evolution trial and McCarthyism to affirmative action and the Clinton health care fiasco Along the way the book explores the New Left populist conservatism and the mid 90's reaction to political liberalism which saw Newt Gingrich rise to the top post in the House of Representatives In telling these stories Horowitz seeks to encourage a more balanced and fair minded assessment of the consequences of expertise and applied intellect to democratic existence in the United States What Went Wrong George R. Tyler, 2013-07-16 Something has gone seriously wrong with the American economy The American economy has experienced considerable growth in the last 30 years But virtually none of this growth has trickled down to the average American Incomes

have been flat since 1985 Inequality has grown and social mobility has dropped dramatically Equally troubling these policies have been devastating to both American productivity and our long term competitiveness Many reasons for these failures have been proposed Globalization Union greed Outsourcing But none of these explanations can address the harsh truth that many countries around the world are dramatically outperforming the U S in delivering broad middle class prosperity And this is despite the fact that these countries are more exposed than America to outsourcing and globalization and have much higher levels of union membership In What Went Wrong George R Tyler a veteran of the World Bank and the Treasury Department takes the reader through an objective and data rich examination of the American experience over the last 30 years He provides a fascinating comparison between the America and the experience of the family capitalism countries Australia Austria Belgium Denmark France Germany the Netherlands and Sweden Over the last 30 years they have outperformed the U S economy by the only metric that really matters delivering better lives for their citizens The policies adopted by the family capitalist countries aren t socialist or foreign They are the same policies that made the U S economy of the 1950s and 1960s the strongest in the world What Went Wrong describes exactly what went wrong with the American economy how countries around the world have avoided these problems and what we need to do to get back on the right track

The State of the American Mind: Stupor and Pathetic Docility Volume Ii Amechi Okolo, 2010-06-11 This book The State of the American Mind Stupor and Pathetic Docility Volume One begins to unravel some of the most obvious perplexing embarrassing and enduring problems and contradictions of American history and sociology viz how could the American revolution that started with the most ringing and most inspiring Declarations of human equality in world history end up establishing the most vicious exploitative society the world ever knew Black chattel slavery and only ten percent white enfranchisement etc Further how could men of such great wisdom and

intellect like George Washington James Madison Thomas Jefferson and others who were Enlightenment scholars and clearly knew that slavery was despicable and evil because they had variously experienced white servitude and slavery themselves collude to establish and institutionalize the horrible system of Negro chattel slavery in America and also disenfranchised over 90 percent of people of their own race actions that racism could not explain The structural institutional slavery system they established and the resultant consequent racism hobbles America today as it did in the past and forced Eric Holder the Attorney General to declare that America is a nation of cowards when it comes to race discussions Thus this book starts with serious critical discussions of race in America and reveals what no textbook has ever done viz that most early American whites and Blacks were slaves an uncomfortable fact that would shock most Americans because it contradicts the orthodoxy or the dominant narrative that only Blacks were brought here in chains Further the book also shows the year Black slavery started something almost all textbooks got wrong It also shows who was the first Black slave in America something no textbook ever mentions It also shows when and how racism started in America and many other very sensitive and embarrassing but necessary issues that America avoids but must be frankly discussed for America to move forward This book therefore shatters the two dominant themes of Americas history and sociology that Blacks were brought into America in chains as slaves while whites came to America in search of freedom as Harvard educated President Obama famously told us in his race speech Thus the crowning lesson of this book in addition to discussing some critical policy issues like education health care etc is that it discovers the centripetal force of the American society that eluded contemporary Americans because American bosses have laboriously concealed the facts from the public the scary but clearly healthy uniting fact that most Americans are united by their common ancestry their universal history and experience of servitude bond indentures and slavery Nothing is more universal more common and more shared in American history and sociology than the fact that most of our ancestors black and white were servants bond indentures and slaves who were dominated and super exploited by few overlords Colonial America was the preferred dumping ground for British outcasts rejects criminals masterless class vagabonds bond indentures slaves etc until 1776 when Australia replaced America as the British dump for its rejects and surplus citizens Thus that America was a nation founded by British rejects and losers is inherently more rational than the prevailing orthodoxy or the Obama theory of Americas founders that they were great honorable men who journeyed across the ocean for freedom because of the obvious reason that good powerful achieving citizens do not normally emigrate to new uncharted lands
