Years Before The Riot Newark New Jersey And The United Community:

The Business of Black Power Laura Warren Hill, Julia Rabig, 2012 Explores business development in the Black power era and the centrality of economic goals to the larger black freedom movement The Business of Black Power emphasizes the centrality of economic goals to the larger black freedom movement and explores the myriad forms of business development in the Black power era This volume charts a new course for Black power studies and business history exploring both the business ventures that Black power fostered and the impact of Black power on the nation's business world Black activists pressed business leaders corporations and various levels of government into supporting a range of economic development ventures from Black entrepreneurship to grassroots experiments in economic self-determination to indigenous attempts to rebuild inner city markets in the wake of disinvestment They pioneered new economic and development strategies often in concert with corporate executives and public officials Yet these same actors also engaged in fierce debates over the role of business in strengthening the movement and some African Americans outright rejected capitalism or collaboration with business The ten scholars in this collection bring fresh analysis to this complex intersection of African American and business history to reveal how Black power advocates or those purporting a Black power agenda engaged business to advance their economic political and social goals They show the business of Black power taking place in the streets boardrooms journals and periodicals corporations courts and housing projects of America In short few were left untouched by the influence of this movement Laura Warren Hill is assistant professor of history at Bloomfield College Julia Rabig is a lecturer at Dartmouth College

The Fixers Julia Rabig, 2016-09-28 From the 1960s to the 1990s civil rights black power and antipoverty activists confronted both deeply rooted forms of inequality and new variants produced by the urban crisis Recognizing the limits of liberal reform in the 1950s and 1960s they devised new approaches that altered the relationship between urban civil society and the state and endured as neoliberal governing priorities took hold This transformation is explored through the emergence of individual and organizational fixers

The Color of Money Mehrsa Baradaran, 2017-09-14 Read this book It explains so much about the moment Beautiful heartbreaking work Ta Nehisi Coates A deep accounting of how America got to a point where a median white family has 13 times more wealth than the median black family The Atlantic Extraordinary Baradaran focuses on a part of the American story that's often ignored the way African Americans were locked out of the financial engines that create wealth in America Ezra Klein When the Emancipation Proclamation was signed in 1863 the black community owned less than 1 percent of the total wealth in America More than 150 years later that number has barely budged The Color of Money seeks to explain the stubborn persistence of this racial wealth gap by focusing on the generators of wealth in the black community black banks With the civil rights movement in full swing President Nixon promoted black capitalism a plan to support black banks and minority owned businesses But the catch 22 of black banking is that the very institutions needed to help communities escape the deep poverty caused by discrimination and segregation inevitably

became victims of that same poverty In this timely and eye opening account Baradaran challenges the long standing belief that black communities could ever really hope to accumulate wealth in a segregated economy Black capitalism has not improved the economic lives of black people and Baradaran deftly explains the reasons why Los Angeles Review of Books A must read for anyone interested in closing America s racial wealth gap Black Perspectives **Naming Race, Naming Racisms** Jonathan Judaken,2013-09-13 Eschewing social scientific approaches which tend to examine race and racism in terms of quasi static ideal types this book surveys differing historical contexts from the era of scientific racism in the nineteenth century to the post racial racism of the post 9 11 period and from Europe to the United States in order to understand how racism has been articulated in differing situations It is distinguished by the attention it pays to the on going power of racial discourse in the contemporary period as a legitimating factor in oppression It exemplifies methodological openness combining the work of historians philosophers religious scholars and literary critics and includes differing theoretical models in pursuing a critical approach to race cultural studies trauma theory and psychoanalysis critical theory and consideration of the new racism and postcolonialism and the literature on globalization It brings together the work of leading academics with younger practitioners and is capped off by an interview with world renowned intellectual Cornel West on black intellectuals in America This book was previously published as a special issue of Patterns of Prejudice
