175 Ans Dindustrie Pharmaceutique Franc:

Chemistry, Pharmacy and Revolution in France, 1777-1809 Jonathan Simon, 2016-04-08 This book explores the history of pharmacy in France and its relationship to the discipline of chemistry as it emerged at the beginning of the nineteenth century It argues that an appreciation of the history of pharmacy is essential to a full understanding of the constitution of modern science in particular the discipline of chemistry As such it provides a novel interpretation of the chemical revolution c 1770 1789 that will no doubt generate much debate on the place of the chemical arts in this story a question that has hitherto lacked sufficient scholarly reflection Furthermore the book situates this analysis within the broader context of the French Revolution arguing that an intimate and direct link can be drawn between the political upheavals and our vision of the chemical revolution The story of the chemical revolution has usually been told by focusing on the small group of French chemists who championed Lavoisier's oxygen theory or else his opponents Such a perspective emphasises competing theories and interpretations of critical experiments but neglects the challenging issue of who could be understood as practising chemistry in the eighteenth century In contrast this study traces the tradition of pharmacy as a professional pursuit that relied on chemical techniques to prepare medicines and shows how one of the central elements of the chemical revolution was the more or less conscious disassociation of the new chemistry from this ancient chemical art

The Colonial Life of Pharmaceuticals Laurence Monnaï, Laurence Monnaï-Rousselot, 2019-08-22 Innovative examination of the early globalization of the pharmaceutical industry arguing that colonialism was crucial to the worldwide diffusion of modern medicines

Collaboration in the Pharmaceutical Industry Viviane Quirke, 2012-10-12 Examining the issue of British decline after the war this fascinating text describes the evolution of cooperation in Britain and France and argues that the relationship between these two countries helped to disseminate a culture of research resulting in the transformation of the medical sciences and the pharmaceutical industry in both countries Of interest to a wide range of academic disciplines this highly relevant book discusses topics including penicillin sulphamide drugs and the effects of war in both countries

The Global Chemical Industry in the Age of the Petrochemical Revolution Louis Galambos, Takashi Hikino, Vera Zamagni, 2007 This book first published in 2007 offers a comparative analysis of the performance of the chemical industry in the age of the petrochemical revolution

Perspectives on Twentieth-century Pharmaceuticals Viviane Quirke, Judy Slinn, 2010 One of the most striking features of the twentieth century has been the rapid growth of the pharmaceutical industry and the large increases in the use and consumption of its products This trend began in the first half of the century but accelerated most sharply after the Second World War when the creation of national systems of healthcare created mass markets for drugs The industry then assumed a major economic social and political significance and became one of the most highly regulated sectors of the economy attracting the attention of industry analysts as well as academics This volume brings together a collection of papers exploring and reflecting upon some of the significant strands in the

current studies of pharmaceuticals in the twentieth century They touch upon many of the issues that are matters of concern and debate today and their international and multidisciplinary approaches enrich our understanding of an object of an industry and of a process that are at the heart of our highly medicalized contemporary societies Understanding Drugs Markets Carine Baxerres, Maurice Cassier, 2021-07-27 Drawing on anthropology historical sociology and social epidemiology this multidisciplinary book investigates how pharmaceuticals are produced distributed prescribed and consumed and regulated in order to construct a comprehensive understanding of the issues that drive medicine pharmaceutical markets in the Global South today Based on primary research conducted in Benin and Ghana and additional data collected in Cambodia and the Ivory Coast this volume uses artemisinin based combination therapies ACTs against malaria as a central case study It highlights the influence of the countries colonial and post colonial history on their models for state regulation production and distribution explores the determining role transnational actors as well as industries from the North but also and increasingly from the South play in influencing local pharmaceutical markets and looks at the behaviour of health care professionals and individuals Stepping back the authors then unpick the pharmaceuticalization process and the multiple regulations at stake by looking at the workings of and linkages between biomedical health pharmaceutical systems representatives of companies industries actors in private distribution and consumer practices Providing a thorough comparative analysis of the advantages and disadvantages of different pharmaceutical systems it is an important contribution to the literature on pharmaceuticalization and the governance of medication It is of interest to students researchers and policy makers interested in medical anthropology the sociology of health and illness global health healthcare management and pharmacy The Open Access version of this book available at <http://www.taylorfrancis.com/books/9780429329517> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license *Industries and Global Competition* Bram Bouwens, Pierre-Yves Donzé, Takafumi Kurosawa, 2017-09-18 Changes in the dynamics of economic activities since the last decades of the 20th century have yielded major changes in the composition of industries and the division of labor and production across different regions of the world Despite these shifts in the global economy some industries have remained competitive even without relocating their operations overseas *Industries and Global Competition* examines how and why the specificities of certain industries and firms determined their choice of location and competitiveness This volume identifies the major drivers of this process and explains why some firms and industries moved to other parts of world while others did not Relocation was not the sole determinant of the success or failure of firms and industries Indeed some were able to reinvent themselves at their original location and build new competitive advantages The path that each industry or firm took varied This book argues that the specific characteristics of each industry defined the conditions of competitiveness and provide a wide range of cases as illustrations Aimed at scholars researchers and academics in the fields of business history international business and related disciplines *Industries and Global Competition* examines the unique questions How and why

did the specificities of certain industries and firms determine their choice of location and competitiveness Chapter 11 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Ways of Regulating Drugs in the 19th and 20th Centuries Jean-Paul Gaudillière, V. Hess, 2012-12-03 This collection takes the perspective that the historiography of science, technology and medicine needs a broader approach toward regulation. The authors explore the distinct social worlds involved in regulation: the forms of evidence and expertise mobilized and means of intervention chosen to tame drugs in factories, consulting rooms and courts.

Epidemics Laid Low Patrice Bourdelais, 2006-04-25 In *Epidemics Laid Low*, epidemiologist and historian Patrice Bourdelais analyzes the history of disease epidemics in Europe from the Middle Ages to the present.

Directory of European Research and Development, 1997

Healthcare in Private and Public from the Early Modern Period to 2000 Paul Weindling, 2014-12-17 A key volume on a central aspect of the history of medicine and its social relations. The *History of Healthcare in Public and Private* examines how the modernisation of healthcare resulted in a wide variety of changing social arrangements in both public and private spheres. This book considers a comprehensive range of topics ranging from children's health, mental disorders and the influence of pharmaceutical companies to the systems of twentieth century healthcare in Britain, Eastern Europe and South Africa. Covering a broad chronological thematic and global scope, chapters discuss key themes such as how changing economies have influenced configurations of healthcare, how access has varied according to lifecycle, ethnicity and wealth, and how definitions of public and private have shifted over time. Containing illustrations and a general introduction that outlines the key themes discussed in the volume, *The History of Healthcare in Public and Private* is essential reading for any student interested in the history of medicine.
