1950s Decades Of The 20th Century:

1950s Milan Bobek,2005 This volume arranged chronologically presents key events that have shaped the decade from significant political occurrences to details of daily life **1950s** Nick Yapp,1998 *1950s: Decades of the 20th Century* Nicholas Yapp,1998 **Decades of the 20th century: 1950s** Nicholas Yapp,1998 *The Eisenhower Years: a Social History of the 1950'S* Richard T. Stanley,2012-06-15 The Fabulous Fifties were America s Happy Days The Eisenhower Years produced amazing contributions to our American culture and to other cultures around the world In so many ways Americans innovated and the world imitated from Elvis Presley and rock n roll to the Salk anti polio vaccine America s contributions to the world included motion pictures and the Broadway stage radio and television amateur and professional sports jazz the blues country and Western music traditional ballads and popular songs and rock n roll domestic and international business and trade public and private educational opportunities and a rich and varied literature While Americans did not invent all these categories they nevertheless took each to new heights during the Eisenhower Years and shared their bounty with the world The Eisenhower Years generally speaking were happier more stable more prosperous more optimistic and simpler times then the preceding decades of the 1930 s and 40 s and the increasingly turbulent 1960 s and 70 s that followed In fact America s exuberance in so many areas of the arts and everyday life was omnipresent As for political and military achievements President Eisenhower kept us safely out of war and was wise enough to stay out of the way of Americas artists and entrepreneurs As a result the Eisenhower Years should forever be remembered as those Happy Days **1950s** Nick Yapp,2008-02 **The Lost Decade? The 1950s in European History, Politics, Society and Culture** Heiko Feldner,Claire Gorrara,Kevin Passmore,2010-10-12 This volume of essays explores the social political and cultural legacies of a decade which has until relatively recently received scant scholarly attention Sandwiched uncomfortably between the traumatic events of the Second World War and the dramatic changes of the 1960s the 1950s appeared as seemingly transitional years while they were in fact an astonishingly fecund period of reassessment and experimentation when traditional models were re evaluated and new models were road tested to be either developed or rejected An important intervention in the dynamic scholarly re examination of the 1950s this volume analyzes these years in relation to three broadly defined areas historiography politics and society and culture What emerges from all three parts of the volume is a vision of the 1950s as a decade which was to have a profound impact on post war European identities in two key respects as a time of accelerated European intellectual exchange and as a time of fertile receptivity to the new variously formulated and contested across and within national borders Written by experts in the field the contributions to this volume represent some of the most exciting work on the 1950s currently being undertaken in Europe and the US They combine high intellectual standards with accessibility and will appeal to academics students and the general reader alike [How Was Life? Climate Change 2001: Synthesis Report Intergovernmental Panel on Climate Change. Working Group I, 2001 The Intergovernmental Panel on Climate Change IPCC was set up jointly by UNEP and the World Meteorological Organisation in 1988 to provide periodic scientific analysis of the causes impacts and possible policy response options to climate change issues This synthesis report is the 4th and final part of the IPCC's third assessment report and contains information on nine policy relevant questions regarding the IPCC's 2001 assessment It is intended to assist governments individually and collectively to formulate appropriate adaptation and mitigation responses to the threat of human induced climate change

Japanese Economy In Retrospect, The: Selected Papers By Gary R Saxonhouse (In 2 Volumes) Robert M Stern, Gavin Wright, Hugh Patrick, 2010-07-05 Gary R Saxonhouse was one of the leading world scholars on Japanese economy Born in New York City in 1943 he attended Yale University where he received his PhD in Economics in 1971 He joined the Faculty of Economics at the University of Michigan beginning in 1970 where he taught throughout his career The selection of his published papers that comprises this two volume publication is a testimony and tribute to his remarkable accomplishments and influence that were cut short by his untimely death in November 2006 following a battle with leukemia Volume I contains a selection of his published papers that have been instrumental in enhancing the understanding of Japan's modern economic history focusing in particular on the Japanese cotton spinning industry Volume II features a selection of his published papers that look at how Japan's technology and innovation were key in promoting Japan's economic success how its economy was shaped by its comparative advantage and related policies and how its macro financial policies were implemented in the course of its economic growth after World War II Explaining Divergent Levels of Longevity in High-Income Countries National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Panel on Understanding Divergent Trends in Longevity in High-Income Countries, 2011-07-27 During the last 25 years life expectancy at age 50 in the United States has been rising but at a slower pace than in many other high income countries such as Japan and Australia This difference is particularly notable given that the United States spends more on health care than any other nation Concerned about this divergence the National Institute on Aging asked the National Research Council to examine evidence on its possible causes According to Explaining Divergent Levels of Longevity in High Income Countries the nation's history of heavy smoking is a major reason why lifespans in the United States fall short of those in many other high income nations Evidence suggests that current obesity levels play a substantial part as well The book reports that lack of universal access to health care in the U S also has increased mortality and reduced life expectancy though this is a less significant factor for those over age 65 because of Medicare access For the main causes of death at older ages cancer and

cardiovascular disease available indicators do not suggest that the U S health care system is failing to prevent deaths that would be averted elsewhere In fact cancer detection and survival appear to be better in the U S than in most other high income nations and survival rates following a heart attack also are favorable Explaining Divergent Levels of Longevity in High Income Countries identifies many gaps in research For instance while lung cancer deaths are a reliable marker of the damage from smoking no clear cut marker exists for obesity physical inactivity social integration or other risks considered in this book Moreover evaluation of these risk factors is based on observational studies which unlike randomized controlled trials are subject to many biases

Climate Change 2013: The Physical Science Basis Intergovernmental panel on climate change. United States Census of Agriculture: 1950 United States. Bureau of the Census, 1952 **United States Census of Agriculture, 1950** , 1952 **Politics, Satire, and Historical Consciousness in Contemporary American Novel** Olena Boylu, 2022-11-01 What is the role of the historical and political novel in our lives Is it just a story from the past or does it shape our historical consciousness Can we rely on the information within this type of fiction According to many historicists we cannot However we can also question numerous ideologically shaped history books that look more like fiction than scientific sources Hence historically and politically loaded fiction has an equal chance in the formational process of our historical consciousness Besides through satire and humor which a scientist omits in a history book a novelist manages to affect its reader on a different scale and leave a deeper trace As E L Doctorow once stated The historian tells you what happened The novelist will tell you what it felt like Hence this study analyzes several significant concepts such as historiography historical consciousness power its elements and the way it operates traces major characteristics of historical and political fiction and determines the role of satire within them Eventually through the analysis of several prominent contemporary novels it provides vivid examples of all the concepts that have been discussed
