How Computers Entered the Classroom, 1960-2000 Carmen Flury, Michael Geiss, 2023-06-19 In the history of education, the question of how computers were introduced into European classrooms has so far been largely neglected. This edited volume strives to address this gap. The contributions shed light on the computerization of education from a historical perspective by attending closely to the different actors involved, such as politicians, computer manufacturers, teachers, and students, political rationales and ideologies, as well as financial, political, or organizational structures and relations. The case studies highlight differences in political and economic power, as well as in ideological reasoning and the priorities set by different stakeholders in the process of introducing computers into education. However, the contributions also demonstrate that simple cold war narratives fail to capture the complex dynamics and entanglements in the history of computers as an educational technology and a subject taught in schools. The edited volume thus provides a comprehensive historical understanding of the role of education in an emerging digital society.

Free the Press Brian J. Karem, 2022-01-15 Blending his experiences as a veteran reporter with analysis of the erosion of trust between the press and the government during the past 40 years, in *Free the Press*, renowned journalist Brian J. Karem gives readers a unique perspective on the challenges facing journalism while asking the question: How did we get here? And perhaps more importantly, How do we fix it? Since the Vietnam War, each and every president has overseen the withering of relations between the Executive Branch and the so-called Fourth Estate. Politicians are not solely to blame; however, Corporate media has us following the news of the day for clicks and views rather than pursuing long-term stories of impact. Reporters have ceased to frame the narrative and failed to co-opt social media contributions until it was too late. Placed alongside a firsthand view of Karem's own experience as a reporter and manager in television, print, and the online media industry, where he witnessed buyouts and the end of locally owned and operated newspapers, a behind-the-scenes look at his work as a member of the White House Press Corps and his advocacy to protect the journalistic pillar of anonymity, readers will come away with a deeper understanding of journalism and what happened to it at the national and local level. Karem concludes with a three-step plan to save the free press, as well as a comprehensive method to reporting for reporters to regain level footing and work toward repairing the damage done to one of the most important and sacred institutional relationships of our country.
