

STRONG, SOUND and SOLID from the ground up

LOADSTAR engineers speak for itself — practical, without fluff, confidence-inspiring. The steel wheel is solid and substantial. The bottom line of the fact, as you can see on page 4, that since the pleasure side of loading, hauling and unloading has been to create trucks of outstanding value in working loads of transportation, that creates rightfully good fundamental ideas.

STRAIGHT FORWARD HUSKY FRAMES

Sturdy steel channel side rails of generous proportions extend full length straight to the front end of each model. This ensures good rigidity over the front axle, and allows for uncomplicated front attachment of front-mounted accessories such as winches and powerplants. Reduced depth rear section behind the rear axle reduces front weight while retaining strength in rear suspension, and keep frame height to a minimum. The number of crossmembers has been increased to not less than six, with up to nine on long wheelbase chassis. The crossmembers, in which are attached the rear axle mounting and the center bearing provide support to the full depth of the side rails, giving the frame maximum strength

and torsional rigidity. The short wheelbase chassis needed for tractor use, a deep-section rear crossmember provides ample clearance for the tractor linkage.

Frame reinforcements, attached as left as on larger WB, are located L-type extending from forward of the front spring rear suspension to behind the rear spring front brackets for effective distribution of stresses.

Two third brackets are offered, both providing full-width protection to the front sheet metal. The strong standard front bumper provides a 30 1/2 inch 8000 lb. dimension. A mild front-duty optional channel bumper, which increases the 8000 lb. 30 1/2 inches, gives extra protection for all highway or congested traffic use.

THREE INTERNATIONAL **LOADSTAR** MODELS

All-truck, heavy-duty engineered for easy, low cost, high profit operation

Trucks that are all-truck, nothing but truck... the solid, rugged, powerful, dependable. That's what the International Loadstar models are. That's what they truly are.

Loadstar has this reputation for power and light resistance whether in operation or in construction. Their appeal to truck operators who want maximum value. Their engineering is by heavy-duty truck specialists who are and who want to have to provide the power, the capacity and the ability to make the most of the carrying load of their weight class.

In engineering the Loadstar models, before putting into the following unique and most advantageous combination of features:

1. Traditional and modern engine designs for lowest fuel consumption.
2.
