1982 Year Of Cardiology

Katrin Zwirgmaier

1982 Year Of Cardiology:

Therapeutics in Cardiology Antonio Bayés de Luna, A. Betriu, G. Permanyer, 2012-12-06 Therapy in cardiology has advanced enormously in recent years. This has resulted in the organization of many meetings and the publication of numerous books dedicated to examining the latest aspects of for instance pharmacologic electrical and surgical treatment. However only a few of these meetings and publications have attempted to present an overall review of all advances that have taken place in the field of therapy. In the last years the Spanish Society of Cardiology has shown a great interest in the continuous medical education in cardiology. The Society has organized various meetings and has published several books on the above mentioned topics. Consequently the Society has decided to publish this book an update of the therapeutics in cardiology of which a Spanish version is also available. World renowned experts and outstanding Spanish cardiologists were invited to review all aspects of therapy in cardiology. We would like to thank the Spanish Society of Cardiology and the Catalan Cardiac Society for the generous assistance they have given us during all stages of book preparation. We also would like to express our appreciation to all the authors for their valuable contributions. Their combined efforts enable us to put this volume in the hands of the reader. **Cumulated Index Medicus**, 1983 *The American Journal of Cardiology*, 1983 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), *Current Catalog* National Library of Medicine (U.S.), 1985 First multi year cumulation covers six years 1965-70 *Physical Fitness/sports Medicine*, 1981

Bibliography of the History of Medicine, 1984 **Cardiology** Eugene I. Chazov, 2013-06-29 Once in four years cardiologists of the world united into the International Society and Federation of Cardiology come together to discuss the most pressing problems of cardiovascular pathology sum up the accomplishments of the intervening years and set directions for future research and exploitation of the existing knowledge. Not too much time passed since the I Paris Congress of International Foundation of Cardiology in 1950 but since then we have been witnessing a real information explosion. Extraordinary amounts of new knowledge accumulated during the past three decades has revolutionized our understanding of major cardiovascular diseases as well as approach to their treatment and diagnosis. The IX World Congress of Cardiology held in Moscow in June 20-26 gathered 5 099 delegates from 78 countries. In the course of the Congress prominent scientists presenting 21 lectures on topical problems of theoretical and practical cardiology 900 papers were heard at 37 Symposia and 58 Free Communication Sessions. The papers and discussions demonstrated an increased contribution of fundamental research to clinical arsenal. Another feature of modern biomedical research is that it makes use of the latest accomplishments in other fields of science and technology physics chemistry electronics etc. Of late a new research discipline called molecular cardiology has formed. By elucidating the most subtle basic mechanisms whereby pathological processes develop it is expected to afford ultimate control of cardiovascular diseases. The Congress demonstrated that new knowledge about the diagnosis and treatment is being successfully introduced into clinical practice. *Cardiology 1983* William C. Roberts, Robert
