1990 Recommendations Of The International Commission On Radiological Protection Users Edition:

1990 Recommendations of the International Commission on Radiological Protection International Commission on Radiological Protection,1992 The International Commission on Radiological Protection issued its last basic recommendations in 1977 The recommendations have been used widely throughout the world to limit exposure of both radiation workers and members of the public to ionising radiation Supplementary statements to the 1977 recommendations were issued when necessary by the Commission but developments in the last few years have made it necessary to issue a completely new set of recommendations officially adopted in November 1990 In publishing these recommendations the Commission has had three aims in mind to take account of new biological information and of trends in the setting of safety standards to improve the presentation of the recommendations and to maintain as much stability in the recommendations as is consistent with the new information In order to make the 1990 recommendations more accessible to individuals this Users Edition contains the main text of the original recommendations which includes sufficient explanatory material to make clear the underlying reasons for policy makers but omits the annexes which contained detailed scientific information on specific points for specialists The index has been improved and made more comprehensive

Radiological Risk Assessment and Environmental Analysis John E. Till,Helen A. Grogan,2008-07-10 Radiological Risk Assessment and Environmental Analysis comprehensively explains methods used for estimating risk to people exposed to radioactive materials released to the environment by nuclear facilities or in an emergency such as a nuclear terrorist event This is the first book that merges the diverse disciplines necessary for estimating where radioactive materials go in the

environment and the risk they present to people It is not only essential to managers and scientists but is also a teaching text The chapters are arranged to guide the reader through the risk assessment process beginning with the source term where the radioactive material comes from and ending with the conversion to risk In addition to presenting mathematical models used in risk assessment data is included so the reader can perform the calculations Each chapter also provides examples and working problems The book will be a critical component of the rebirth of nuclear energy now taking place as well as an essential resource to prepare for and respond to a nuclear emergency *Ethics and medical radiological imaging*

Mountain Standards National Research Council,Division on Earth and Life Studies,Commission on Geosciences, Environment and Resources,Committee on Technical Bases for Yucca Mountain Standards,1995-07-28 The United States currently has no place to dispose of the high level radioactive waste resulting from the production of the nuclear weapons

and the operation of nuclear electronic power plants The only option under formal consideration at this time is to place the waste in an underground geologic repository at Yucca Mountain in Nevada However there is strong public debate about whether such a repository could protect humans from the radioactive waste that will be dangerous for many thousands of years This book shows the extent to which our scientific knowledge can guide the federal government in developing a standard to protect the health of the public from wastes in such a repository at Yucca Mountain The U S Environmental Protection Agency is required to use the recommendations presented in this book as it develops its standard
