The Meritocracy Trap Daniel Markovits, 2019-09-10 This book flips your world upside down Daniel Markovits argues that meritocracy isn't a virtuous efficient system that rewards the best and brightest Instead it rewards middle class families who can afford huge investments in their children's education Frightening eye opening stuff The Times Books of the Year Even in the midst of runaway economic inequality and dangerous social division it remains an axiom of modern life that meritocracy reigns supreme and promises to open opportunity to all The idea that reward should follow ability and effort is so entrenched in our psyche that even as society divides itself at almost every turn all sides can be heard repeating meritocratic notions Meritocracy cuts to the heart of who we think we are But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from

meritocracy but rather stems directly from meritocracy's successes This is the radical argument that The Meritocracy Trap prosecutes with rare force comprehensive research and devastating persuasion Daniel Markovits a law professor trained in philosophy and economics is better placed than most to puncture one of the dominant ideas of our age Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within as well as how we can take the first steps towards a world that might afford us both prosperity and dignity

Do the Right Deal, Do the Deal Right Barry Massoudi, 2006

The Defense Industrial Base Nayantara D. Hensel, 2016-03-03 The US and international defense industrial sectors have faced many challenges over the last twenty years including cycles of growth and shrinkage in defense budgets shifts in strategic defense priorities and macroeconomic volatility In the current environment the defense sector faces a combination of these challenges and must struggle with the need to maintain critical aspects of the defense industrial base as defense priorities change and as defense budgets reduce or plateau Moreover the defense sector in the US is interconnected both with defense sectors in other countries and with other industry sectors in the US and global economies As a result strategic decisions made in one defense sector impact the defense sectors of other countries as well as other areas of the economy Given her academic corporate and Department of Defense experience as a leading economist and policy maker Dr Nayantara Hensel is perfectly positioned to examine the interrelationship between these forces both historically and in the current environment and to assess the implications for the future global defense industrial base

Advances in Mergers and Acquisitions Sydney Finkelstein, Cary L. Cooper, 2012-12-05 Advances in Mergers and Acquisitions offers a unique perspective that will help scholars think about mergers and acquisitions in new ways building our knowledge base on this critical topic

Megabank Consolidations in the United States Ashford Maharaj, 2005-07 Megabank consolidations in the United States The enigma continues investigates merger of equals among megabanks as a business model and also postulates that higher premiums are paid for the right to integrate with the very large banks versus that paid for the right to integrate with relatively smaller banks By

introducing merger of equals and megabank premium comparatives the author has filled a void left vacant by previous researchers investigating inorganic growth among banks in the U S banking industry Decision makers academicians policy makers and students of finance will once more be looking for what is out there in order to guide understandings and decisions re the integration aspects among financial intermediaries The book sought to illuminate a clarity of understanding involving the analysis and interpretation of organic versus inorganic growth among megabanks in the United States Despite the general destruction of shareholders incremental value brought about through inorganic growth the enigma continues in that banks proceed to integrate at an accelerating pace over the past two decades though there was a brief lull early in this new Millennium

Why Companies Do Not Pursue Attractive Mergers and Acquisitions Richard B. Connell, 2008 There are substantial bodies of literature that advance theory about why merger and acquisition candidates are found to be unattractive why negotiations are not concluded and why the benefits of companies that are acquired are not realised Little if any research identifies why merger and acquisition opportunities are not pursued in the period after candidates are analysed and found to be attractive but before negotiations begin This study addresses this period by developing a theoretical framework of the variables that intervene to reverse decisions to pursue apparently attractive candidates before negotiations begin and which in doing so result in missed opportunities The study is informed primarily by the strategic management content literature but draws from the strategy process literature including streams in strategic decision making SDM and behavioural decision theory BDT This is a critical book for business scholars that provides an important perspective that has not yet been studied
