Expanding Underground - Knowledge and Passion to Make a Positive Impact on the World Georgios Anagnostou, Andreas Benardos, Vassilis P. Marinos, 2023-04-12 Expanding Underground Knowledge and Passion to Make a Positive Impact on the World contains the contributions presented at the ITA AITES World Tunnel Congress 2023 Athens Greece 12-18 May 2023 Tunnels and underground space are a predominant engineering practice that can provide sustainable cost efficient and environmentally friendly solutions to the ever growing needs of modern societies This underground expansion in more diverse and challenging infrastructure types or to novel underground uses can foster the changes needed At the same time the tunneling and underground space community needs to be better prepared and

equipped with knowledge tools and experience to deal with the prevailing conditions to successfully challenge and overcome adversities on this path The papers in this book aim at contributing to the analysis of challenging conditions the presentation and dissemination good practices the introduction of new concepts new tools and innovative elements that can help engineers and all stakeholders to reach their end goals Expanding Underground Knowledge and Passion to Make a Positive Impact on the World covers a wide range of aspects and topics related to the whole chain of the construction and operation of underground structures Knowledge and Passion to Expand Underground for Sustainability and Resilience Geological Geotechnical Site Investigation and Ground Characterization Planning and Designing of Tunnels and Underground Structures Mechanised Tunnelling and Microtunnelling Conventional Tunnelling Drill and Blast Applications Tunnelling in Challenging Conditions Case Histories and Lessons Learned Innovation Robotics and Automation BIM Big Data and Machine Learning Applications in Tunnelling Safety Risk and Operation of Underground Infrastructure and Contractual Practices Insurance and Project Management The book is a must have reference for all professionals and stakeholders involved in tunneling and underground space development projects

1999 Rapid Excavation and Tunneling Conference Society for Mining Metallurgy & Exploration Inc,1999 The Rapid Excavation and Tunneling Conference is an international forum dedicated to sharing advances in state of the art underground construction and innovative solutions to problems associated with this work Recommended Contract Practices for Underground Construction, Second Edition Sarah H.

Wilson,2019-05-10 A successful underground project is one where relationships are strong the objectives as understood by each party are met or exceeded and the work product serves its stakeholders and is maintainable in a way that fits with the project vision High level metrics for project success relate to safety quality schedule and budget The first edition of Recommended Contract Practices for Underground Construction has become a valued resource for the underground industry serving as a concise guide for drafting and implementation of contract provisions It provided improvements to underground contracting practices during all project stages It also presented clear roles and responsibilities for project participants to promote better contracts This second edition was undertaken by the UCA of SME because the industry has undergone numerous changes over the last decade Changes in tunneling technology more common use of design build as a contracting mechanism and many lessons learned have sparked some creative contract approaches The recommendations contained in this edition are intended to guide owners and their engineers in developing and administering contracts and to give contractors a better understanding of the rationale behind contract provisions The goal is that more underground projects in this country can be best projects where improved relationships and fair contracts enable all project participants to personally invest in cost effective profitable projects ensuring the continued health of the underground industry *Rock Engineering in Difficult Ground Conditions - Soft Rocks and Karst* Ivan Vrkljan,2009-10-14 Containing 129 papers in geological and hydrogeological properties of karst regions rock properties testing methods and site characterization design methods and

analyses monitoring and back analysis excavation and support environmental aspects of geotechnical engineering in karst regions and case histories this volume is of interest to professionals engineers and academics involved in rock mechanics and rock engineering **Underground Space Use. Analysis of the Past and Lessons for the Future, Two Volume Set** Sören Erdem,Tülin Solak,2005-06-30 The 200 papers in this two volume set are a selection of work by tunnel experts from Europe Asia and the USA and also showcase the work of the host nation Turkey As the title implies the scope of the book is enormous covering every aspect of tunnelling from contract management to safety The book is of special interest to researchers scient **Index of Conference Proceedings** British Library. Document Supply Centre,2002 **Spatial Effects in Tunnelling Through Squeezing Ground** Linard Cantieni,2011 **Recommended Contract Practices for Underground Construction** William W. Edgerton,2008 Underground construction is more complex than ever Demand for space is increasing new technologies are constantly evolving and more stakeholders are asserting influence Yet one of the most challenging and frustrating characteristics of underground construction remains often contract language does not account for the unique nature of building underground Recommended Contract Practices for Underground Construction is the first industry wide effort to improve contract procedures in more than 30 years Commissioned by the Underground Construction Association of the Society for Mining Metallurgy and Exploration this manual is an indispensable resource for contractors consultants suppliers and owners anticipating underground projects The authors suggest better practices during all stages of a project when decisions are made that can affect the contract positively or negatively Part one focuses on the practices and disciplines that build the foundation for effective contracts during the early phases of a project Part two discusses best practices for contract provisions payment mechanisms and dispute resolution By following these recommendations you ll reduce the mistrust and costly disputes that often arise from the contract process The result will be improved relationships better contracts and most importantly projects that are most cost effective for owners and more profitable for contractors *Critical Issues in Selecting Conventional and Mechanized Tunnelling Methods* Nuh Bilgin,Cemal Balci,2025-05-03 This book discusses the critical issues in selecting conventional and mechanized tunneling methods and lessons learned from the past It covers the following main topics geological and geotechnical parameters affecting tunneling methods summarizing conventional tunneling and mechanized tunneling methods the factors affecting the choice of tunneling methods such as the cost of the initial investment the length of the tunnel project scheduling time for mobilization emerging new technologies Some examples of changing the tunneling method from conventional to mechanized tunneling or vice versa during the same ongoing project and hybrid tunneling methods in the same project are also given The last chapter resumes the innovations made for the tunneling industry summarizing advancements in safety non circular TBMs robotics new instrumentation new materials and methodologies to decrease carbon footprint This book is aimed at graduate students professionals and researchers in tunneling civil and mining engineering and geology Handbook on
