The Viennese Café and Fin-de-Siècle Culture Charlotte Ashby, Tag Gronberg, Simon Shaw-Miller, 2013-01-01 The Viennese

café was a key site of urban modernity around 1900. In the rapidly growing city it functioned simultaneously as home and workplace, affording opportunities for both leisure and intellectual exchange. This volume explores the nature and function of the coffeehouse in the social, cultural, and political world of fin de siècle Vienna. Just as the café served as a creative meeting place within the city, so this volume initiates conversations between different disciplines focusing on Vienna at the beginning of the twentieth century. Contributions are drawn from the fields of social and cultural history, literary studies, Jewish studies, and art and architectural and design history. A fresh perspective is also provided by a selection of comparative articles exploring coffeehouse culture elsewhere in Eastern Europe.

The Emergence of the Interior Charles Rice, 2006-11-22. Taking a radical position counter to many previous histories and theories of the interior, domesticity, and the home, *The Emergence of the Interior* considers how the concept and experience of the domestic interior have been formed from the beginning of the nineteenth century. It considers the interior's emergence in relation to the thinking of Walter Benjamin and Sigmund Freud and through case studies in architecture's trajectories toward modernism. The book argues that the interior emerged with a sense of doubleness, being understood and experienced as both a spatial and an image-based condition. Incorporating perspectives from architecture, critical history, and theory, and psychoanalysis, *The Emergence of the Interior* will be of interest to academics and students of the history and theory of architecture and design, social history, and cultural studies.

New Practices - New Pedagogies Malcolm Miles, 2004-11-23. With radical changes happening in arts over the past two decades, this book brings us up to date with the social and economic contexts in which the arts are produced. Influential and knowledgeable leaders in the field debate how arts education, particularly in visual art, has changed to meet new needs or shape new futures for its production and reception. Opening up areas of thought previously unexplored in arts and education, this book introduces students of visual culture, performance studies, and art and design to broad contextual frameworks, new directions in practice, and finally gives detailed cases from and insights into a changing pedagogy.

The Rough Guide to England, 2004-03 This is a comprehensive and up to the minute handbook to England. It includes recommendations of the best places to stay, eat, and drink in all budget ranges and in all regions. It also includes accounts of every type of attraction.

Sites of Exchange, 2006-01-01 Crossing borders both physically and imaginatively is part of our nomadic postmodern identity, but transcultural and transnational exchanges have also played a major role in the centuries long processes of hybridisation that helped to fashion the vast geographic, political, and imaginative container of diversity we call Europe. This volume gathers together the work of scholars from several European countries in an attempt to encourage a collective reflection upon historical and often mythical locations and landscapes as well as upon the thresholds and faultlines that unite or separate them. The issues the volume tackles are delicate and complex for the encounter of differences engenders both curiosity and suspicion, and there is no easy way to create a new synthesis while respecting and promoting diversity. However, since Europe is inevitably a cultural and political entity in the making, Europeans should embrace the great narrative of a utopian project uniting their efforts to work towards a civilisation that is grounded on plurality and openness.
