Anger, Revolution, and Romanticism Andrew M. Stauffer, 2005-08-11

The Romantic age was one of anger and its consequences revolution and reaction terror and war Andrew M Stauffer explores the changing place of anger in the literature and culture of the period as English men and women rethought their relationship to the aggressive passions in the wake of the French Revolution Drawing on diverse fields and discourses such as aesthetics politics medicine and the law and tracing the classical legacy the Romantics inherited Stauffer charts the period's struggle to define the relationship of anger to justice and the creative self In their poetry and prose Romantic authors including Blake Coleridge Godwin Shelley and Byron negotiate the meanings of indignation and rage amidst a clamorous debate over the place of anger in art and in civil society This innovative book has

much to contribute to the understanding of Romantic literature and the cultural history of the emotions Deaf Subjects Brenda Jo Brueggemann, 2009-05-01 In this probing exploration of what it means to be deaf Brenda Brueggemann goes beyond any simple notion of identity politics to explore the very nature of identity itself Looking at a variety of cultural texts she brings her fascination with borders and between places to expose and enrich our understanding of how deafness embodies itself in the world in the visual and in language Taking on the creation of the modern deaf subject Brueggemann ranges from the intersections of gender and deafness in the work of photographers Mary and Frances Allen at the turn of the last century to the state of the field of Deaf Studies at the beginning of our new century She explores the power and potential of American Sign Language wedged as she sees it between letter bound language and visual ways of learning and argues for a rhetorical approach and digital future for ASL literature The narration of deaf lives through writing becomes a pivot around which to imagine how digital media and documentary can be used to convey deaf life stories Finally she expands our notion of diversity within the deaf identity itself takes on the complex relationship between deaf and hearing people and offers compelling illustrations of the intertwined and sometimes knotted nature of individual and collective identities within Deaf culture Crip Authority Elizabeth Bearden, 2025-09-22 Crip Authority explores how Renaissance writers and artists with disabilities drew on consolatory literature to enhance their authority and create a sense of disability community across the centuries Elizabeth B Bearden considers how Renaissance writers and artists understood their lived experiences of disability by drawing on the ancient genre of consolation which aims to comfort people for a variety of hardships including mental and physical disability Renaissance writers used the art of consolation to resignify the mental and physical disabilities that their society frequently scorned into an expression of their military spiritual political and most importantly for this study writerly authority Bearden names this kind of defiant authorial self representation crip authority thereby transgressively crippling our society's ableist notions of who has the ability and authority to write Disabled authors include Francesco Petrarca Teresa de Cartagena Giovanni Paolo Lomazzo Miguel de Cervantes Saavedra Robert Burton and John Milton They all explore their experiences of disability but their work has rarely or never been considered from a disability studies perspective Bearden thus brings today's models of disability studies and crip theory together with early modern articulations of disability based on ancient and Renaissance models of military political biblical and literary authority In sum Crip Authority makes a significant contribution to the growing field of early modern disability studies and invites us to rethink the extent of crip history and the endurance of disability gain Exploring Affect Silvan S. Tomkins, 1995-01-27 Silvan Tomkins was one of the most influential theorists on emotion and emotional expression Over a period of 40 some years until his death in 1991 he developed a set of original important ideas about the nature of affect and its relationship to cognition and personality Tomkins dealt with fundamental questions in a fresh and provocative way establishing affect as a separate biological system and providing compelling data on discrete affect expressions Several years before his death Professor Tomkins agreed to

bring his papers unpublished and published together into Exploring Affect for Cambridge Studies in Emotion and Social Interaction He worked with Paul Ekman and Klaus Scherer to develop a structure for the book that would synthesize his theory of emotion Unfortunately he died before he was able to complete the process Virginia Demos who knew Professor Tomkins well took on the enormous task of compiling the papers and writing connective material for the book This volume of Tomkins selected writings on affect brings together his works of four decades and makes them available at a more receptive time in the field It is a treasure trove of provocative insightful and relevant ideas [God's Word for Our World, Vol. 1](#)

prose and a profound sense of the interconnectedness of all beings. Written during the early to mid 20th century, Stapledon's writings reflect the tumultuous socio-political climate of his time, offering a framework through which to understand the implications of human progress and existential inquiry. Olaf Stapledon (1886-1950), a British author and philosopher, was profoundly influenced by his academic background in philosophy and the sciences, which shaped his innovative approaches to narrative structure and thematic exploration. His experiences during World War I profoundly colored his outlook on humanity's potential and its vulnerabilities, leading him to contemplate the existential dilemmas that echo through his works. Stapledon's unique blend of visionary perspectives and explorations of the human condition mark him as a pivotal figure in the evolution of modern science fiction. I highly recommend this comprehensive collection not only to aficionados of the genre but also to readers seeking a deeper understanding of humanity's place in the universe. Stapledon's thought-provoking narratives serve as a clarion call for introspection about our collective future, urging readers to contemplate both the triumphs and tribulations that lie ahead.

[The Philosophy & Sci-Fi Works of Olaf Stapledon](#) Olaf Stapledon, 2023-11-13. In *The Philosophy Sci-Fi Works of Olaf Stapledon*, readers are invited into a profound exploration of speculative fiction entwined with rich philosophical inquiry. Stapledon's literary style is characterized by expansive narratives that blend imaginative world-building with deep existential questions, often exploring humanity's place in the cosmos. His works, such as *Star Maker* and *Last and First Men*, serve as both captivating science fiction and contemplative essays on the evolution of consciousness and civilization, situating them firmly within the literary canon of the early 20th century, relevant to both futurism and existentialism. Olaf Stapledon was a philosopher and visionary whose academic background significantly shaped his creative endeavors. Influenced by the tumultuous events of his time, including World War I and the subsequent rise of technology, Stapledon sought to depict not only the potential futures of humanity but also the moral responsibilities that accompany such advancements. His blending of philosophy with narrative reflects his belief in the necessity of contemplating not just what it means to be human but also what it means to be part of an evolving universe. For scholars, enthusiasts of speculative fiction, and those intrigued by philosophical discourse alike, this collection is essential reading. It invites contemplation and challenges readers to envision the ethical ramifications of progress. Stapledon's integrative approach not only engages the mind but also compels a re-examination of humanity's trajectory, making this a thought-provoking addition to any literary collection.
