Creative Writing and Art History Catherine Grant, Patricia Rubin, 2012-03-19 Creative Writing and Art History considers the ways in which the writing of art history intersects with creative writing Essays range from the analysis of historical examples of art historical writing that have a creative element to examinations of contemporary modes of creative writing about art Considers the ways in which the writing of art history intersects with creative writing Covers a diverse subject matter from late Neolithic stone circles to the writing of a sentence by Flaubert The collection both contains essays that survey the topic as well as more specialist articles Brings together specialist contributors from both sides of the Atlantic

**The Sun** Trudy E. Bell, 2003-08-01 Presents a scientific and historical account of the sun including an examination of the surface and images of sunspots and gives instructions on how to build a pinhole camera for making safe observations of the sun

**Because the Sun** Sarah Burgoyne, 2021-05-18 Camus s Meursault and Thelma and Louise meet up under the blazing sun Vexed by the unremarkable star that presses Camus s Meursault to commit murder Because the Sun considers the blazing sun as a material symbol of ambient violence violence absorbed like heat and fired at the nearest victim Likewise as a friendship between women confronts gendered aggression in Thelma and Louise the sun becomes the repository of pain the high noon that pushes us through desert after desert Because the Sun s pastiche of voices embodies both stylistic and formal relentlessness by teasing out tonalities that blend and merge into each other generating a blinding effect like looking into the sun Breathless and death defying the poems in Because the Sun are high wire work They sway above us in a blazing light of Burgoyne s making It is so rare that a book of poems is both a tuning fork for our minds as well as a balm for our bodies But that is exactly what happens page after page in this blazing book Michael Dickman author of Days Days This beautiful work wraps Camus s The Stranger in a poetics concerning erasure hope Out of the titular Sun s burning punctum burst telling shards of what is erased by Camus s remarkable construction of whiteness in the masculine the dead Arab the female body s interminable violations but also its warming even blinding capacity for consequential pleasures Gail Scott author of Heroine Sarah Burgoyne begins with the sun and ends with flowers In between is a complicated exploration of what it means to exist within a tradition that is Camus Rimbaud Blake Taking her cue from Sara Ahmed she notices how hard it is to challenge this tradition and yet that it matters to do it anyway Juliana Spahr author of That Winter the Wolf Came

## **Sun, Earth and Sky**

Kenneth R. Lang, 2012-12-06 This book was written for my daughter Julia her love and comfort have helped sustain me It is a pleasure to watch Julia noticing details of every thing around her Children and other curious people perceive worlds that are invisible to most of us Here we describe some of these natural unseen worlds from the hid den heart of the Sun to our transparent air They have been discovered and explored through the space age extension of our senses A mere half century ago astronomers were able to view the cosmos only in visible light Modern technology has now widened the range of our perception to include the invisible realms of subatomic particles magnetic fields radio waves ultraviolet radiation and X rays

They are broadening and sharpening our vision of the Sun and providing a more complete description of the Earth's environment. Thus a marvelous new cosmos is now unfolding and opening up as new instruments give us the eyes to see the invisible and hands to touch what cannot be felt.

**Celestial Navigation in a Teacup** Rodger Farley, 2010-12-05 A celestial navigation book unlike any other including understanding lunar distances. This book is dedicated simply to removing the cloak of mystery to teach the concepts, some interesting history, the techniques and computational methods using the simple pocket scientific calculator. And yes, also how to build your own navigational tools. Included in the appendix are tables and work sheets to do your own sight reduction without computers or calculators. At my web site <http://www.teacupnavigation.net> is free celestial nav software to download. You will enjoy this software.

**The Rise of a Legend** (Guardians of Ga'Hoole) Kathryn Lasky, 2013-07-30 Bestselling author Kathryn Lasky takes flight once more with a brand new Guardians of Ga'Hoole novel. An owlet hatches out onto Stormfast Island and into a world torn by war. For one hundred years his people have fought off enemy owls from the Ice Talons, but the tide has turned. An invasion is coming. One the Kielian League won't have the strength to resist. Soon the tyrant owl Bylyric will rule over everything and no honorable owl will be safe. Only the small owl from Stormfast stands between Bylyric and total victory. Lyze is not very impressive to look at, but he has a wild idea for a snake and owl strike unit that just might give the soldiers of the Kielian League the edge they need. This is his story, the story of an ordinary owl who rose to become Ezylyrb of the Great Tree. This is the story of what it takes to make a Guardian of Ga'Hoole.

*Driving Offences* Sally Cunningham, 2008 This volume examines general driving offences concentrating on those which punish risk taking whilst driving with the primary goal of increasing road safety. Drawing on legal and psychological research, the book explains the legal definition of offences, discussing the policy behind the offences and examines how the law is applied in practice.

**The Power of Political Art** Robert Shulman, 2000 During the 1930s radical young writers, artists and critics associated with the Communist Party animated a cultural dialogue that was one of the most stimulating in American history. With the dawning of the Cold War, however, much of their work fell out.

**Shade** Sam Bloch, 2025-07-22 An extraordinary investigation into shade bringing together science, history, urban design and social justice to change the way we think about a critical natural resource that should be available to all. On a 90 degree day in Los Angeles, bus riders across the city line up behind the shadows cast by street signs and telephone poles looking for a little relief from the sun's glaring heat. Every summer such scenes play out in cities across the United States, and as Sam Bloch argues, we ignore the benefits of shade at our own peril. Heatwaves are now the country's deadliest natural disasters with victims concentrated in poorer, less shady areas. Public health, mental health and crime statistics are worse in neighborhoods without it. For some, finding shade is a matter of life and death. Shade was once a staple of human civilization. In Mesopotamia and Northern Africa, cities were built densely so that courtyards and public passageways were in shadow in the heat of the day, with cool breezes flowing freely. The Greeks famously philosophized in shady agoras. Even today in Spain's sunny Seville

political careers are imperiled when leaders fail to put out the public shades that hang above sidewalks in time for summer heat So what happened in the U S The arrival of air conditioning and the dominance of cars took away the impetus to enshrine shade into our rapidly growing cities Though a few heroic planners engineers and architects developed shady designs for efficiency and comfort the removal of shade trees in favor of wider roads and underinvestment in public spaces created a society where citizens retreat to their own cooled spaces if they can increasingly taxing the energy grid or face dangerous heat outdoors Shade examines the key role that shade plays not only in protecting human health and enhancing urban life but also looks toward the ways that innovative architects city leaders and climate entrepreneurs are looking to revive it to protect vulnerable people and maybe even save the planet Ambitious and far reaching Shade helps us see a crucially important subject in a new light

*Goldin* Michael Cope, 2005-02 When a man meets the gods nothing remains the same *Goldin* is a rich novel in which myth and fairytale are drawn into conversation with urgent ecological and spiritual concerns In a literary feast of tales within tales one man s crisis blurs into the fate of the world A goldsmith called Alan *Goldin* is selected by the gods to help them decide how they should respond to the world s predicament Should they intervene Should they do nothing To be an impartial adviser *Goldin* must sacrifice that which he loves most The spiritual crisis that this provokes brings him into contact with Mataji an ancient woman who has incarnated the goddess many times Mataji s story a narrative of yearning desire sex and bliss which spans 150 years reveals that she and *Goldin* are caught up in the same problem Her gods are Indian rather than Greco Roman but they are equally disturbed by the impact of modernity *Goldin* repeatedly explores the granting and choosing of wishes and desires As one character puts it mortals have built a wish granting machine of fabulous power and can force the poor world to yield up whatever they like But they have not wished well

Constructing Disability after the Great War Evan P. Sullivan, 2024-10-08 As Americans both civilians and veterans worked to determine the meanings of identity for blind veterans of World War I they bound cultural constructs of blindness to all the emotions and contingencies of mobilizing and fighting the war and healing from its traumas Sighted Americans wartime rehabilitation culture centered blind soldiers and veterans in a mix of inspirational stories Veterans worked to become productive members of society even as ableism confined their unique life experiences to a collection of cultural tropes that suggested they were either downcast wrecks of their former selves or were morally superior and relatively flawless as they overcame their disabilities and triumphantly journeyed toward successful citizenship Sullivan investigates the rich lives of blind soldiers and veterans and their families to reveal how they confronted barriers gained an education earned a living and managed their self image while continually exposed to the public s scrutiny of their success and failures

*Autonomous Vehicles and the Law* Hannah Yee Fen Lim, Autonomous vehicles have attracted a great deal of attention in the media however there are some inconsistencies between the perception of autonomous vehicles capabilities and their actual functions This book provides an accessible explanation of how autonomous vehicles function suggesting appropriate

regulatory responses to the existing and emerging technology *Becoming Divine* M. David Litwa,2013-10-30 Some have called it the essence of sin others the depth of salvation Regardless of one s evaluation of it however deification throughout Western history has been a part of human aspiration From the ancient pharaohs to modern transhumanists people have envisioned their own divinity These visionaries include not only history s greatest megalomaniacs but also mystics sages apostles prophets magicians bishops philosophers atheists and monks Some aimed for independent deity others realized their eternal union with God Some anticipated godhood in heaven others walked as gods on earth Some accepted divinity by grace others achieved it by their own will to power There is no single form of deification indeed deification is as manifold as the human conception of God but the many types are united by a set of interlocking themes achieving immortality wielding superhuman power being filled with supernatural knowledge or love and through these means transcending normal human or at least earthly nature

**The Truth About Tennis** Greg Moran,2024-03-28 Recreational players today are bombarded with revolutionary approaches secrets to success and play like the pros techniques all promising to take their game to the next level Award winning teaching professional Greg Moran says No There are no revolutionary approaches or secrets to success and trying to play like the pros is the worst advice a recreational player can be given That s why I had to write this book says Greg The Truth About Tennis is a unique instruction book written specifically for the millions of recreational players around the globe Greg has been playing teaching studying and writing about tennis for over 50 years He s spent more than 100 000 hours on the court helping thousands of players from ages 3 to 93 improve their tennis Quite simply he knows what works and equally important what doesn t The Truth About Tennis will help you cut down on your inner chatter and information overload to reboot your path to improvement It will refocus your attention on the techniques and tactics that will truly make you a more intelligent confident and winning player

**Vumani: A Novel** Nume Mashinini,2025-05-15 It was always the case Vumani Mzondeki verily believed he would not live beyond adolescence He accepted this possibility and made peace with it His age notwithstanding he secretly went to the cemetery to identify his grave As luck would have it or perhaps unluckily so he did not die when he expected to He lived long enough to see adulthood with a solid career as a private school teacher Despite his vocational success Vumani too was once caught up in the tidal currents of his times which made his life read like a script of a horror movie Like his entire generation of black children he lived in the shadow of his painful childhood memories which he concealed well behind his calm exterior

*Derrida, Myth and the Impossibility of Philosophy* Anais Spitzer, 2011-06-02 Philosophy Aesthetics And Cultural Theory Is An Interdisciplinary Series In Continental Philosophy Cultural Theory And The Arts Edited By Hugh J Silverman Stony Brook University New York USA This is a compelling study of the intimate complex and often unexpected aspects of the relationship between philosophy and myth This is an eloquent forceful and altogether timely contribution in a world in which new myths purport to be unquestionable while philosophy bides its time in self absorbed conceptual retreat Its publication marks a new step in deconstructive thinking after which deconstruction will never again be the same This book is a gift precisely in the Derridean sense described within it Its gift is that it is a tour de force The book leads its reader on a profound and clear even if complex exploratory voyage into and out of the maze of Jacques Derrida's web of deconstructive thought While making this trip the book weaves a radical argument against the notion that philosophical logic transcends mythic qualities of understanding It shows compellingly that philosophy's knowledge of truth is inescapably embedded in myth Bombarded by narratives that terrorize and repress we may often consider myth to be constrictive dogma or at best something to be readily disregarded as unphilosophical and irrelevant However such dismissals miss a crucial aspect of myth Harnessing the insights of Jacques Derrida's deconstruction and Mark C Taylor's philosophical reading of complexity theory Derrida Myth and the Impossibility of Philosophy provocatively reframes the pivotal relation of myth to thinking and to philosophy demonstrating that myth's inherent ambiguity engenders vital and inescapable deconstructive propensities Exploring myth's disruptive presence Spitzer shows that philosophy cannot separate itself from myth Instead myth is an inevitable condition of the possibility of philosophy
