A Blind Child's Pathway to Learning Dr. William Cavitt, Dr. Thomas Gwise, 2013-12-13 Our intention in writing this book is to provide three distinct but closely related groups with insight into the factors required to help a blind child attain his her maximum level of cognitive abilities The first group consists of parents who face the day to day reality of helping their blind child deal with the challenges imposed by the lack of sight The second group consists of beginning and future professionals who will find themselves deeply involved with providing social psychological and educational support of these parents The third group includes friends family and others who are not and will not be on the front lines of working with blind children but who are interested in understanding the issues for their own reasons There are many articles and books available that discuss the various aspects of the development of both sighted and blind children from almost every possible perspective related to the factors that impact the learning and developmental processes of children Unfortunately the vast majority of these have been written by professionals to professionals using the jargon of the author's chosen field of study As a result people who are not part of the in groups often find these publications hard to understand boring or both In this book we do not aim to provide any new insights to established professionals or other individuals who are knowledgeable in this area Rather our purpose is to translate the knowledge provided by these professionals into ideas and concepts that can be readily understood and applied by parents teachers and other caregivers of blind children Throughout the book we will be dealing with highly specialized concepts and theories of education psychology and human development We have done our best to translate the professional and academic jargon into what most people would call simple English Throughout the text we have provided our definitions of key terms as we have come to understand and apply

those terms We recognize that others may have different interpretations for the same terms and we do not dispute that their definitions serve their particular purposes

The Blind in Early Childhood and in Age New York Guild for the Jewish Blind,1954

Visual Impairment Heather Mason,Stephen McCall,Christine Arter,Mike McLinden,Juliet Stone,2013-05-24

First published in 1998 This book embodies the positive philosophy that children with a visual impairment are entitled to access to the full national curriculum during their school years In the UK education placements for pupils and students with special needs range across a continuum from special schools and colleges with day or residential attendance to specialist units or individual integration into mainstream provision Placement results from inter disciplinary assessment and consultation and requires parental agreement Lack of sight and measurably impaired vision constitute special needs in educational terms The writers who have contributed to this major text are teachers and lecturers from both the specialist and mainstream areas of provision and have considerable first hand experience in teaching pupils and students with a visual impairment

Language Development and Social Interaction in Blind Children Miguel Perez Pereira,Gina Conti-Ramsden,2019-12-09 The Classic Edition of this foundational text includes a new preface from Miguel P rez Pereira examining how the field has developed since first publication The volume provides an in depth account of blind children s developing communicative abilities with particular emphasis on social cognition and language acquisition from infancy to early school age It provides insights into why the development of blind children may differ from that of sighted children and explores development of theory of mind and perspective taking in language learning It also discusses the caregiver child interaction research on early intervention and practical strategies for blind children that can assist parents and practitioners The up to date preface discusses recent neurological research and the comparison between the psychological development of visually impaired and autistic children Language Development and Social Interaction in Blind Children continues to facilitate dialogue between those interested in the study of typically developing children and those interested in the development of children who are blind and challenges some widely held beliefs about the development of communication in blind children

Foundations of Education: History and theory of teaching children and youths with visual impairments M. Cay Holbrook,Alan J. Koenig,2000

Independent Movement and Travel in Blind Children Joseph Cutter,2007-03-01 The purpose of this book is to contribute to our understanding of Developmental O and M independent movement and travel in blind children Unlike many books and articles on orientation and mobility O M for blind children this one is not about the effect of blindness on movement Such an inquiry is self defeating from the start as it often begins with misconceptions and deficit thinking about blindness and the blind child s early motor development Instead this book is about the effect of movement on development and the importance of movement experiences for the development of independent movement and travel in blind children It has a clear premise blind children must become active movers if they are to become independent travelers
