Blohm & Voss Bv 222 "Wiking" Rudolf Höfling,2012 This book covers the giant six engine World War II Luftwaffe seplane the largest operational aircraft of the war *Secret Projects of the Luftwaffe - Vol 1 - Jet Fighters 1939 -1945* Dan Sharp,2020-09-22 Germany s air ministry was quick to grasp the potential of the jet engine as early as 1938 and by 1939 several German aircraft manufacturers were already working on fighter designs that would utilize this new form of propulsion Rocket engines too were seen as the way of the future and companies were commissioned to design fighters around them As the Second World War began the urgent need to bring these advanced new types into production saw a host of innovative aircraft designs being produced which would eventually result in Messerschmitt s Me 262 jet fighter and the Me 163 rocket propelled interceptor And as the war progressed efforts were increasingly made to find better ways of utilizing jet rocket and latterly ramjet engines in fighter aircraft Aviation companies from across Germany set their finest minds to the task and produced some of the most radical aircraft designs the world had ever seen They proposed rotating wing ramjet fighters arrowhead shaped rammers rocket firing bat winged gun platforms sleek speed machines tailless flying wings tiny mini fighters and a host of others ranging from deadly looking advanced fighters to downright dangerous vertical launch interceptors *Secret Projects of the Luftwaffe Volume 1 Jet Fighters 1939 1945* by Dan Sharp based on original research using German wartime documents offers the most complete and authoritative account yet of these fascinating designs through previously unseen photographs illustrations and period documentation from archives around the world

Air Force. Air Matériel Command,1947 Flying Boats & Seaplanes Stéphane Nicolaou,1998 Beginning with races that were

staged at elegant French resorts in the early part of the century flying boats and seaplanes have played an integral part in aviation history World War I spurred the development of these machines and by the 1930s flying boats and seaplanes had become pioneers in transcontinental flight This photo filled history recalls the role of flying boats and seaplanes in civil and military aviation history and the enthusiasm of the engineers and pilots who are associated with their development In addition to the golden years of hydraviation prior to World War II author Nicolaou examines the decline of the seaplane and its subsequent renaissance in nations that are today considered seaplane paradises The saga is illustrated by more than 200 rare photographs uncovered in archives around the globe *Eagles over the Sea, 1943-45* Lawrence Paterson, 2020-05-30

This is the second volume of Lawrence Paterson's detailed account of all the Luftwaffe's naval operations during World War II The first volume took the story up to 1942 and by the end of that year Hermann Goering's Reich Air Ministry had subsumed nearly every aspect of Wehrmacht maritime aviation Kriegsmarine attempts to develop an independent Fleet Air Arm had been perpetually frustrated reflecting the chaotic nature of the Third Reich's internal military and political mechanics Driven more by vanity than operational prudence the Luftwaffe had continually thwarted the advancement of maritime aviation and by 1942 began to reap the whirlwind it had created The U boat war hung precariously in the balance the lack of well trained and properly equipped aerial reconnaissance suddenly assuming greater importance than ever before During 1943 the nature of Germany's war mutated and by its close the Allies were on the offensive in nearly all theatres This volume resumes the story with Operation Torch in November 1942 when Germany faced an Allied seaborne invasion of North Africa that it was ill equipped to counter by land sea or air and the spectre of even greater invasion armadas loomed on both the southern and western fronts during the months that followed Facing the Russians maritime air units were stripped to the bone those precious few formations available shunted rapidly between military crisis points until barely able to function The rise of Luftwaffe maritime operations described in the author's first volume now became from 1942 onwards a fall of catastrophic proportions as frequently undertrained crews flew increasingly obsolete aircraft against odds that had become overwhelming The Luftwaffe was paying the price for its pre war lack of cohesive strategic planning none more so than its beleaguered maritime specialists The author covers this story across all the theatres of the war and in doing so gives the reader a complete and coherent picture of all the Luftwaffe's naval operations Heavily illustrated throughout this detailed and exciting narrative will be of huge appeal to both naval and aviation historians and enthusiasts **Enemy at the Gates** Justo Miranda, 2019-12-08

When the Nazis started to threaten the world with their efficient machine of propaganda the main concern of European governments was the overwhelming reaction of panic that the expected bombing of the Luftwaffe might cause within the civil population During the Munich Agreement in 1938 the democracies were defended by old biplanes and a bunch of modern fighters 50 Hurricanes 20 Morane 405 and 5 Fokker D XXI France and Great Britain took up the production of USA airplanes and cancelled exports to small countries which were forced to design and build their own PANIC FIGHTERS

with the intelligence and skill that desperation provides When nothing seemed able to contain the German advance France Great Britain and the USSR developed several programs of emergency fighters as did Australia to face the Japanese expansion At the time the course of events switched it was the Axis powers that had to create their own PANIC FIGHTERS some of them suicidal The present book includes several last resource designs of fighters that are practically unknown and that were developed in times of tribulation by Australia Belgium Bulgaria Canada Czechoslovakia Denmark Estonia Finland France Germany Great Britain Hungary Japan Yugoslavia Latvia Netherland Poland Romania Sweden and Switzerland
