**Blondes in Venetian Paintings, the Nine-banded Armadillo, and Other Essays in Biochemistry** Konrad Emil Bloch, 1994 *Blondes in Venetian Paintings, the Nine-banded Armadillo, and Other Essays in Biochemistry* Konrad Bloch, 1994-01-01 In this fascinating book the Nobel Prize winning scientist Konrad Bloch muses on various aspects of biochemistry explaining the chemical basis for many biological phenomena Drawing on his own experiences as well as on colorful anecdotes about the work of other scientists Bloch presents a new way of looking at the world and a revealing glimpse into the ways that scientific discoveries are made and problems are solved Bloch begins with a charming essay on why despite the fact that peroxide had not yet been invented there are so many blonde women in Italian Renaissance paintings He then considers among other topics some important biochemical processes that were discovered because of contamination the importance of trial and error in biochemical research the explanation of lactose intolerance in adults and practices for avoiding it why the choice of animal models is important for medical research and how the author injected himself with extracts of the tubercle bacilli to study the pathology of tuberculosis and why the exotic nine banded armadillo has unique potential for use in many areas of medical and biological investigations He concludes with thoughts on biochemistry s origin and future

Flight from Wonder Albert Rothenberg, 2015 Scientific breakthroughs have had far reaching social and physical effects on modern civilization yet until recently there have been relatively few investigations into the nature of scientific creativity itself Flight from Wonder reports the findings from an empirical study of 42 Nobel laureates in science from the United States and Europe concerning the creative processes that yield scientific innovation To this end Albert Rothenberg designed an interview scheme to delineate the content and sequences of processes that lead scientists to specific creative achievements He conducted interviews with Nobel laureates in the fields of medicine physiology physics and chemistry while carrying out matching interviews with a control group consisting of twelve accomplished engineers on the faculty of a leading engineering university Rothenberg s results demonstrate that the Nobel laureates perform three distinct cognitive creative processes to achieve key formulations and discoveries the detailed nature and structure of these findings were reviewed and corroborated by each of the Nobel laureates To supplement his findings Rothenberg engages with autobiographical accounts and work in progress manuscripts pertaining to the creative discoveries of outstanding scientists of the past including Albert Einstein Charles Darwin Max Planck Neils Bohr Hideki Yukawa and James Watson The book will interest students and general science readers fascinated by the development of scientific inquiry and innovation

**Biochemical Terminology** Antony Mackinlay, 2022-10-26 Languages are like organisms they do not appear by spontaneous creation they evolve and so it is with the particular terminology of biochemistry which as I document here largely derives from Latin and Ancient Greek root words In the early part of the 19th century when chemistry had shaken off the shackles of alchemy new elements new compounds new techniques were discovered that needed names It was the

classical languages Greek and Latin to which these early scientists turned As chemical approaches were applied to biology much molecular terminology has also derived from these languages In this book the common technical terms encountered in biochemistry and related subjects are defined and their derivation from root words in Latin and Ancient Greek explained
