Blood And Belief Family Survival And Confessional Identity Among The Provincial Huguenot Nobility:

Society and Culture in the Huguenot World, 1559-1685 Raymond A. Mentzer, Andrew Spicer, 2002-01-10 The Huguenots formed a privileged minority within early modern France During the second half of the sixteenth century they fought for freedom of worship in the French wars of religion which culminated in the Edict of Nantes in 1598 The community was protected by the terms of the Edict for eighty seven years until Louis XIV revoked it in 1685 The Huguenots therefore constitute a minority group tolerated by one of the strongest nations in early modern Europe a country more often associated with the absolute power of the crown in particular that of Louis XIV This collection of essays explores the character and identity of the Huguenot movement by examining their culture and institutions their patterns of belief and worship and their interaction with French state and society The volume draws upon research by leading historians and specialists from across Europe and North America

A Companion to the Huguenots Raymond A. Mentzer, Bertrand Van Ruymbeke, 2016-02-02 The Huguenots are among the best known of early modern European religious minorities Their suffering in 16th and 17th century France is a familiar story The flight of many Huguenots from the kingdom after 1685 conferred upon them a preeminent place in the accounts of forced religious migrations Their history has become synonymous with repression and intolerance At the same time Huguenot accomplishments in France and the lands to which they fled have long been celebrated They are distinguished by their theological formulations political thought and artistic achievements This volume offers an encompassing portrait of the Huguenot past investigates the principal lines of historical development and suggests the interpretative frameworks that scholars have advanced for appreciating the Huguenot experience

Class and State in Ancien Regime France David Parker, 2002-11 David Parker's challenging interpretation presents a broad in depth study of the economic social ideological and political foundations of French Absolutism This stimulating reassessment runs contrary to much revisionist historiography

Representing France and the French in Early Modern English Drama

Jean-Christophe Mayer, 2008 This wide ranging collection of essays written by leading specialists furnishes previously unpublished evidence of France's role and importance in the early modern English literary and dramatic fields Its chapter length introduction offers an up to date critical presentation of the issues involved representation cultural identity the construction of otherness Frenchness and the social and cultural dynamics of theater The essays in the five sections of the book continue the debate with a series of in depth studies touching on important critical themes such as intertextuality old and new historicisms language semiotics and nationhood imagined geographies and stereotypes and social satire The book will appeal to students and specialists of Renaissance literature to scholars working on the construction of national identity and will be required reading for anyone interested in cultural exchange or comparative literature Jean Christophe Mayer is a senior research fellow at the French National Center for Scientific Research

The Tactics of Toleration Jesse

Spohnholz, 2010-12-28 The Tactics of Toleration examines the preconditions and limits of toleration during an age in which

Europe was sharply divided along religious lines During the Age of Religious Wars refugee communities in borderland towns like the Rhineland city of Wesel were remarkably religiously diverse and culturally heterogeneous places Examining religious life from the perspective of Calvinists Lutherans Mennonites and Catholics this book examines how residents dealt with pluralism during an age of deep religious conflict and intolerance Based on sources that range from theological treatises to financial records and from marriage registries to testimonies before secular and ecclesiastical courts this project offers new insights into the strategies that ordinary people developed for managing religious pluralism during the Age of Religious Wars Historians have tended to emphasize the ways in which people of different faiths created and reinforced religious differences in the generations after the Reformation s break up of Christianity usually in terms of long term historical narratives associated with modernization including state building confessionalization and the subsequent rise of religious toleration after a century of religious wars In contrast Jesse Spohnholz demonstrates that although this was a time when Christians were engaged in a series of brutal religious wars against one another many were also learning more immediate and short term strategies to live alongside one another This book considers these tactics for toleration from the vantage point of religious immigrants and their hosts who learned to coexist despite differences in language culture and religion It demands that scholars reconsider toleration not only as an intellectual construct that emerged out of the Enlightenment but also as a dynamic set of short term and often informal negotiations between ordinary people regulating the limits of acceptable and unacceptable behavior Published by University of Delaware Press Distributed worldwide by Rutgers University Press

The Oxford Handbook of the Protestant Reformations Ulinka Rublack, 2017 This Handbook takes a broad overview of the Protestant Reformations seeing them as movements which stretched far beyond their European beginnings Written by a team of international scholars of history and theology the contributions offer up to date perspectives on Reformation ideas and the lasting historical impact of Protestantism

The Crypto-Jewish Mashhadis Hilda Nissimi, 2006-12-01 This book tells the little known story of a fascinating crypto Jewish community through two centuries and three continents Beginning as a precarious settlement of a few families in mid 18th century Mashhad an Islamic holy city in northern Iran the community grew into a closely knit group in response to their forced conversion to Islam in 1839 Muslim hostility and a culture of memory sustained by intra communal marriages reinforced their separate religious identity vesting it in strong family and communal loyalty Mashhadi women became the main agents of the cultural transmission of communal identity and achieved social roles and high status uncharacteristic for contemporary Jewish and Muslim communities The Mashhadis maintained a double identity upholding Islam in public while tenaciously holding onto their Jewish identity in secret The exodus from Mashhad after 1946 relocated the communal center to Tehran later to Israel and after the Khomeini revolution to New York The relationship between the formation and retention of communal identity and memory practices with interconnected issues of religion and gender draws upon existing research on other crypto faith communities such as the Judeoconversos the Moriscos and the

French Protestants who through the special blend of memory faith and ethnicity emerged strengthened from their underground period For the immigration period the author challenges the old paradigm that modernity and religion are mutually exclusive The book also explores the sometimes uncomfortable yet intimate relationships that exist between seemingly incompatible ways of seeing the past both secular and religious

Social Control in Europe Herman Roodenburg, 2004 This two volume collection of essays provides a comprehensive examination of the idea of social control in the history of Europe The uniqueness of these volumes lies in two main areas First the contributors compare methods of social control on many levels from police to shaming church to guilds Second they look at these formal and informal institutions as two way processes Unlike many studies of social control in the past the scholars here examine how individuals and groups that are being controlled necessarily participate in and shape the manner in which they are regulated Hardly passive victims of discipline and control these folks instead claimed agency in that process accepting and resisting and thus molding the controls under which they functioned In both volumes an introduction outlines the origins and the continuing value of the concept of social control The introductions are followed by two substantive sections The essays in part one of volume I focus on the interplay of ecclesiastical institutions and the emerging states those in part two of volume I look more explicitly at discipline from a bottom up perspective The essays in part one of volume 2 explore the various means by which communities generally working class communities in nineteenth and twentieth century Europe were subjected to forms of discipline in the workplace by the church and by philanthropic housing organizations It notes also how the communities themselves generated their own forms of internal control Part two of volume 2 focuses on various policing institutions exploring in particular the question of how liberal and totalitarian regimes differed in their styles of control repression and surveillance

Reformation Christianity Peter Matheson, 2010-03-01 Perhaps no period in Christian history experienced such social tumult and upheaval as the Reformation as it quickly became apparent that social and political issues finding deep resonance with the common people were deeply entwined with religious ones raised by the Reformers Led by eminent Reformation historian Peter Matheson this volume of A People s History of Christianity explores such topics as child bearing a good death rural and village piety and more Includes 50 illustrations maps and an 8 page color gallery

After the Black Death, Second Edition George Huppert, 1998-05-22 Praise for the first edition To give a sense of immediacy and vividness to the long period in such a short space is a major achievement History Huppert s book is a little masterpiece every teacher should welcome Renaissance Quarterly A work of genuine social history After the Black Death leads the reader into the real villages and cities of European society For this second edition George Huppert has added a new chapter on the incessant warfare of the age and thoroughly updated the bibliographical essay

Social Control in Europe: 1500-1800 Herman Roodenburg, 2004 This first volume of a two volume collection of essays provides a comprehensive examination of the idea of social control in the history of Europe The uniqueness of these volumes lies in two main areas First the contributors compare

methods of social control on many levels from police to shaming church to guilds Second they look at these formal and informal institutions as two way processes Unlike many studies of social control in the past the scholars here examine how individuals and groups that are being controlled necessarily participate in and shape the manner in which they are regulated Hardly passive victims of discipline and control these folks instead claimed agency in that process accepting and resisting and thus molding the controls under which they functioned The essays in this volume focus on the interplay of ecclesiastical institutions and the emerging states examining discipline from a bottom up perspective Book jacket Defining Community in Early Modern Europe Michael J. Halvorson, 2016-12-05 Numerous historical studies use the term community to express or comment on social relationships within geographic religious political social or literary settings yet this volume is the first systematic attempt to collect together important examples of this varied work in order to draw comparisons and conclusions about the definition of community across early modern Europe Offering a variety of historical and theoretical approaches the sixteen original essays in this collection survey major regions of Western Europe including France Geneva the German Lands Italy and the Spanish Empire the Netherlands England and Scotland Complementing the regional diversity is a broad spectrum of religious confessions Roman Catholic communities in France Italy and Germany Reformed churches in France Geneva and Scotland Lutheran communities in Germany Mennonites in Germany and the Netherlands English Anglicans Jews in Germany Italy and the Netherlands and Muslim converts returning to Christian England This volume illuminates the variety of ways in which communities were defined and operated across early modern Europe as imposed by community leaders or negotiated across society as defined by belief behavior and memory as marked by rigid boundaries and conflict or by flexibility and change as shaped by art ritual charity or devotional practices and as characterized by the contending or overlapping boundaries of family religion and politics Taken together these chapters demonstrate the complex and changeable nature of community in an era more often characterized as a time of stark certainties and inflexibility As a result the volume contributes a vital resource to the ongoing efforts of scholars to understand the creation and perpetuation of communities and the significance of community definition for early modern Europeans **Humanities**, 1995

Humanities National Endowment for the Humanities, 1995 *Shakespeare in French Theory* Richard Wilson, 2014-02-25 At a time when the relevance of literary theory itself is frequently being questioned Richard Wilson makes a compelling case for French Theory in Shakespeare Studies Written in two parts the first half looks at how French theorists such as Bourdieu Cixous Deleuze Derrida and Foucault were themselves shaped by reading Shakespeare while the second part applies their theories to the plays highlighting the importance of both for current debates about borders terrorism toleration and a multi cultural Europe Contrasting French and Anglo Saxon attitudes Wilson shows how in France Shakespeare has been seen not as a man for the monarchy but a man of the mob French Theory thus helps us understand why Shakespeare's plays swing between violence and hope Highlighting the recent religious turn in theory Wilson encourages

a reading of plays like Hamlet Julius Caesar A Midsummer Night s Dream and Twelfth Night as models for a future peace
Examining both the violent history and promising future of the plays Shakespeare in French Theory is a timely reminder of the relevance of Shakespeare and the lasting value of French thinking for the democracy to come *Urban Patronage in Early Modern England* Catherine F. Patterson,1999 This study of politics in early modern England uses the relations between provincial towns the landed elite and the crown to argue that the growth of personal connections and patronage as much as of conflict explains the development of early modern government It shows how patronage was a vital tool that suited both local needs and the royal will *Seeing Beyond the Word* Finney,1999-05-12 This collection of essays seeks to redefine the discussion of Calvinism s impact on the visual arts through an exploration of Reformed artistic influences in England France Switzerland Germany Hungary the Netherlands and America 200 illustrations many in color Montesquieu's Liberalism and the Problem of Universal Politics Keegan Callanan,2018-08-23 Montesquieu s liberalism and critique of universalism in politics often thought to stand in tension comprise a coherent philosophical and political project Noble Power in Scotland from the Reformation to the Revolution Keith M Brown,2013-05-21 Analyses the relations between nobility crown and state first in Scotland and then in the first courts of the unified kingdoms **Pamphlets & Public Opinion** Kenneth Margerison,1998 This work examines how in the months leading up to the French Revolution both the royal government and its opposition relied heavily upon pamphlets to sway public opinion and how the number of published pamphlets reached truly astounding proportions in late 1788 and early 1789
