Structure, Function, and Regulation of Molecules Involved in Leukocyte Adhesion Peter E. Lipsky, Robert Rothlein, Takashi K. Kishimoto, Ronald B. Faanes, C. Wayne Smith, 2012-12-06 Leukocyte adhesion molecules have been the subject of intense basic and preclinical research Results from clinical trials obtained so far with antibodies directed towards these surface proteins offer promise for the prevention of graft rejection and effective treatment of acute and chronic inflammatory disease This volume presents a comprehensive review of contemporary research on the structure function and regulation of leukocyte adhesion molecules and their ligands from the molecular to the clinical level The blend of basic science and clinical applications presented in Structure Function and Regulation of Molecules Involved in Leukocyte Adhesion provides clear evidence of the biological importance of cell cell interactions and the many potential clinical dividends afforded by understanding the molecular basis of cell adhesion It will appeal to a broad range of readers in immunology and cell biology **Cardiac-Vascular Remodeling and Functional Interaction** Yukio Maruyama, Masatsugu Hori, Joseph S. Janicki, 2013-04-17 Cardiac performance is regulated not only by cardiac muscle properties but also by several other factors including those associated with the neurohumoral system and the mechanical characteristics of the peripheral circulation New information concerning these regulatory factors has furthered our understanding of the pathophysiology of cardiac dysfunction However controversy remains along with a need to integrate these multidisciplinary findings It was with this in mind together with my continuing interest in the response of the normal and diseased heart to variations in loading conditions that the satellite symposium entitled Interactions Between Cardiac Function and Vascular Dynamics was organized and dedicated to my mentor Dr T Takishima The symposium was held in Fukushima Japan in 1992 following the Tenth International Conference of the Cardiovascular Systems Dynamics Society in Kobe Japan which was organized by the then president of the society Dr Masatsugu Hori The Fukushima symposium and the Kobe conference were stimulating and informative To commemorate these events Dr Hori Dr Janicki and I decided to publish this book It covers topics that were presented then as well as pertinent new material As a result the book includes not only updated reviews but also up to date findings that were not considered at the two scientific sessions The high level attained in this book is due to the outstanding contributions from internationally renowned scientists This final product of their efforts should prove to be a valuable source of information to the reader **Metabolic Activities of the Lung** Ruth Porter, Julie Whelan, 2009-09-14 The Novartis
