Bloody Revenge Emotions Nationalism And War:

Bloody Revenge Thomas J. Scheff, 2019-03-11 As violence erupts in endless cycles and old grievances reemerge throughout the world we are challenged to examine the underpinnings of protracted conflict In this bold new work Thomas Scheff argues that the roots of protracted conflict lie in unacknowledged feelings of shame and rage Scheff builds from the assumption that the social bond is a real and palpable phenomena and that in every type of human contact the bond is either built maintained repaired or damaged He then demonstrates how damaged bonds are the basic cause of conflict When one side or the other in a dispute is humiliated or threatened in such a way as to disturb fundamental bonds the feelings that follow are often not acknowledged Threats to the social bond give rise to violent emotions shame and rage Unless these feelings are resolved the stage is then set for cycles of insult humiliation and bloody revenge According to Scheff it is by recognizing the emotional source of conflict and repairing the broken social bond that both sides achieve cognitive and emotional understanding allowing them to trust and cooperate and perceive themselves as all in the same boat Thus secure social bonds ensure clear boundaries even during competition or conflict that help keep wars limited and make disagreements productive

Emotions in American History Jessica C. E. Gienow-Hecht, 2010 The study of emotions has attracted anew the interest of scholars in various disciplines igniting a lively public debate on the constructive and destructive power of emotions in society as well as within each of us Most of the contributors to this volume do not hail from the United States but look at the nation from abroad They explore the role of emotions in history and ask how that exploration changes what we know about national and international history and in turn how that affects the methodological study of history In particular they focus on emotions in American history between the 18th century and the present in war in social and political discourse as well as in art and the media In addition to case studies the volume includes a review of their

fields by senior scholars who offer new insights regarding future research projects *Causes of War* Thomas Lindemann, 2024-08-22 Theories on the origins of war are often based on the premise that the rational actor is in pursuit of material satisfaction such as the quest for power or for wealth These perspectives disregard the need for homo symbolicus the preservation of a positive self image for both emotional and instrumental reasons A good reputation ensures authority and material resources Non recognition can be as much as an explanation of war as that of other explicative variables Two empirical studies examining the role of non recognition in great power conflicts and in international crises will demonstrate the value of this symbolic approach Emotions, the Social Bond, and Human Reality Thomas J. Scheff, 1997-09-04 This book first published in 1997 offers an approach to researching human behavior relating details of interaction to social structure **Escalation and Negotiation in International Conflicts** I. William Zartman, Guy Faure, Guy Olivier Faure, 2005-12-08 This volume examines the point where the concepts and practices of escalation and negotiation meet *The Rise and Fall of Comradeship* Thomas Kühne, 2017-02-09 This book reveals how ideas of comradeship shaped the actions and mindsets of ordinary German soldiers across the twentieth century *Teaching Political Sociology* William Outhwaite, Larry Ray, 2023-10-06 Drawing on the diverse experience of a team of internationally recognised specialists Teaching Political Sociology provides educators with a concise and accessible guide to the main topic areas likely to form part of term semester or year long courses in political sociology **The New European Criminology** Vincenzo Ruggiero, Nigel South, Ian Taylor, 2002-09-11 The New European Criminology gathers together leading criminologists from all over Europe to consider crime and responses to crime within and across national borders For the first time it allows students to experience the most exciting work in European criminology and to compare approaches to crime in different parts of Europe The five sections of the book look at the effects of European harmonisation on crime criminal justice law enforcement and penal reform organised crime from the Mafia in Italy to drug running in the Balkans local crime in international contexts possible future directions for criminology and some suggestions for a new criminology of war **Emotions in Psychopathology** William F. Flack, James D. Laird, 1998 In recent years there has been a groundswell of significant and exciting new work being done in research on emotions and psychopathology This new volume in the Series in Affective Science examines the relationship between emotions and psychopathology by bringing together current theory and research and the perspectives of leading figures in the field Each part addresses general issues in the field and contains reports of research focused on emotions in specific psychological disorders such as schizophrenia depression anxiety disorders and personality disorders Chapters written by outstanding figures from a number of professional disciplines including psychiatry psychology and cognitive science represent the diversity of informed opinion and methods of investigation in research on emotion and psychopathology **Goffman Unbound!** Thomas J. Scheff, Bernard S Phillips, Harold Kincaid, 2015-11-17 Thomas Scheff demonstrates why Goffman remains such a key figure for social scientists Goffman may have been cautious

about recognizing the role of emotions in social life but Scheff boldly and creatively shows why the sociological and the psychological are necessarily intertwined This is certainly a book for all serious analysts of social behaviour Michael Billig Nottingham University Scheff's critical eye is equal to his subject shrewdly appreciating Goffman's many virtues while also showing where and how Goffman's thinking needs revision and development This original and provocative book offers a fresh interpretation of Goffman and will become a benchmark for all subsequent commentary Greg Smith University of Salford One of the seminal sociologists of the twentieth century Erving Goffman revolutionized our understanding of the microworld of emotions and relationships We all live in this world every day of our lives yet it is virtually invisible to us Goffman's genius was to recognize and describe this world as no one had before The book synthesizes prior scholarly commentary on Goffman's work and includes biographical material from his life untangling some of the many puzzles in Goffman's work and life Scheff also proposes ways of filling gaps and false starts One chapter explores the meaning of the emotion of love another of hatred These and other new directions could facilitate the creation of a microsocial science that unveils the emotional relational world

The Risorgimento Revisited S. Patriarca, L. Riall, 2011-12-16 Bringing together the work of a ground breaking group of scholars working on the Italian Risorgimento to consider how modern Italian national identity was first conceived and constructed politically the book makes a timely contribution to current discussions about the role of patriotism and the nature of nationalism in present day Italy

Emotional Choices Robin Markwica, 2018 This book examines coercive diplomacy and presents a theory of emotional choice to analyse how affect enters into decision making

Understanding Terrorism Bernard S Phillips, 2015-12-03 Two fundamental problems within the social sciences are the failure to integrate the existing segments of knowledge and a very limited ability to point out directions for solving social problems given that lack of integrated knowledge This volume illustrates the integrated work of seven sociologists to reverse this situation not only for the problem of terrorism but also for any substantive or applied problem C Wright Mills in *The Sociological Imagination* castigated the failure to integrate social science knowledge and this volume carries forward his efforts to analyze human complexity To understand and confront terrorism we require not only the integration of social science knowledge bearing on that problem as illustrated by these authors We also require the integration of that knowledge with the understanding of those on the front lines in order to connect the dots of specialized basic and applied knowledge which this volume makes possible
