Blowing On The Wind The Nuclear Test Ban Debate 1954 196:

Democracy and Diplomacy Melvin Small, 1996 The book gives particular attention to the events of the twentieth century when the United States became a major power and then a superpower **Blowing on the Wind** Robert A. Divine, 1978 Using contemporary sources and formerly inaccessible Eisenhower papers it studies the dominant event of the 50s the development of the H bomb by both the United States and Russia Disrupting Science Kelly Moore, 2013-12-15 Drawing extensively from archival sources and in depth interviews Kelly Moore examines the features of American science that made it an attractive target for protesters in the early cold war and Vietnam eras including scientists work in military research and activities perceived as environmentally harmful She describes the intellectual traditions that protesters drew from liberalism moral individualism and the New Left and traces the rise and influence of scientist led protest organizations such as Science for the People and the Union of Concerned Scientists Moore shows how scientist protest activities disrupted basic assumptions about science and the ways scientific knowledge should be produced and recast scientists relationships to political and military institutions Jacket At Work in the Atomic City Russell B. Olwell, 2004 Founded during World War II Oak Ridge Tennessee was a vital link in the U S military s atomic bomb assembly line the site where scientists worked at a breakneck pace to turn tons of uranium into a few grams of the artificial element plutonium To construct and operate the plants needed for this effort thousands of workers both skilled and unskilled converged on the city behind a fence tucked between two ridges of sparsely populated farmland in the Tennessee hills At Work in the Atomic City explores the world of those workers and their efforts to form unions create a community and gain political rights over their city It follows them from their arrival at Oak Ridge to the places where they lived and to their experiences in a dangerous and secretive workplace Lured by promises of housing plentiful work and schooling for their children they were often exposed to dangerous levels of radioactivity harmful chemicals and other hazards Although scientists and doctors intended to protect workers the pressure to produce materials for the bomb often overrode safety considerations After the war as the military sought to reduce services and jobs in Oak Ridge workers organized unions at two plants to demand higher wages and job security However the new Taft Hartley Act limited defense workers ability to strike and thus curbed union influence The book examines the ongoing debates over workers rights at Oak Ridge notably the controversy surrounding the new federal program intended to compensate workers and their families for injuries sustained on the job Because of faulty record keeping at the facilities and confusion over exposure levels many have been denied payment to this day Drawing on extensive research into oral history collections transcripts of government proceedings and other primary sources At Work in the Atomic City is the first detailed account of the workers who built and labored in the facilities that helped ensure the success of the Manhattan Project a story known heretofore only in broad outline Russell Olwell an assistant professor of history at Eastern Michigan University has published articles in ISIS Tennessee Historical Quarterly and Technology and Culture **Faith and**

Peace and Freedom Simon Hall, 2011-06-07 Two great social causes held center stage in American politics in the 1960s the civil rights movement and the antiwar groundswell in the face of a deepening American military commitment in Vietnam In *Peace and Freedom* Simon Hall explores two linked themes the civil rights movement s response to the war in Vietnam on the one hand and on the other the relationship between the black groups that opposed the war and the mainstream peace movement Based on comprehensive archival research the book weaves together local and national stories to offer an illuminating and judicious chronicle of these movements demonstrating how their increasingly radicalized components both found common cause and provoked mutual antipathies *Peace and Freedom* shows how and why the civil rights movement responded to the war in differing ways explaining black militants hostility toward the war while also providing a sympathetic treatment of those organizations and leaders reluctant to take a stand And while Black Power counterculturalism and left wing factionalism all made interracial coalition building more difficult the book argues that it was the peace movement s reluctance to link the struggle to end the war with the fight against racism at home that ultimately prevented the two movements from cooperating more fully Considering the historical relationship between the civil rights movement and foreign policy Hall also offers an in depth look at the history of black America s links with the American left and with pacifism With its keen insights into one of the most controversial decades in American history *Peace and Freedom* recaptures the immediacy and importance of the time *March to Armageddon* Ronald E. Powaski, 1987-06-18 Ronald E

Powaski offers the first complete accessible history of the events forces and factors that have brought the world to the brink of a nuclear holocaust He traces the evolution of the nuclear arms race from FDR s decision to develop an atomic bomb to Reagan s decision to continue its expansion in the 1980 s Focusing on the forces that have propelled the arms race and the reasons behind the repeated failures to check the proliferation of nuclear weapons Powaski discusses such topics as the

Manhattan Project the decision to drop the bomb on Hiroshima the debate over whether to share atomic information the effect of nuclear weapons on U S military and foreign policy and the role of these weapons in arms control negotiations in the last five presidential administrations By the Bomb's Early Light Paul Boyer,2005-10-21 Originally published in 1985 By the Bomb's Early Light is the first book to explore the cultural fallout in America during the early years of the atomic age Paul Boyer argues that the major aspects of the long running debates about nuclear armament and disarmament developed and took shape soon after the bombing of Hiroshima The book is based on a wide range of sources including cartoons opinion polls radio programs movies literature song lyrics slang and interviews with leading opinion makers of the time Through these materials Boyer shows the surprising and profoundly disturbing ways in which the bomb quickly and totally penetrated the fabric of American life from the chillingly prophetic forecasts of observers like Lewis Mumford to the Hollywood starlet who launched her career as the anatomic bomb In a new preface Boyer discusses recent changes in nuclear politics and attitudes toward the nuclear age **The United States and the Second World War** G. Kurt Piehler,Sidney Pash,2010 In this text Piehler and Pash bring together a collection of essays offering an examination of American participation in the Second World War including a long overdue reconsideration of such seminal topics as the forces leading the US to enter World War II the role of the American military in the Allied victory and more *Total Cold War* Kenneth Alan Osgood,2006 Osgood focuses on major campaigns such as Atoms for Peace People to People and cultural exchange programs Drawing on recently declassified documents that record U S psychological operations in some three dozen countries he tells how U S propaganda agencies presented everyday life in America to the world its citizens living full happy lives in a classless society where economic bounty was shared by all Osgood further investigates the ways in which superpower disarmament negotiations were used as propaganda maneuvers in the battle for international public opinion He also reexamines the early years of the space race focusing especially on the challenge to American propagandists posed by the Soviet launch of Sputnik

The Nuclear Oracles Richard Terry Sylves,1987 Evolution of Nuclear Strategy Lawrence Freedman,2016-01-03

Kennedy, Macmillan and the Cold War N. Ashton,2002-09-18 Nigel J Ashton analyses Anglo American relations during a crucial phase of the Cold War He argues that although policy makers on both sides of the Atlantic used the term interdependence to describe their relationship this concept had different meanings in London and Washington The Kennedy Administration sought more centralized control of the Western alliance whereas the Macmillan Government envisaged an Anglo American partnership This gap in perception gave rise to a crisis of interdependence during the winter of 1962 3 encompassing issues as diverse as the collapse of the British EEC application the civil war in the Yemen the denouement of the Congo crisis and the fate of the British independent nuclear deterrent **A Biography of George F. Kennan** Michael Polley,1990 Following fifty years of the life and times of a diplomat this volume highlights the background early training and major events in the career of the author of the containment policy that guided American diplomacy from 1947 to 1972

Nuclear America, a Historical Bibliography ABC-Clio Information Services,1984 *Counsels of War* Gregg Herken,1985

Gregg Herken writes about the people whose profession it has been to think about the unthinkable Robert McNamara Paul Nitze Herman Kahn Bernard Brodie including their intense rivalries personal animosities and often contentious relationship with the professional military He reveals how the influence of the scientist and strategist has extended well beyond the laboratory and the classroom in the proposal of Kennedy s advisers for a nuclear demonstration and even a clever first strike against the Russians for example *Counsels of War* also shatters certain popular assumptions about U S nuclear policy As Herken points out while American doctrine stresses retaliation U S strategists have always planned to pre empt a Soviet attack
