## **Blue Collar Women:**

**Bitter Choices** Ellen Israel Rosen, 1990-03-23 Ellen Israel Rosen presents a compelling portrait of married women who work on New England's assembly lines while they also maintain their homes and marriages. With skill and sympathy she documents the reasons these women work, their experiences on the job, in the union and at home, the sources of their job satisfaction and their management of the double day. The major issue for this segment of the labor force, Rosen suggests, is not whether to work but the availability and quality of jobs. Rosen argues that deindustrialization, plant closings and job displacement confronts blue collar women, factory workers with a bitter choice between work at lower and lower wages or no work at all. Drawing on quantitative and qualitative data from interviews with more than two hundred such women, factory workers, Rosen traces the ways in which women who do unskilled factory work have gained in self-esteem as well as financial stability from holding paid jobs. Throughout, Rosen explores the relationship between public work experiences and private family life. She analyzes the dynamics of two paycheck working class families, clarifies relationships between class and gender and explores the impact of patriarchy and capitalism on working class women. At the same time, Rosen places women's job loss within the broader economic context of global industrial transformations, demonstrating how international capital shifts to cheaper labor in developing countries as well as technological progress are changing the shape of the entire American labor force and are beginning to undermine the material and symbolic gains of the American female factory worker, the promise of market equality and progressive working conditions. This book is a significant contribution to our understanding of women's work and family lives but it is also a valuable look at the consequences of deindustrialization in America for workers, their families and their communities. **Women and Work** Sonia Carreon, Amy Cassedy, Kathryn Borman, Paula J. Dubeck, 2013-11-26 Focuses on vital contemporary issues. Women in the work force today are still subjected to the glass ceiling, sexual discrimination, income inequality, stereotyping and other obstacles to equal employment and professional advancement. Now a collection of 150 original articles written for this handbook explores the challenges and career blocks that today's women face in the workplace, discuss important contemporary issues and offers a wide range of facts and data on women's employment. Offers insights and information. The Handbook answers hundreds of questions as it illuminates current achievements and obstacles to success for women in the marketplace. Drawing upon a growing body of research in the social and behavioral sciences, the articles provide insights into such issues as the sex segregation of occupations, comparable worth, women in traditionally male occupations, career plans of college women, gender bias in job evaluations and personnel decisions, sexual harassment, the gendered culture of

organizations the effects of maternal employment on children and child care and more The articles draw on extensive research and studies on women in the workplace across the U S and around the world A valuable research aid This handbook presents the reader with a broadly based understanding of women s work experiences and provides a useful set of sources for in depth research It is a valuable reference for professors librarians researchers guidance counselors and students who need reliable up to date information The handbook includes a subject and name index Ebony ,1996-05 EBONY is the flagship magazine of Johnson Publishing Founded in 1945 by John H Johnson it still maintains the highest global circulation of any African American focused magazine **Women & Work** , Women in Action ,1978 An information summary for Federal Women s Program **Sex Discrimination and Sex Stereotyping in Vocational Education** United States. Browne,2002-06-06 Does biology help explain why women on average earn less money than men Is there any evolutionary basis for the scarcity of female CEOs in Fortune 500 companies According to Kingsley Browne the answer may be yes Biology at Work brings an evolutionary perspective to bear on issues of women in the workplace the glass ceiling the gender gap in pay sexual harassment and occupational segregation While acknowledging the role of discrimination and sexist socialization Browne suggests that until we factor real biological differences between men and women into the equation the explanation remains incomplete Browne looks at behavioral differences between men and women as products of different evolutionary pressures facing them throughout human history Womens biological investment in their offspring has led them to be on average more nurturing and risk averse and to value relationships over competition Men have been biologically rewarded over human history for displays of strength and skill risk taking and status acquisition These behavioral differences have numerous workplace consequences Not surprisingly sex differences in the drive for status lead to sex differences in the achievement of status Browne argues that decision makers should recognize that policies based on the assumption of a single androgynous human nature are unlikely to be successful Simply removing barriers to inequality will not achieve equality as women and men typically value different things in the workplace and will make different workplace choices based on their different preferences Rather than simply putting forward the nature side of the debate Browne suggests that dichotomies such as nature nurture have impeded our understanding of the origins of human behavior Through evolutionary biology we can understand not only how natural selection has created predispositions toward certain types of

behavior but also how the social environment interacts with these predispositions to produce observed behavioral patterns

**Unbending Gender** Joan Williams, 2001-09-13 In *Unbending Gender* Joan Williams takes a hard look at the state of feminism in America Concerned by what she finds young women who flatly refuse to identify themselves as feminists and working class and minority women who feel the movement hasn't addressed the issues that dominate their daily lives she outlines a new vision of feminism that calls for workplaces focused on the needs of families and in divorce cases recognition of the value of family work and its impact on women's earning power Williams shows that workplaces are designed around men's bodies and life patterns in ways that discriminate against women and that the work family system that results is terrible for men worse for women and worst of all for children She proposes a set of practical policies and legal initiatives to reorganize the two realms of work in employment and households so that men and women can lead healthier and more productive personal and work lives Williams introduces a new reconstructive feminism that places class race and gender conflicts among women at center stage Her solution is an inclusive family friendly feminism that supports both mothers and fathers as caregivers and as workers Handbook on Women Workers United States.
