Islamic world and commercial and aesthetic pressures during the colonial period of European expansion From the sixteenth century onwards passion for collecting became a major influence on the concept of chinoiserie Finally John Carswell shows how the combined efforts of scholars collectors and archaeologists have illuminated how why and when blue and white developed and has made such a major impact on world civilization The stunning illustrations are from museums and private collections around the world and include some never before published The book also includes a very special unpublished material from a mysterious fourteenth century shipwreck in the Red Sea Seen by only a handful of experts the findings from this shipwreck are very important for art history and are published here for the first time Full details with line drawings and complete mini catalogue of this material are given in the book

**Forts and Fortification in Wallacea** Sue O'Connor,Andrew McWilliam,Sally Brockwell,2020-09-07 This volume presents ground breaking research on fortified sites in three parts of Wallacea by a highly regarded group of scholars from Australia Europe Southeast Asia and the United States In addition to surveying and dating defensive sites in often remote and difficult terrain the chapters provide an important and scholarly set of archaeological and ethnohistoric studies that investigate the origin of forts in Wallacea Socio political instability from climate events the materialisation of indigenous belief systems and the substantial impact of imperial expansion and European colonialism are examined and comprise a significant addition to our knowledge of conflict and warfare in an under studied part of the Indo Pacific The archaeological record for past conflict is

frequently ambiguous and the contribution of warfare to social development is mired in debate and paradox Authors demonstrate that forts and other defensive constructions are costly and complicated structures that while designed and built to protect a community from a threat of imminent violence had and have complicated life histories as a result of their architectural permanence strategic locations and traditional cultural and political significance Understanding why conflict outbreaks like human colonisation often appear in the past as a punctuated event can best be approached through long term records of conflict and violence involving archaeology and allied historical disciplines as has been successfully done here The volume is essential reading for archaeologists cultural heritage managers and those with an interest in conflict studies
