Bones Stones And Molecules Out Of Africa And Human Origins:

Bones, Stones and Molecules David W. Cameron, Colin P. Groves, 2004-06-03 *Bones Stones and Molecules* provides some of the best evidence for resolving the debate between the two hypotheses of human origins The debate between the Out of Africa model and the Multiregional hypothesis is examined through the functional and developmental processes associated with the evolution of the human skull and face and focuses on the significance of the Australian record The book analyzes important new discoveries that have occurred recently and examines evidence that is not available elsewhere Cameron and Groves argue that the existing evidence supports a recent origin for modern humans from Africa They also specifically relate these two theories to interpretations of the origins of the first Australians The book provides an up to date interpretation of the fossil archaeological and the molecular evidence specifically as it relates to Asia and Australia in particular Readily accessible to the layperson and professional Provides concise coverage of current scientific evidence Presents a robust computer generated model of human speciation over the last 7 million years Well illustrated with figures and photographs of important fossil specimens Presents a synthesis of great ape and human evolution

The Bone Readers Claudio Tuniz, Richard Gillespie, Cheryl Jones, 2016-06-16 The Bone Readers are a dedicated group of scholars who study the earliest human remains their chemistry and DNA their extinct floral and faunal contemporaries and the geologic layers in which they were found Their research leads them to theories about modern human origins that continually challenge conventional wisdom and cherished beliefs about Eve Neanderthals hobbits and the Bering Straits among others Two leading Bone Readers and a science writer have penned a literate authoritative summary of the current questions and the minefield of academic politics that surround it Ideal for students in human origins or biological anthropology courses and a delightful read

The Origins of Modern Humans Fred H. Smith, James C. Ahern, 2013-07-09 This update to the award winning *The Origins of Modern Humans A World Survey of the Fossil Evidence* covers the most accepted common theories concerning the emergence of modern *Homo sapiens* adding fresh insight from top young scholars on the key new discoveries of the past 25 years *The Origins of Modern Humans Biology Reconsidered* allows field leaders to discuss and assess the assemblage of hominid fossil material in each region of the world during the Pleistocene epoch It features new fossil and molecular evidence such as the evolutionary inferences drawn from assessments of modern humans and large segments of the Neandertal genome It also addresses the impact of digital imagery and the more sophisticated morphometrics that have entered the analytical fray since 1984 Beginning with a thoughtful introduction by the authors on modern human origins the book offers such insightful chapter contributions as Africa The Cradle of Modern People Crossroads of the Old World Late Hominin Evolution in Western Asia A River Runs through It Modern Human Origins in East Asia Perspectives on the Origins of Modern Australians Modern Human Origins in Central Europe The Makers of the Early Upper Paleolithic in Western Eurasia Neandertal Craniofacial Growth and Development and Its Relevance for Modern Human Origins Energetics and the Origin of Modern Humans Understanding Human Cranial Variation in Light of Modern Human Origins The Relevance of Archaic Genomes to Modern Human Origins The Process of Modern Human Origins The Evolutionary and Demographic Changes Giving Rise to Modern Humans The Paleobiology of Modern Human Emergence Elegant and thought provoking *The Origins of Modern Humans Biology Reconsidered* is an ideal read for students grad students and professionals in human evolution and paleoanthropology

Humans Claudio Tuniz, Patrizia Tiberi Vipraio, 2016-05-24 Based on the latest scientific discoveries this unauthorized biography of the Humans recounts the story of our distant ancestors during the past 6 million years since the line of our extended family separated from that leading to modern chimpanzees The book explains how different species evolved both anatomically and cognitively and describes the impacts of climatic and environmental change on this process It also explores the nature of relationships within and between species describes their everyday lives and discusses how isolated individuals became members of larger social groups The concluding chapters highlight the paramount importance of the emergence of symbolic thought and discuss its contribution to the formation of institutions societies and economies The multifaceted picture that emerges will help the reader to make

sense not only of what we were but also of what we are here and now The book is both entertaining and rigorous in integrating results from a wide selection of disciplines It will be particularly suitable for people with a curious and open mind keen to overcome long standing prejudices on man's place in nature

21st Century Anthropology: A Reference

Handbook H. James Birx, 2010-06-10 Highlighting the most important topics issues questions and debates these two volumes offer full coverage of major subthemes and subfields within the discipline of anthropology

The Routledge Handbook of Bioarchaeology in Southeast Asia and the Pacific Islands Marc Oxenham, Hallie Buckley, 2015-11-19 In recent years the bioarchaeology of Southeast Asia and the Pacific islands has seen enormous progress This new and exciting research is synthesised contextualised and expanded upon in *The Routledge Handbook of Bioarchaeology in Southeast Asia and the Pacific Islands* The volume is divided into two broad sections one dealing with mainland and island Southeast Asia and a second section dealing with the Pacific islands A multi scalar approach is employed to the bio social dimensions of Southeast Asia and the Pacific islands with contributions alternating between region and or site specific scales of operation to the individual or personal scale The more personal level of osteobiographies enriches the understanding of the lived experience in past communities Including a number of contributions from sub disciplinary approaches tangential to bioarchaeology the book provides a broad theoretical and methodological approach Providing new information on the globally relevant topics of farming population mobility subsistence and health no other volume provides such a range of coverage on these important themes

The Impulse Factor Nick Tasler, 2012-12-11 Some people can take risks move abroad switch careers and give up everything to chase their dreams with hardly a second thought For others looking before they leap is vital to making even simple decisions In his first book Nick Tasler research and development director for cutting edge think tank TalentSmart turns conventional wisdom on its head by explaining that there are actually two factors that determine whether an individual will be impulsive or cautious The first is genetic and the second is Tasler's theory of Conditional Impulsivity in which the gravity of a particular situation can trigger unusually risky responses from a cautious person More than just a book *The Impulse Factor* provides a clear understanding of why we make the choices we do and the tools to turn those decisions into something great

Was Man More Aquatic in the Past? Fifty Years After Alister Hardy - Waterside Hypotheses of Human Evolution Mario Vaneechoutte, Algis Kuliukas, Marc Verhaegen, 2011 The book starts from the observation that humans are very different from the other primates Why are we naked Why do we speak Why do we walk upright Fifty years ago in 1960 marine biologist Sir Alister Hardy tried to answer this when he announced his so called aquatic hypothesis human ancestors did not live in dry savannahs as traditional anthropology assumes but have adapted to live at the edge between land and water gathering both terrestrial and aquatic foods This eBook is an up to date collection of the views of the most important protagonists of this long neglected theory of human evolution

Cameron, 2004 Looking at a period of history 22 to 2.5 million years ago this title examines the record of the Neogene fossil apes their adaptive trends their morphologies and their relationships to the environment their evolution and their extinctions to provide insights into the evolution of our most distant and our most immediate fossil ancestors

The Story of N Hugh S. Gorman, 2013-01-24 In *The Story of N* Hugh S. Gorman analyzes the notion of sustainability from a fresh perspective the integration of human activities with the biogeochemical cycling of nitrogen and provides a supportive alternative to studying sustainability through the lens of climate change and the cycling of carbon It is the first book to examine the social processes by which industrial societies learned to bypass a fundamental ecological limit and later began addressing the resulting concerns by establishing limits of their own The book is organized into three parts Part I *The Knowledge of Nature* explores the emergence of the nitrogen cycle before humans arrived on the scene and the changes that occurred as stationary agricultural societies took root Part II *Learning to Bypass an Ecological Limit* examines the role of science and market capitalism in accelerating the pace of innovation eventually allowing humans to bypass the activity of nitrogen fixing bacteria Part III *Learning to Establish Human Defined Limits* covers the twentieth century response to the nitrogen related concerns that emerged as more nitrogenous compounds flowed into the environment A concluding chapter *The Challenge of Sustainability* places the entire story in the context of constructing an ecological economy in which innovations that contribute to sustainable practices are rewarded

Cognitive Evolution David B. Boles, 2022-07-18 *Cognitive Evolution* provides an in depth exploration of the natural history of cognition from the beginning of life on Earth to present day humans Drawing together evolutionary comparative and neuroscience research the book brings a unique cognitive perspective to evolutionary psychology The second edition features the latest research and illustrations on emerging topics making it a true update of the field After introducing evolution Boles adopts an information processing perspective from inputs to outputs with all the mental processes in between to provide a systematic overview of the evolution of cognition including its sensory motoric perceptual and cognitive components The combination of evolutionary comparative and neuroscience perspectives provides an insight on topics like vision handedness tools and planning spatial perception pattern recognition memory language and consciousness *Cognitive Evolution* is a comprehensive essential read for advanced undergraduate and postgraduate students of cognitive and evolutionary psychology Researchers will find it a useful and insightful synthesis of the field yet even the curious public will find in it much that is surprising and enlightening

Homo Dominus Stephen G. Dennis, 2009 *Homo dominus* redefines what it means to be human Starting with the component pieces of human uniqueness cognition self awareness language technology aggression altruism culture the arts and spirituality it rebuilds the human species using a new conceptual blueprint Sure to spark debate *Homo dominus* offers a new vision of who we are and how we got here Author Stephen Dennis draws from neuroscience paleontology psychology and sociobiology to show that the impetus of human evolution is our propensity to control events and their

consequences This means simply that our root operating system is built on actions taken to bring perceptions into line with expectations A pivotal genetic shift driven by ecological instability in the late Miocene era triggered this evolutionary divergence and propelled us out of apedom From our hardscrabble origins on the forest margins to our current position of global dominance Homo dominus recasts traditional human evolutionary theory in terms of basic control theory It is a powerful organizing principle that puts our past in a new context and projects our future in a new light *Language in Prehistory* Alan Barnard,2016-01-14 Taking an anthropological perspective Alan Barnard explores the evolution of language by investigating the lives and languages of modern hunter gatherers **The Oxford Handbook of Prehistoric Oceania** Ethan E. Cochrane,Terry L. Hunt,2018 Oceania was the last region on earth to be permanently inhabited with the final settlers reaching Aotearoa New Zealand approximately AD 1300 This is about the same time that related Polynesian populations began erecting Easter Island's gigantic statues farming the valley slopes of Tahiti and similar islands and moving finely made basalt tools over several thousand kilometers of open ocean between Hawai'i the Marquesas the Cook Islands and archipelagos in between The remarkable prehistory of Polynesia is one chapter of Oceania's human story Almost 50 000 years prior people entered Oceania for the first time arriving in New Guinea and its northern offshore islands shortly thereafter a biogeographic region labelled Near Oceania and including parts of Melanesia Near Oceania saw the independent development of agriculture and has a complex history resulting in the greatest linguistic diversity in the world Beginning 1000 BC after millennia of gradually accelerating cultural change in Near Oceania some groups sailed east from this space of inter visible islands and entered Remote Oceania rapidly colonizing the widely separated separated archipelagos from Vanuatu to Samoa with purposeful return voyages and carrying an intricately decorated pottery called Lapita From this common cultural foundation these populations developed separate but occasionally connected cultural traditions over the next 3000 years Western Micronesia the archipelagos of Palau Guam and the Marianas was also colonized around 1500 BC by canoes arriving from the west beginning equally long sequences of increasingly complex social formations exchange relationships and monumental constructions All of these topics and others are presented in *The Oxford Handbook of Prehistoric Oceania* written by Oceania's leading archaeologists and allied researchers Chapters describe the cultural sequences of the region's major island groups provide the most recent explanations for diversity and change in Oceanic prehistory and lay the foundation for the next generation of research *Bushmen* Alan Barnard,2019-08 A comprehensive and fascinating account of all the major groups of southern African hunter gatherers **How Compassion Made Us Human** Penelope Spikins,2015-05-07 An intriguing look at how our capacity to care about and connect with others has contributed to our evolutionary success as a species Our ability to care about the wellbeing of others whether they are close family or strangers can appear to be unimportant in today's competitive societies But in this volume archaeologist Penny Spikins argues that compassion lies at the heart of what makes us human She takes us on a journey from the earliest Stone

Age societies two million years ago to the lives of Neanderthals in Ice Age Europe using archaeological evidence to illustrate the central role that emotional connections had in human evolution Simple acts of kindness left to us from millions of years ago provide evidence for how social emotions and morality evolved and how our capacity to reach out beyond ourselves into the lives of others allowed us to work together for a common good and form the basis for human success **An**
