The New Chicago John Patrick Koval, 2006. For generations, visitors, journalists, and social scientists alike have asserted that Chicago is the quintessentially American city. Indeed, the introduction to *The New Chicago* reminds us that to know America, you must know Chicago. The contributors boldly announce the demise of the city of broad shoulders and the transformation of its physical, social, cultural, and economic institutions into a new Chicago. In this wide-ranging book, twenty scholars, journalists, and activists, relying on data from the 2000 census and many years of direct experience with the city, identify five converging forces in American urbanization which are reshaping this storied metropolis. The twenty-six essays included here analyze Chicago by way of globalization and its impact on the contemporary city, economic restructuring, the evolution of machine-style politics into managerial politics, physical transformations of the central city and its suburbs, and race relations in a multicultural era. In elaborating on the effects of these broad forces, contributors detail the role of eight significant racial, ethnic, and immigrant communities in shaping the character of the new Chicago and present ten case studies of innovative governmental, grassroots, and civic

action Multifaceted and authoritative The New Chicago offers an important and unique portrait of an emergent and new Windy City

Thoughtlessness and Decadence in Iran Alireza Shomali,2019-04-01 Political decay in Islamic societies has for the most part been the subject of structural analyses while philosophical studies have been rare often speculative and deterministic Thoughtlessness and Decadence in Iran explores from a theoretical perspective the problem of democracy deficit or political decadence in contemporary Iran and by implication in present day Middle Eastern societies This decadence the book argues is in part a religion based decadence and deliverance from it requires collective thoughtfulness about religion Alireza Shomali conceptualizes the Iranian Reality in terms of a lack of not only good life but also thinking of good living This thoughtlessness means dissolution of critical consciousness and as such it heralds escalating decadence At this moment of rapid decay the book argues thought must become relevant to society the communicative practice of thinking must emerge to examine the pathologies of a religiously administrated life Opening a dialogue between Adorno Strauss Farabi and Razi among others Shomali underlines the critical points of similarity and difference between these thinkers and envisions a local emancipatory project that noting the specifics of the Iranian case takes lessons from the Western experience without blind imitation Political Theory between Philosophy and Rhetoric Giuseppe Ballacci,2017-11-28 This book explores the significance of rhetoric from the perspective of its complex relationship with philosophy It demonstrates how this relationship gives expression to a basic tension at the core of politics that between the contingency of its happening and the transcendence toward which it strives The first part of the study proposes a reassessment of the ancient quarrel between

philosophy and rhetoric as it was discussed by Plato Aristotle and above all Cicero and Quintilian who ambitiously attempted to bring them together creating an ideal that is at the roots of the humanist tradition It then moves to twentieth century political theory and shows how the questions that emerge from that quarrel still strongly resonate in the works of key thinkers such as H Arendt L Strauss and R Rorty The volume thus offers an original contribution that locates itself at the intersection of politics rhetoric and philosophy
