The Labour of Leisure Chris Rojek,2009-09-26 Leisure has always been associated with freedom choice and flexibility The week end and vacations were celebrated as time off In his compelling new book Chris Rojek turns this shibboleth on its head to demonstrate how leisure has become a form of labour Modern men and women are required to be competent relevant and credible not only in the work place but with their mates children parents and communities The requisite empathy for others socially acceptable values and correct forms of self presentation demand work Much of this work is concentrated in non work activity compromising traditional connections between leisure and freedom Ranging widely from an analysis of the inflated aspirations of the leisure society thesis to the culture of deception that permeates leisure choice Rojek shows how leisure is inextricably linked to emotional labour and intelligence It is now a school for life In challenging the orthodox understandings of freedom and free time The Labour of Leisure sets out an indispensable new approach to the meaning of leisure Chris Rojek is Professor of Sociology and Culture at Brunel University In 2003 he was awarded the Allen V Sabora Award for outstanding achievement in the field of leisure studies **Handbook of Economic Psychology** W.F. Van Raaij,G.M. van Veldhoven,K.E.

Wärneryd,2013-03-09 The idea to publish a Handbook of Economic Psychology came up as a natural consequence of a discussion concerning appropriate reading material for courses in economic psychology The discussion took place a few years ago in the Department of Economic Psychology at Tilburg University The Netherlands It was noted that there was a surprising lack of collections of pertinent readings to say nothing about the lack of textbooks in the English language So the

present editors who had been involved in the discussion decided to start working on a Handbook The situation has changed quite a lot since then There are now a number of books internationally available in the English language in economic psychology or behavioral economics The interest in this field of study is expanding quite impressively The Journal of Economic Psychology is now 1988 in its ninth volume and many other journals are publishing articles in the field The application of psychological theories and methods to economic problems or the study of economic experiences and behavior is variously referred to as economic psychology or behavioral economics While in principle we do not want to overdo the differences between the two we have a feeling that economic psychology has a slightly stronger flavor of psychology than behavioral economics which in its turn seems to be closer to economics Psychologists tend to feel more at home in economic psychology while economists seem to favor behavioral economics

A Literature Review ,1986 **The Oxford Encyclopedia of Women in World History** Bonnie G. Smith,2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work Although there has been extensive research on women in history by region no text or reference work has comprehensively covered the role women have played throughout world history The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes The Encyclopedia contains over 1 250 signed articles arranged in an A Z format for ease of use The entries cover six main areas biographies geography and history comparative culture and society including adoption abortion performing arts organizations and movements such as the Egyptian Uprising and the Paris Commune women's and gender studies and topics in world history that include slave trade globalization and disease With its rich and insightful entries by leading scholars and experts this reference work is sure to be a valued go to resource for scholars college and high school students and general readers alike

other research fields this book responds to a pressing need to consolidate recent advances in a single text Adopting a broad definition of criticality the contributors seek to find fresh ways of theorising tourism by locating the phenomenon in its wider political economic cultural and social contexts The collection addresses the power relations underpinning the production of academic knowledge presents a range of qualitative data collection methods which confront the field's dominant post-positivist approaches foregrounds the emotional dynamics of research relations and explores the personal the political and the situated nature of research journeys The book has been divided into two parts with the essays in the first part establishing a context specific framework for engaging philosophical and theoretical debates in contemporary tourism enquiry The second set of essays then present discuss and critique specific methodologies research techniques methods of interpretation and writing strategies all of which are in some sense illustrative of critical tourism research Contributors range from postgraduate students to established academics and are drawn from both the geopolitical margins and the powerbases of the tourism academy Their various relationships with the English speaking academy thus range from relative outsider to well positioned insider and as a result their essays are reflective of a range of locations within the complexly spun web of academic power relations and social divisions
