Merchant Marine and Fisheries,1947 *Figures of Simplicity* Birgit M. Kaiser,2012-01-02 *Figures of Simplicity* explores a unique constellation of figures from philosophy and literature Heinrich von Kleist Herman Melville G W Leibniz and Alexander Baumgarten in an attempt to recover alternative conceptions of aesthetics and dimensions of thinking lost in the disciplinary narration of aesthetics after Kant This is done primarily by tracing a variety of simpletons that populate the writings of Kleist and Melville These figures are not entirely ignorant or stupid but simple Their simplicity is a way of thinking one that author Birgit Mara Kaiser here suggests is affective thinking Kaiser avers that Kleist and Melville are experimenting in their texts with an affective mode of thinking and thereby continue she argues a key line within eighteenth century aesthetics the relation of rationality and sensibility Through her analyses she offers an outline of what thinking can look like if we take affectivity into account **Ship Dioramas** David Griffith,2013-10-17 This book is about the art of displaying waterline models By their very nature ship models that do not show the full hull and are not mounted on an artificial stand cry out for a realistic setting At its most basic this can be just a representation of the sea itself but to give the model a context even to tell some sort of story is far more challenging This is the province of the diorama which at its most effective is a depiction of a scene or an event in which the ship model takes centre stage As with a painting the composition

is a vital element and this book devotes much of its space to what works and what does not and illustrates with photographic examples why the best maritime dioramas have visual power and how to achieve that impact Individual chapters explore themes like having small craft in attendance on the main subject multiple model scenarios dockyards and naval bases and the difficulties of replicating naval combat realistically It also looks at both extremes of modelmaking ambition the small single ship exposition and the largest most ambitious projects of the kind meant for museum display The book concludes with some of the most advanced concepts how to create drama and the illusion of movement and how to manipulate perspective Illustrated throughout with colour photos the more abstract discussion is backed with practical how to sections so anyone who builds waterline ship model will benefit from reading this book As featured in Glasgow Now CHAMBERS'S TWENTIETH CENTURY DICTIONARY OF THE ENGLISH LANGUAGE REV.
