Britain, 1980 **The Theory of Rules** Karl N. Llewellyn, 2011-04 Karl N Llewellyn was one of the founders and major figures of legal realism and his many keen insights have a central place in American law and legal understanding. Key to Llewellyn's thinking was his conception of rules put forward in his numerous writings and most famously in his often mischaracterized declaration that they are pretty playthings. Previously unpublished *The Theory of Rules* is the most cogent presentation of his profound and insightful thinking about the life of rules. This book frames the development of Llewellyn's thinking and describes the difference between what rules literally prescribe and what is actually done with the gap explained by a complex array of practices, conventions, professional skills and idiosyncrasies, most of which are devoted to achieving a law's larger purpose rather than merely following the letter of a particular rule. Edited, annotated and with an extensive analytic introduction by leading contemporary legal scholar Frederick Schauer, this rediscovered work contains material not found elsewhere in Llewellyn's writings and will prove a valuable contribution to the existing literature on legal realism.

Automated Reasoning with Analytic Tableaux and Related Methods Neil V. Murray, 2003-07-31 This book constitutes the refereed proceedings of the International Conference on Analytic Tableaux and Related Methods (TABLEAUX 99) held in Saratoga Springs, NY, USA, in June 1999. The volume presents 18 revised full papers and three system descriptions selected from 41 submissions. Also included are system comparisons and abstracts of an invited paper and of two tutorials. All current issues surrounding mechanization of reasoning with tableaux and similar methods are addressed, ranging from theoretical foundations to implementation and systems development and applications, as well as covering a broad variety of logic calculi. As application areas, formal verification of software and computer systems, deductive databases, knowledge representation and systems diagnosis are covered.
