The Spirit of Dialogue Aaron T. Wolf, 2017-09-14 Over more than twenty years as a mediator Aaron T Wolf has learned that successful conflict resolution is shaped by complicated dynamics from how comfortable the meeting room is to the participants deepest senses of self Bridging seemingly intractable issues means addressing multiple layers of needs Wolf s approach may be surprising to Westerners who are accustomed to separating rationality from spirituality and science from religion The Spirit of Dialogue draws lessons from a diversity of faith traditions to transform conflict from identifying the root cause of anger to aligning with an energy beyond oneself what Christians call grace to the true listening practiced by Buddhist monks Whether atheist or fundamentalist Muslim or Jewish Quaker or Hindu any reader involved in difficult dialogue will find concrete steps towards a meeting of souls

Dialogue and Learning in

Mathematics Education Helle Alrø, Ole Skovsmose, 2002 Dialogue and Learning in Mathematics Education is concerned with communication in mathematics class rooms In a series of empirical studies of project work we follow students inquiry cooperation as well as students obstructions to inquiry cooperation Both are considered important for a theory of learning mathematics Special attention is paid to the notions of dialogue and critique A central idea is that dialogue supports critical learning of mathematics The link between dialogue and critique is developed further by including the notions of intention and reflection Thus a theory of learning mathematics is developed which is resonant with critical mathematics education Lost in Dialogue Giovanni Stanghellini, 2017 In this book Stanghellini argues that to be human means to be in dialogue with alterity that mental pathology is the outcome of a crisis of one's dialogue with alterity and that care is a method wherein dialogues take place whose aim is to re-enact interrupted dialogue with alterity within oneself and with the external world

Religions and Dialogue Wolfram Weiße, Katajun Amirpur, Anna Körs, Dörthe Vieregge, 2014 Responding to plurality is a demanding task Nonetheless it is one of the challenges that European countries are facing today Over the past decades the social and religious make up of Central Europe has changed and this has led to resentment and fears of mass immigration social disintegration and the emergence of parallel societies However we also find empirical proof that prejudice is lowest where there is direct contact Therefore there appears to be an increasing need for more dialogue in order to make the stranger less strange the unknown known the other no longer entirely other This is equally true in academic research There is a definite need yet research on questions of interreligious dialogue remains in its infancy throughout the various disciplines engaged in it The project Religion and Dialogue in Modern Societies ReDi that started at the Academy of World Religions at the Hamburg University in 2011 seeks to contribute to remedying this deficit Like the ReDi Project this book looks at dialogue from different perspectives It includes both theoretical and empirical approaches as well as a variety of theological viewpoints on a theology of plurality and dialogue from the perspective of different religions *Commitment in Dialogue* Douglas N. Walton, Erik C. W. Krabbe, 1995-01-01 This book develops a logical analysis of dialogue in which two or more parties attempt to advance their own interests It includes a classification of the major types of dialogues and a discussion of several important informal fallacies The authors define the concept of commitment in a way that makes it useful in evaluating arguments In traditional logic a proposition is either true or false and that is the end of it In this new framework an arguer can be held to his or her commitments in some cases but in other cases he or she can retract them without violating any rule of the dialogue Commitment in Dialogue studies the conditions under which commitments should be held or may be retracted within an argument An extensive case study of a discussion in medical ethics is used to bring together two traditions or schools of thought that had not been integrated previously the rigorous Lorenzen school of formal logic and the more permissive Hamblin style dialogue It introduces these methods of evaluation and offers guidelines for analyzing the text of discourse The book could be used in both intermediate and advanced courses in informal logic argumentation and

critical thinking but it is accessible to the reader with no background in these fields as well Each chapter is summarized and additional problems to be solved are presented

Being a Christian in Igbo Land Eze Ikechukwu, 2013 It is not always a comfortable position to question the position of a good majority However it is known that the majority can sometimes be wrong or see things differently It takes courage and a particularly critical mind to question the depth of the Christian Faith in a land seen as the future of Christianity in Africa As a Priest with some pastoral experience both in Africa and in Europe the Author is at home with the subject matter in this book He accepts the fact of the growing numbers in the churches but questions the depth of conviction in the face of the problems arising from the clash of values between Christian Faith and Igbo Traditional Religion He maintains that if God saw enough reasons to create men differently and revealed himself differently to them he God accepts that men have different understandings of his relationship with them and that they may relate with him using what is available to them their Culture and Tradition

Theory and Practice of Dialogical Community Development Peter Westoby, Gerard Dowling, 2013-07-18 This book proposes that community development has been increasingly influenced and co opted by a modernist soulless rational philosophy reducing it to a shallow technique for solving community problems In contrast this dialogical approach re maps the ground of community development practice within a frame of ideas such as dialogue hospitality and depth For the first time community development practitioners are provided with an accessible understanding of dialogue and its relevance to their practice exploring the contributions of internationally significant thinkers such as P Freire M Buber D Bohm and H G

Gadamer J Derrida G Esteva and R Sennett What makes the book distinctive is that first it identifies a dialogical tradition of community development and considers how such a tradition shapes practice within contemporary contexts and concerns economic social political cultural and ecological Second the book contrasts such an approach with technical and instrumental approaches to development that fail to take complex systems seriously Third the approach links theory to practice through a combination of storytelling and theory reflection ensuring that readers are drawn into a practice theory that they feel increasingly confident has been tried and tested in the world over the past 25 years

The Moral of the Story John H. Lockwood, 1999 The problem this project attempts to solve is to develop a workable moral education in light of the clash between religious forms of moral education and U S Supreme Court decisions concerning them The concept of story and storytelling has been suggested as a unifying focus for disparate prescriptions for moral education Several recent approaches to moral storytelling have been proposed The approaches of William Bennett Nel Noddings and Herbert Kohl are among those which have attempted to combine moral education and storytelling within the last decade Bennett is identified with other theorists whose primary concern is the moral content of a story Noddings is identified as a process theorist whose primary concern is the process of moral storytelling not the content Kohl is identified as a reflection theorist whose approach challenges tradition in the hope of creating a more moral society Each one of these three approaches attempts to provide a comprehensive program of moral education but they fall short of that goal The purpose of this project then is to construct a storytelling moral education program that improves upon earlier approaches Using the three levels of moral thinking posited by R M Hare a three level approach to moral storytelling is proposed The intuitive critical and meta ethical levels of moral thinking that Hare refers to are used to frame a new three level approach to moral storytelling The three level approach combines content process and reflection into a unified prescription for moral
