## Of Fruit:

*Handbook of Fruit Wastes and By-Products* Khalid Muzaffar, Sajad Ahmad Sofi, Shabir Ahmad Mir, 2022-10-03 Processing of fruits produces large volumes of wastes and by products which can create environmental problems. However, these fruit processing residues have amazing nutritional composition containing good amounts of nutrients and biofunctional components. So the current trend in the present world is to efficiently utilize these fruit wastes and byproducts and minimize their impact on the environment. Proper utilization of fruit processing wastes and byproducts would not only emerge as a source of extra profit to the fruit processing industry but also will help in lessen the environment pollution due to these fruit processing byproducts. *Handbook of Fruit Wastes and By Products Chemistry Processing Technology and Utilization* will be the first book devoted to fruit processing wastes and by products of wide range of important fruits including tropical, subtropical and temperate fruits. Key features: Provides comprehensive information about the chemistry of wastes and byproducts obtained during fruit processing. Provide in depth information about the bioactive potential of fruit processing wastes and byproducts. Explores new strategies used for proper valorization of fruit processing residues. Describes the utilization of nutraceutical components derived from fruit processing residues in fabrication of novel functional foods. Although there are some general books on byproducts of food processing industry but they are limited in context related to only some particular fruits. The unique quality of this book is that it provides a full length study of the different developments made right from the basic technologies involved in management of fruit wastes and byproducts to the recent advancements and future areas of research to be done on this subject. This book would be a valuable resource for scientists, researchers, professionals and enterprises that aspire in management of fruit processing wastes and byproducts and their utilization.

Fruits play a pivotal role in mitigating nutritional requirement of the society as well as providing employment opportunity especially in the agriculture dominated rural agrarian economy of the developing countries like India. In the age of Hi tech Horticulture, introduction of new fruit crops resulted in the paradigm shift in fruit crop cultivation. Climatic changes and increment in cropping intensity reflected in a remarkable and rapid shift of fruit ecosystem. Biotic stresses like insect, mite and nematode pests etc have also been increasing day by day. These pest problems in fruit crop cultivation are now changing in a dynamic fashion in close association with the change in cropping system and the environment. To protect the fruit crops from insect

pest devastation synthetic poisonous chemicals are the quick and easy solution which are being used indiscriminately Considering the ill effects of these hard to degrade synthetic chemical pesticides integrated approaches are the only answer to combat such a complex and dreaded problem The integrated approach comprises cultural mechanical biological and ecological management strategies in association with need based and safe pesticidal chemicals Some pesticides have also been banned for using in horticultural crop cultivation some others are withdrawn But information with regard to these phenomena are scattered In this compilation an exhaustive effort has been undertaken to compile them In addition to elaborating the host range distribution marks of identification mode of feeding and symptoms of infestation bionomics of the pests biological control pesticide residue problem and measures to mitigate it have been presented by the experts from different Institutes of repute from all over India The book has been designed for the UG and PG students of horticulture crop protection pomological acarology as well as nematology This will also serve as guide to respected Professors and Teachers of Agricultural Universities progressive farmers extension workers plant protection specialists as well as policy makers
