Neoliberalism and Imperialism: Dissecting the Dynamics of Global Oppression Tatah Mentan,2016-08-06 Today's neoliberal imperialism crushes all unfavourable conditions through multiple forms of oppression to ensure the creation of a world in its own image The systemic and structural oppression birthed by neoliberal imperialism once again reproduces and implements colonialism armed robbery on a global scale The difference between the old form and the new form is the scale of destruction and the overt use of Weapons of Mass Destruction Hence the militarization of the globe is a natural outcome In this book Professor Tatah Mentan argues that United Fruit Company for instance could not have flourished without the strong support of the Marines the U S State Department and all of its resources In fact the French the German the British and the Belgian financiers could not have been able to suck the blood out of their colonies without their legionnaires soldiers mercenaries preachers merchants and generals Specifically the Western colonial empires in the nineteenth century presented their penetration pillage and rape of Africa Asia and Latin America as modernization and tutelage aided by the ideology of survival of the fittest This conceit pervaded the entire Western bourgeois social science educational and religious institutions And today there is the same clear symbiotic relationship between business and the military Empirical realities demonstrate that companies like Microsoft could not enjoy its overwhelming prosperity without having the strong military that America has This is precisely why neoliberal imperialism operates alongside oppressive militarism war and dictatorship and must be disrupted to liberate mankind from its death grip

Wall Street on Trial

Justin O'Brien, 2005-01-21 The politics of business have become the business of politics Across the world the lesson is clear just as too much governmental interference leads to dysfunctional economies left to its own devices the market is incapable of adequate self regulation The corporate malfeasance crisis in the United States has transformed global perceptions about the efficacy of regulatory structures in combating corrupt practices in private and public sectors The design of effective corporate governance structures depends not just on internal factors but also on the inter relationship between various actors that constitute wider governance politicians lobbyists corporations and regulators A Corrupted State Wall Street on Trial breaks new ground by deconstructing the systemic flaws inherent in the model itself It reveals that the rotten apple theory positing the problems in corporate America as merely the result of deviancy by an individual or a single firm is an intellectual deceit not supported by the facts *Obama's War* James Gannon, 2011 Woodward shows Obama making decisions on the Afghanistan War the war in Pakistan and the worldwide fight against terrorism **The Need for a New Economic System** John Scales Avery, 2016-02-07 It is clear that our present economic system is unsustainable Never ending exponential industrial growth on a finite planet is a logical absurdity We are already using resources at a rate which it would take 1.6 planet earths to replace We are already undermining the ecological systems which support all of life Our present economic system has led to an unbelievable degree of economic inequality To maintain this inequality both between nations and within nations military force is used and democracy is replaced by oligarchy The future of human civilization is endangered both by the threat of thermonuclear war and by the threat of catastrophic climate change and both of the twin threats are results of our present economic system This book documents in detail the serious economic problems of today's world and it also proposes sustainable solutions **New Culture, New Right** Michael O'Meara, 2013 New Culture New Right is the first English language study of the identitarian movements presently reshaping the contours of European politics The study's focus is Alain de Benoist's GRECE Groupement de Recherche et d'Etude pour la Civilisation Européenne which Paul Piccone of Telos described as the most interesting group of continental thinkers since the existentialists of the 1950s and which elsewhere is seen as the leading school of contemporary Right wing thought Made up of veterans from various nationalist traditionalist far Right and regionalist movements the GRECE began as an association of French intellectuals committed to restoring the crumbling cultural foundations of European life and identity Due to the quality of its publications and its philosophically persuasive reformulation of the Right project it attracted an immediate audience By the late 1970s it had recruited an impressive array of Continental thinkers to its ranks In Italy Germany Belgium and a number of other European countries there have since emerged organizations and publishing concerns either directly linked to the Paris based GRECE or involved in analogous endeavors As a result of these diffusions GRECE style identitarianism has come to form the chief ideological alternative to the regnant liberalism The European New Right to which the GRECE gave birth is new however not in the modernist sense of being novel but in the traditionalist sense of reappropriating an origin whose

meaningful possibilities remain open for realization. Such a revolutionary return to Europe's roots has never seemed so urgent. After a half century under the liberal democratic regimes imposed by the United States in 1945, Europeans now face extinction as a race and a culture. In opposition to the ethnocidal forces of the American Occupation and its European collaborators, New Rightists appeal to the primordial in their people's heritage, aiming to awake a spirit of resistance and renaissance in them. The result, as documented in this introduction to their ideas, is one of the most formidable critiques ever made of the liberal project.

Michael O'Meara, Ph.D., studied social theory at the *École des Hautes Études en Sciences Sociales* and modern European history at the University of California. He is the author of *Guillaume Faye and the Battle of Europe* (2013), also published by Arktos.

History and Morality Donald Bloxham, 2020. Should historians make value judgements about the past? Many historians think not, but Donald Bloxham contends that it is legitimate, often unavoidable, and frequently important. *History and Morality* illuminates how far tacit moral judgements infuse works of history and how strange those histories would look if the judgements were removed.

The Limitations of the Law of Armed Conflicts: New Means and Methods of Warfare Pablo Antonio Fernández-Sánchez, 2022-05-09. In the law of armed conflicts, one of the elements that has changed the most has been the means and methods of warfare. Yet there are few legal answers for the many questions these changes pose. This volume therefore seeks to identify the limitations of current international law on this double plane: the means and methods of combat and to offer insights about how to address them. Topics include the use of nuclear energy, which without being a weapon can have the same effect as chemical and biological weapons; autonomous artificial intelligence weapons and biobots. Similarly, fake news, the hostile use of cyberspace, lawfare, the use of big data, terrorism as a combat method, premeditated poisoning, sexual humiliation, the impact of such news on the armed forces, and the reorganization needed to face the new scenarios are all situations not contemplated in classical law and which require new legal and operational responses.
