British Books ,1910 Pinning Down the Past Mike Corbishley,2014-04-17 In a relatively short period of time the pursuit of archaeology has evolved from an antiquarian interest to a specialised scientific activity Part of this evolution has always included the interest of the public and archaeologists efforts to educate them As each new method and technique is developed and each new specialism is created the challenge of making archaeology available as a learning resource grows with it Today for example the issues which surround archaeology and heritage such as the pressures of tourism on sites now form part of many formal educational curricula This book the first to deal with the subject in such depth examines the place of education and outreach within the wider archaeological community Written by one of Britain s leading archaeological educationalists it charts the sometimes difficult and painful growth and development of education and archaeology Packed full of informative and enlightening case studies from the circus at Colchester to Sutton Hoo and Hadrian s Wall this work

examines exactly how we have reached the point we are at where that place is and suggests areas for future development By drawing upon many decades of experience at the front line of archaeological education the author has produced a key text that will play a major role in the on going development of the heritage industry Publisher s website

The Villa Dei Papiri at Herculaneum Carol C. Mattusch, Henry Lie, 2005 The Villa dei Papiri at Herculaneum buried during the eruption of Mt Vesuvius in A D 79 then rediscovered in 1750 contained a large collection of bronze and marble statuary and busts Before they were published or exhibited the sculptures were restored so as to appear whole it is thus that they helped to shape early modern tastes in classical sculpture The book describes the nature of the ancient sculptures and their impact on the modern public Their chance discovery affected the interpretation of the statues their styles and subjects over the course of the next 250 years The ancient sculptures were copied extensively in reproductions of various sizes and patinas The author traces the popularity of these copies in Europe and America Also presented in the book is a technical study of the production techniques and materials of the sculptures as well as of their modern restoration history Scientific analyses and detailed photographs reveal both how the pieces were cast and pieced together in antiquity and how they were restored in the eighteenth century Even though this collection has been known for two and a half centuries this book covers for the first time the eclectic nature of the sculptures their actual condition and their quality pointing in some cases to mass production
