**Air Warfare in the Missile Age** Lon O. Nordeen, 2014-12-02 Lon O Nordeen has completely updated his 1985 chronicle of military aviation s evolving role in warfare now covering the major conflicts of the past four decades He presents the historical and political background of each conflict and includes in depth discussions of the aircraft weapons tactics training new systems and other factors that influenced the outcome of each war New and existing chapters have been enhanced with information based on recently declassified material especially regarding Vietnam and new sources in Egypt Israel and the former Soviet Union As smart bombs have become more successful in reducing the risks for pilots and frontline troops air missile warfare has become the central player in military conflicts **Air Warfare in the Missile Age Second Edition** is a valuable resource for understanding the evolution of modern air warfare **Air Power as a Coercive**

**Instrument** Daniel Byman, John G. McGinn, Keith Crane, Seth G. Jones, Rollie Lal, Ian O. Lesser, 1999-08-20 Coercion the use of

threatened force to induce an adversary to change its behavior is a critical function of the U S military U S forces have recently fought in the Balkans the Persian Gulf and the Horn of Africa to compel recalcitrant regimes and warlords to stop repression abandon weapons programs permit humanitarian relief and otherwise modify their actions Yet despite its overwhelming military might the United States often fails to coerce successfully This report examines the phenomenon of coercion and how air power can contribute to its success Three factors increase the likelihood of successful coercion 1 the coercer s ability to raise the costs it imposes while denying the adversary the chance to respond escalation dominance 2 an ability to block an adversary s military strategy for victory and 3 an ability to magnify third party threats such as internal instability or the danger posed by another enemy Domestic political concerns such as casualty sensitivity and coalition dynamics often constrain coercive operations and impair the achievement of these conditions Air power can deliver potent and credible threats that foster the above factors while neutralizing adversary countercoercive moves When the favorable factors are absent however air power or any other military instrument will probably fail to coerce Policymakers use of coercive air power under inauspicious conditions diminishes the chances of using it elsewhere when the prospects of success would be greater

**Nationalism and Ethnic Conflict, revised edition** Michael E. Brown, Owen R. Cote, Jr., Sean M. Lynn-Jones, Steven E. Miller, 2001-09-14 Understanding the roots and causes of ethnic animosity analyses of recent events in Bosnia Kosovo Rwanda Somalia and the former Soviet Union Most recent wars have been complex and bloody internal conflicts driven to a significant degree by nationalism and ethnic animosity Since the end of the Cold War dozens of wars in Bosnia Kosovo Rwanda Somalia the former Soviet Union and elsewhere have killed or displaced millions of people Understanding and controlling these wars has become one of the most important and frustrating tasks for scholars and political leaders This revised and expanded edition of *Nationalism and Ethnic Conflict* contains essays from some of the world s leading analysts of nationalism ethnic conflict and internal war The essays from the first edition have been updated and supplemented by analyses of recent conflicts and new research on the resolution of ethnic and civil wars The first part of the book addresses the roots of nationalistic and ethnic wars focusing in particular on the former Yugoslavia The second part assesses options for international action including the use of force and the deployment of peacekeeping troops The third part examines political challenges that often complicate attempts to prevent or end internal conflicts including refugee flows and the special difficulties of resolving civil wars

*Precision-guided Munitions and Human Suffering in War* James E. Hickey, 2016-04-08 James Hickey proceeds from the premise that throughout history humans have demonstrated a proclivity for using violence against one another as a means to achieve an end means enabled in many respects by the technologies available at the time Advancing technology has often been a prime enabler of ever increasing levels of violence and attendant human suffering At a few junctures in history however certain technologies have seemingly provided the armed forces that possess them the ability to fight wars with decreasing levels of violence and suffering Today precision guided munitions

PGMs with their high degree of discrimination and accuracy again hold such promise This book seeks to answer the question Do PGMs mitigate suffering in war and have these weapons changed the way decisions regarding war and peace have been made Answering this question helps us understand possible shifts in emphasis in modern warfare both in terms of methods employed and of the greater concern placed on limiting human suffering during conflict This book will help students of ethics just war and military history and senior military and civilian leaders to understand the possible outcomes and wider implications of their strategic choices to use such technology

**The Muslim-Croat Civil War in Bosnia** Charles R. Shrader, 2003 Although Shrader's work is a detailed meticulous analysis by a neutral expert not everyone will find his conclusions comfortable But every serious student of the conflict in Bosnia will have to take his history into account Enhanced by maps useful appendices and a glossary this should become the standard work on military operations in Central Bosnia and a useful case study of internal warfare and ethnic conflict

**Ethics, Technology and the American Way of War** Reuben E. Brigety II, 2007-06-11 A new investigation into how the advent of precision guided munitions affects the likelihood of US policy makers to use force As such this is an inquiry into the impact of ethics strategy and military technology on the decision calculus of national leaders Following the first Gulf War in 1991 this new study shows how US Presidents increasingly used stand off precision guided munitions or PGMs especially the Tomahawk cruise missile either to influence foreign adversaries to make specific policy choices or to signal displeasure with their actions Such uses of force are attractive because they can lead to desirable policy outcomes where conventional diplomacy has failed but without the large cost of lives economic resources or political capital that result from large scale military operations In a post 9 11 world understanding alternative uses of force under significant policy constraints is still of supreme importance

**The Small Wars of the United States, 1899-2009** Benjamin R. Beede, 2012-08-06 The Small Wars of the United States 1899 2009 is the complete bibliography of works on US military intervention and irregular warfare around the world as well as efforts to quell insurgencies on behalf of American allies The text covers conflicts from 1898 to present with detailed annotations of selected sources In this second edition Benjamin R Beede revises his seminal work bringing it completely up to date including entries on the current conflicts in Iraq and Afghanistan An invaluable research tool The Small Wars of the United States 1899 2009 is a critical resource for students and scholars studying US military history

**The Dynamics of Coercion** Daniel Byman, Matthew Waxman, 2002-02-04 Successful coercion should be relatively simple for the United States Since the demise of the Soviet Union the United States is without rivals in military might political influence or economic strength Yet despite the lopsided US edge in raw power regional foes persist in defying the threats and ultimatums brought by the United States and its allies This book examines why some attempts to strong arm an adversary work while others do not It explores how coercion today differs from coercion during the Cold War It describes the constraints on the United States emanating from the need to work within coalitions and

the restrictions imposed by domestic politics and it assesses the special challenges likely to arise when an adversary is a non state actor or when the use of weapons of mass destruction is possible

**Air & Space Power Journal fall 02 , NATO, Civilisation and Individuals** Sarah da Mota,2018-03-06 This book critically engages with NATO s two main referent objects of security civilisation and individuals By rethinking the seemingly natural assumption of these two referent objects it suggests the epistemological importance of an unconscious dimension to understand meaning formation and behaviour change in international security The book provides a historicised and genealogical approach of the idea of civilisation that is at the core of the Alliance in which human needs narratives and security arrangements are interconnected It suggests that there is a Civilised Subject of Security at the core of modern Western security that has constantly produced civilised and secure subjects around the world which explains NATO s emergence around a civilisational referent The book then proceeds by considering the Individualisation of Security after the Cold War as another stage of the civilising process based on NATO s military operations in Bosnia Herzegovina Kosovo and Afghanistan
