# Robert Koch

(1843-1910)

### Goal of Study

Bacteriology and Infectious Diseases

### How He Became a Medical Pioneer

Robert Koch, a German physician, made groundbreaking discoveries that identified the bacteria causing specific diseases. In 1882, Koch discovered the bacteria that causes tuberculosis (TB), and he also identified the bacteria responsible for cholera and anthrax.

### Impact on Medicine

Koch's discoveries led to better ways to diagnose and treat infectious diseases. His work laid the groundwork for isolating and growing bacteria to identify disease-causing germs, which became a fundamental method in medical research and microbiology. ## Medical Pioneers

# Jenner

Bacteriology

### Goal of Study

Jenner is the "father of vaccines" because he was the first to develop the world's first vaccine. In the late 18th century, he discovered that milkmaids who had contracted cowpox, a mild disease, did not get smallpox, a deadly disease. He tested his theory by giving a young boy with cowpox and then smallpox. The boy did not get smallpox.

Jenner's work led to the development of smallpox vaccine, the first vaccine. His work also inspired other scientists to develop vaccines for other diseases.

## Medical Pioneers

# Fleming

Bacteriology

### Goal of Study

Alexander Fleming, a Scottish bacteriologist, discovered penicillin, the world's first true antibiotic. He noticed that a mold called *Penicillium notatum* had accidentally contaminated a petri dish of bacteria. Fleming realized that the mold was killing the bacteria, and he named it penicillin. He tested his theory by giving a young boy with a bacterial infection a large quantity of the mold. The boy's infection was cured.

Fleming's discovery of penicillin, the first true antibiotic, revolutionized the treatment of bacterial infections. His work led to the development of many other antibiotics, making surgery safer and saving millions of lives.

Bacteriology

### Goal of Study

Louis Pasteur, a French chemist and microbiologist, discovered that germs cause disease. He proved that germs cause fermentation and putrefaction, and he showed that germs cause disease.
