magazines **A Transcendent Madness** D. Nord, 2012-10-29 A bizarre true story of spiritual revelation and psychedelic horror associated with the specter of Hitler and the madness of a world on the brink of a global holocaust This strangely foreboding testament to the inherent danger and the transcendental propensity of the psychedelic experience contains a detailed exposition of the RNA shutter mechanism interface between the organic matrix of the brain and the spiritual matrix of the human soul The author's treatment of that receptor matrix interface includes the correlation between Jungian psychology and the correlative derivative of the Hindu Sutras that obviously provided Jung with the inspiration for the development of his principles of psychic functioning The author's treatment of the internal dynamics and historical continuity of the psychedelic experience also includes a very important reference in the Christian Bible and is interlaced in a 30 year autobiography that includes a very long and very intense nightmare about the reincarnation of Hitler
