Timberdoodle! Frank Woolner, 1974 **The Technical Literature on the American Woodcock, 1927-1978** Thomas J. Dwyer, Richard A. Coon, Paul H. Geissler, 1979 In this bibliography we have attempted to assemble the major portion of the technical literature on the American woodcock *Philohela minor* Included are scientific references published between 1927 and 1978 We chose 1927 as the cutoff date for early literature because of the importance of Arthur Cleveland Bent's work in 1927 and because most articles before 1927 are descriptive and do not add appreciably to the scientific literature on the species An excellent listing of the early literature may be found in the 1936 monograph by Olin Sewall Pettingill Jr No previously published bibliography devoted solely to woodcock is available References are listed alphabetically by author beginning on page 1 Following each reference is a number that corresponds to one of the 22 subject headings listed on page iii

Management of Migratory Shore and Upland Game Birds in North America Glen C. Sanderson, 1977

Making Game Guy de la Valdène, 2025-09-02 Guy de la Valdène's beautifully written essay and first book is an ode to an iconic bird, part natural history and part hunting memoir. It's a well-regarded and undisputed classic, an edgy elegant examination of the habits and history of a reclusive gamebird, the Woodcock, native to Europe and North America, a bird that's been hunted and celebrated since Roman times. Valdène writes exuberantly of the bird, the hunt, and the feast, gracefully balancing the obsessions of a naturalist, sportsman, and gourmand.

Woodcock Research and Management, 1966, 1967

Surveys designed to determine the population status of American woodcock indicate little change in recent continental breeding populations but a continuing decline in production. The annual harvest of this species meanwhile continues to soar with an apparent upsurge in hunter's awareness of the woodcock's sporting qualities. Research activities continue to uncover information related to the reliability of singing ground surveys while banding operations in Louisiana, Maine, Michigan, and West Virginia testify to the feasibility of expanding this very important program throughout North America. West Virginia has contributed significantly to this program through its improvement of the night lighting technique, which was developed in association with their primary objective of evaluating the importance of hunting as a mortality factor. Woodcock bandings and recoveries from the Moosehorn National Wildlife Refuge are being examined to determine more about the characteristics of this lightly harvested population and to better understand their use of various habitat types.

Sky Dance of the

Woodcock Greg Hoch, 2019-03-01 Woodcock are one of the oddest birds in North America. They are a shorebird that got lost and ended up in the scrubby parts of the forest and look like they were put together with the leftover parts of other birds. Oddities aside, each spring they rise to great beauty with their sky dance at dusk. Greg Hoch combines natural history, land management, scientific knowledge, and personal observation to examine this little game bird. Woodcock have a complex life history, and the management of their habitat is also complex. The health of this bird can be considered a key indicator of what good forests look like.
