Wooden Boats for Blue Water Sailors Alfred F Sanford, 2020-10 Exploring the world's mystery from the deck of an ocean going sailboat propelled by the wind and your own wits and skills is the most magnificent of personal accomplishments Amateur ocean sailing developed during the first half of the 20th century and reached its peak during the two decades after WWII Then mass produced and marketed boats subtly undercut the bond between the sailor and his boat The sport lost its meaning Wooden Boats for Blue Water Sailors explores the quiet counter revolution to mass production boat enabled by cold molding and the epoxy bonding of wood which has presented an opportunity for sailors to re bond with their craft Wooden Boats for Blue Water Sailors begins with a history of ocean sailing Then it uses the sciences of material and structure to demonstrate the superiority of wood as a boat building material It climaxes with the description of a new way for building an epoxy bonded wood boat that will last the next generation to use An afterword describes use of the new technique to restore to life traditionally built wood boats that are failing yet too precious to abandon For sailors Wooden Boats for Blue Water Sailors is a celebration of the wits and skills they exercise to sail upon the sea For builders Wooden Boats for Blue Water Sailors offers new techniques for economically building ocean going boats For designers Wooden Boats for Blue Water Sailors offers history to inspire them to remember reflect and refine the requirements of the sea overlooked in the rush to modernity For the craftsman by itself a short appendix concerning use of the tape measure will earn the cost of the book Wooden Boats for Blue Water Sailors will delight and inform the sailor boat builder yacht designer and bring joy to those who love beautiful sailboats

[An Introduction to Wooden Boat Building](#) Thad Danielson, 2020-08-20 My fascination with floating in a boat and working with wind and water to travel the watery world led me to building boats This interest stirs in people around the world For thousands of years wooden boats have been successfully built and operated on the waters that surround us Often the builders of these boats worked to preserve jealously guarded crafts Today marketing has left these crafts free to all who would apply their hands to tools and create vessels of their own In this book I present the processes followed to build a Norwegian Pram and an Arthur Spurling rowboat along with discussion and anecdote on the impetus and skills that make building these and other boats possible The pram a lapstrake boat with transoms at both ends built without plans is the simplest of vessels built with techniques perfected by Vikings 1000 years ago The lapped method of plank fashioning and fastening described can be used for a wide range of other

designs Arthur Spurling built hundreds of rowboats that were treasured by their users on the coast of his native Maine The building process described will produce a fine rowing boat but can also be used in the construction of any other boat built to plans Everyone comes to projects like these from their own perspective with their own experience and resources Even the simplest boat is a complex construction of varied parts Square rarely occurs in boats fair and fit rule Fair means smooth in line and surface without sharp bends Sound wood bends in fair curves making the creation of beautiful wooden boats seem natural Fit means the parts come together tight and evenly Shapes needed to join with another are patterned for through one or another method of spiling establishing the shape of a curve Cutting and finishing wood to match the shape needed for fit calls sharp knives in the form of saws planes and chisels Boat building woods are not the easiest to find these days but wherever trees grow there are still people cutting them and turning logs into lumber Finding these sources and using available wood to build your boat presents challenges but pleasurable and interesting challenges Besides the building processes I tell something of the experience I have had leading me and guiding me through the building of boats This book will be a guide to you but you will find other guides for yourself not least by thinking your own way through the process of building your boat Have fun
