Breiding, Metropolitan Museum of Art (New York, N.Y.),2013-01-01 DIV The advent of the crossbow more than 2 500 years ago effected dramatic changes for hunters and warriors For centuries it was among the most powerful and widely

used handheld weapons and its popularity endures to this day A Deadly Art presents a lively accessible survey of the crossbow s golden age along with detailed descriptions of twenty four remarkable examples Beginning in the middle ages the European aristocracy s enthusiasm for the crossbow heralded shooting competitions and pageants that featured elaborately decorated weapons bearing elegant embellishments of rare materials and prized artistry In addition to being highly functional these weapons were magnificent works of art A Deadly Art includes fascinating descriptions of crossbows used by Margaret of Savoy and Holy Roman Emperors Maximilian I and Charles V among others div **Crossbow** Sir Ralph Payne Gallwey,2004-07 The definitive work on the crossbow which has always been looked on askance by the English as a continental weapon Although it certainly never could achieve the rate of fire of the longbow in a trained archer s hands the crossbow had its merits However cumbersome and slow to load it was in comparison with the longbow the crossbow had greater range and penetrating power against armour and was quicker to master This book is a complete description of the crossbow from its introduction to England by the Normans after 1066 through to its use as a sporting weapon in 1903 The crossbow by its bulk allowed its makers to embellish the strictly functional aspects of the weapon by adding engravings inlays and their own mechanical touches to decorate the weapon The author expertly compares the cross and longbow and includes comments on the early handgun to complete the picture He describes how crossbows were made and the varying styles of bow from wood bows via composites to the steel bow and he also describes the auxiliary parts of the weapon Modern crossbows are also covered including Belgian target shooting barreled cross bows The last part of the book a treatise on thre ancient ballista and catapult is of interest to anyone studying projectile weapons and sieges Ballista catapults trebuchets and spring guns are described which naturally leads back to the crossbow and the start of the book This book is absolutely essential for all who are seriously interested in archery and the history of bows and projectile weapons *The Crossbow, Mediaeval and Modern, Military and Sporting* Sir Ralph Payne-Gallwey,1958 The Crossbow Ralph Payne-Gallwey,1964 The Crossbow ,1976
