Liberalization in Aviation Hartmut Wolf, Peter Forsyth, David Gillen, Kai Hüscherlath, Hans-Martin Niemeier, 2016-05-06 The last few decades have witnessed substantial liberalization trends in various industries and countries Starting with the deregulation of the US airline industry in 1978 regulatory restructuring took place in further network industries such as telecommunications electricity or railways in various countries around the world Although most of the liberalization movements were initially triggered by the worrying performances of the respective

regulatory frameworks increases in competition and corresponding improvements in allocative and productive efficiency were typically associated with the respective liberalization efforts From an academic perspective the transition from regulated industries to liberalized industries has attracted a substantial amount of research reflected in many books and research articles which can be distilled to three main questions 1 What are the forces that have given rise to regulatory reform 2 What is the structure of the regulatory change which has occurred to date and is likely to occur in the immediate future 3 What have been the effects on industry efficiency prices and profits of the reforms which have occurred to date Liberalization in Aviation brings together renowned academics and practitioners from around the world to address all three questions and draw policy conclusions The book is divided into five sections in turn dealing with aspects of competition in various liberalized markets the emergence and growth of low cost carriers horizontal mergers and alliances infrastructures and concluding with economic assessments of liberalization steps so far and proposed steps in the future Anger in the Air Joyce A. Hunter, 2016-04-15 The new realities of airline travel came into full focus after the September 11 terrorist attacks These horrific events escalated air rage incidents by 400% but more importantly they put the entire airline industry under the spotlight In subsequent years the general public began to voice frustrations with the industry in very dramatic ways a marked shift in consumer behavior from that of before 9 11 The International Transport Workers Federation responded with a call to action to bring about major changes to raise the airline industry to a level of service quality sufficient to meet the needs of 21st Century passengers The quality of services that airline customers expect and the propensity toward air rage needs to be understood Undoubtedly some passengers are prone to air rage by factors in no way related to customer service However a better understanding of the customer's perception of service and airlines offerings is one way of addressing the air rage crisis combating the contributing factors long before they conspire to provoke a damaging incidence Anger in the Air Combating the Air Rage Phenomenon provides airlines with valuable input to help them better meet the service expectations of their customers and avoid instances of air rage on their flights What do today's customers need and expect What do airline customers perceive as the quality of services and how can the gap be closed between expectations and perceptions The book addresses these key issues in five stages 1 **Lean Branding** Laura Busche, 2014-09-30 Every day thousands of passionate developers come up with new startup ideas but lack the branding know how to make them thrive If you count yourself among them Lean Branding is here to help This practical toolkit helps you build your own robust dynamic brands that generate conversion You'll find over 100 DIY branding tactics and inspiring case studies and step by step instructions for building and measuring 25 essential brand strategy ingredients from logo design to demo day pitches using The Lean Startup methodology's Build Measure Learn loop Learn exactly what a brand is and what it isn't Build a minimal set of brand ingredients that are viable in the marketplace brand story brand symbols and brand strategy Measure your brand ingredients by using meaningful metrics to see if they meet your conversion goals Pivot your brand ingredients in new directions based
