AI Techniques for Renewable Source Integration and Battery Charging Methods in Electric Vehicle Applications Angalaeswari, S.,Deepa, T.,Kumar, L. Ashok,2023-02-03

Artificial intelligence techniques applied in the power system sector make the prediction of renewable power source generation and demand more efficient and effective Additionally since renewable sources are intermittent in nature it is necessary to predict and analyze the data of input sources Hence further study on the prediction and data analysis of renewable energy sources for sustainable development is required AI Techniques for Renewable Source Integration and Battery Charging Methods in Electric Vehicle Applications focuses on artificial intelligence techniques for the evolving power system field electric vehicle market energy storage elements and renewable energy source integration as distributed generators Covering key topics such as deep learning artificial intelligence and smart solar energy this premier reference source is ideal for environmentalists computer scientists industry professionals researchers academicians scholars practitioners instructors and students

Removal of Emerging Contaminants Through Microbial Processes Maulin P Shah,2020-10-14 The abundance of organic pollutants found in wastewater affect urban surface waters Traditional wastewater management technologies focus on the removal of suspended solids nutrients and bacteria however new pollutants such as synthetic or naturally occurring chemicals are often not monitored in the environment despite having the potential to enter the environment and cause adverse ecological and human health effects Collectively referred to as emerging contaminants they are mostly derived from domestic activities and occur in trace concentrations ranging from pico to micrograms per liter Environmental contaminants are resistant to conventional wastewater treatment processes and most of them remain unaffected causing contamination of receiving water This in turn leads to the need for advanced wastewater treatment processes capable of removing environmental contaminants to ensure safe fresh water sources This book provides an up to date overview of the current bioremediation strategies including their limitations challenges and their potential application to remove environmental pollutants It also introduces the latest trends and advances in environmental bioremediation and presents the state of the art in biological and chemical wastewater treatment processes As such it will appeal to researchers and policy makers as well as undergraduate and graduate environmental sciences students

**Recent Concepts in Minimal Access Surgery** Deborshi Sharma,Priya Hazrah,2022-03-25 The book covers the recent

developments in various aspects of minimal access surgery laparoscopic and robotic surgery which is fairly a new branch of

surgery that has advanced tremendously in last few years This is the first volume of the set of books on recent concepts in minimal access surgery It provides step by step descriptions accompanied by numerous helpful photographs and anatomical drawings It also includes the controversies and gives a cumulative opinion on the recent changes developing in minimal access surgery MAS It includes system wise topics and separate chapters on the different topics within the system with the meta analysis of recent topic or their controversies The book is useful for practitioners and young faculties as well as residents trainees and fellows of surgery and minimal access surgery

Low Power Designs in Nanodevices and Circuits for Emerging Applications Shilpi Birla, Shashi Kant Dargar, Neha Singh, P. Sivakumar, 2023-11-14 This reference textbook discusses low power designs for emerging applications This book focuses on the research challenges associated with theory design and applications towards emerging Microelectronics and VLSI device design and developments about low power consumptions The advancements in large scale integration technologies are principally responsible for the growth of the electronics industry This book is focused on senior undergraduates graduate students and professionals in the field of electrical and electronics engineering nanotechnology This book Discusses various low power techniques and applications for designing efficient circuits Covers advance nanodevices such as FinFETs TFETs CNTFETs Covers various emerging areas like Quantum Dot Cellular Automata Circuits and FPGAs and sensors Discusses applications like memory design for low power applications using nanodevices The number of options for ICs in control applications telecommunications high performance computing and consumer electronics continues to grow with the emergence of VLSI designs Nanodevices have revolutionized the electronics market and human life it has impacted individual life to make it more convenient They are ruling every sector such as electronics energy biomedicine food environment and communication This book discusses various

emerging low power applications using CMOS and other emerging nanodevices      **Assessing COVID-19 and Other Pandemics and Epidemics using Computational Modelling and Data Analysis** Subhendu Kumar Pani, Sujata Dash, Wellington P. dos Santos, Syed Ahmad Chan Bukhari, Francesco Flammini, 2021-12-13 This book comprehensively covers the topic of COVID 19 and other pandemics and epidemics data analytics using computational modelling Biomedical and Health Informatics is an emerging field of research at the intersection of information science computer science and health care The new era of pandemics and epidemics bring tremendous opportunities and challenges due to the plentiful and easily available medical data allowing for further analysis The aim of pandemics and epidemics research is to ensure high quality efficient healthcare better treatment and quality of life by efficiently analyzing the abundant medical and healthcare data including patient s data electronic health records EHRs and lifestyle In the past it was a common requirement to have domain experts for developing models for biomedical or healthcare However recent advances in representation learning algorithms allow us to automatically learn the pattern and representation of the given data for the development of such models Medical Image Mining a novel research area due to its large amount of medical images are increasingly generated and stored digitally These images are mainly in the form of computed tomography CT X ray nuclear medicine imaging PET SPECT magnetic resonance imaging MRI and ultrasound Patients biomedical images can be digitized using data mining techniques and may help in answering several important and critical questions related to health care Image mining in medicine can help to uncover new relationships between data and reveal new and useful information that can be helpful for scientists and biomedical practitioners Assessing COVID 19 and Other Pandemics and Epidemics using Computational Modelling and Data Analysis will play a vital role in improving human life in response to pandemics and epidemics The state of the art approaches for data mining based medical and health related applications will be of great value to researchers and practitioners working in biomedical health informatics and artificial intelligence      **Cumulated Index Medicus** ,1980

Biodegradable Polymers and Their Emerging Applications Sampa Saha, Chandrani Sarkar, 2023-08-07 Bio degradable polymers are rapidly emerging as a sustainable alternative to traditional petroleum based plastics and polymers However the synthesis and processing of such polymers present unique challenges and opportunities In this comprehensive volume Dr Saha and her team provide an in depth exploration of the synthesis and processing of bio degradable polymers and their emerging applications in various sectors from drug delivery to food packaging Covering a wide range of topics including synthesis modification processing techniques and few of their advanced applications in emerging areas this book provides a comprehensive overview of the field The authors also delve into cutting edge research on the synthesis properties and applications of bio degradable polymers in various fields such as agricultural food preservation biomedical arena energy storage and other advanced application areas This volume is an essential resource for scientists engineers and policymakers interested in the future of sustainable materials Whether you are a researcher looking to expand your knowledge of

biodegradable polymer synthesis and processing or a policymaker interested in the potential of biodegradable polymers to reduce our reliance on fossil fuels this book is an invaluable guide to the field

**Interdisciplinary Approaches to AI, Internet of Everything, and Machine Learning** Pandey, Digvijay, Muniandi, Balakumar, Pandey, Binay Kumar, George, A. Shaji, 2024-12-13 Artificial intelligence AI the Internet of Everything IoE and Machine Learning ML are transforming modern society by driving innovation and improving efficiency across diverse fields These technologies enable seamless connectivity intelligent decision making and data driven solutions that address complex global challenges From revolutionizing industries like healthcare education and transportation to enhancing communication and resource management their applications are vast and impactful Interdisciplinary approaches are critical for unlocking their full potential fostering collaboration across sectors to develop sustainable ethical and inclusive solutions As these technologies continue to shape the future they hold the promise of advancing societal progress while addressing pressing issues Interdisciplinary Approaches to AI Internet of Everything and Machine Learning explores interdisciplinary approaches to harnessing AI IoT and ML to address complex challenges and drive innovation across various fields It emphasizes collaborative strategies to develop sustainable ethical and impactful technological solutions for a rapidly evolving world Covering topics such as artificial neural networks management information systems and supply chain management this book is an excellent resource for researchers technologists industry professionals educators policymakers and more
