Alcoholism In Perspective:

Alcoholism in Perspective Marcus Grant, Paul Gwinner, 2023-12-01 In the 1970s an important change of emphasis had occurred in the field of alcoholism. Instead of seeing alcoholism as an all or none phenomenon it was now recognised that a continuum of alcohol problems existed so that individual cases could show different degrees of dependence and different degrees of harm. Originally published in 1979, this book examines the implications of this change of emphasis. It looks at definitional, aetiological, epidemiological and socio-cultural questions and contains contributions from acknowledged experts in all of these areas. The scientific evidence in each area is fully reviewed and made comprehensible to the non-specialist reader and similarities between trends in thinking in different fields are emphasised. In addition, the book analyses the implications of the modern view of alcohol problems in terms of their theoretical basis and their practical application. A rational and pragmatic approach to the problems of working with alcoholics is analysed in some detail so that the links between new ideas and their manifestation in clinical practice are made clear. At the time, this book represented a multi-disciplinary approach to a complex problem where previous thinking had been clouded by too ready acceptance of untested hypotheses. *Perspectives on Alcohol Abuse*, 1988

Alcoholism: A Molecular Perspective T. Norman Palmer, 2012-12-06 This book contains selected proceedings from the NATO Advanced Study Institute AS I The Molecular Pathology of Alcoholism held at the Hotel Il Ciocco in Tuscany during 26th August to 6th September 1990. Alcoholism remains one of the most challenging problems in medical care with far-reaching medical, social and economic consequences. For example, in the U.S. estimates indicate that 18 million people have a serious drinking problem and that the total cost to the economy of alcohol abuse is 117 billion. Treatment of alcohol dependence and other alcohol-related disorders accounts for almost 15% of the total health bill of the United States. Despite the scale of the medical problem, biomedical research on alcoholism remains something of a Cinderella science. Research funding from government and other bodies is relatively poor and the number of medical scientists working in the field remains small. The Organizing Committee for this NATO ASI, comprising Charles Lieber (New York), Timothy Peters (London), Mario Dianzani (Torino), Emanuele Albano (Torino) and Norman Palmer (Perth), were therefore particularly grateful to the NATO Scientific Affairs Division for their active support of this ASI, the first dealing with a topic related to alcohol abuse. We moreover hope that this support will continue. The theme of the ASI was an in-depth discussion of the molecular events initiated by alcohol abuse that culminate in onset of alcohol-related disease. *Alcoholism in perspective*, 1979

Trends in Alcohol Abuse and Alcoholism Research Rin Yoshida, 2007 Alcoholism is a disorder characterised by the excessive consumption of and dependence on alcoholic beverages leading to physical and psychological harm and impaired social and vocational functioning. This book gathers new and important research on this socially and medically destructive disorder. These include addiction issues, forms of treatment, behavioural and clinical studies. **Becoming Alcoholic** David R. Rudy, 1986 Affiliation with Alcoholics Anonymous

The Palgrave Handbook of Psychological Perspectives on Alcohol Consumption Richard Cooke, Dominic Conroy, Emma Louise Davies, Martin S.

Hagger, Richard O. de Visser, 2021-05-10 This Handbook provides a broad and comprehensive overview of psychological research on alcohol consumption. It explores the psychological theories underpinning alcohol use and misuse, discusses the interventions that can be designed around these theories, and offers key insight into future developments within the field. A range of international experts assess the unique factors that contribute to alcohol-related behaviour as differentiated from other health-related behaviours. They cover the theory and context of alcohol consumption, including possible implications of personality type, motivation, and self-regulation, and cultural and demographic factors. After reviewing the evidence for psychological theories and predictors, the book goes on to focus on external influences on consumption and interventions for reducing alcohol consumption, including those based on purchasing and consumption behaviour, technologies such as personalised feedback apps, and social and media phenomena such as Dry January and Hello Sunday Morning. It brings together cutting-edge contemporary research on alcohol consumption in childhood and adolescence, including topics such as managing offers or drinks pre-drinking, online identities, how children develop their beliefs about alcohol, and how adolescents discuss alcohol with their parents. The book also offers a rounded presentation of the tensions involved in debates around the psychological impacts of alcohol use, discussing its role in helping people to socialise and unwind, as well as recognising the possible negative impacts on health, education, and relationships. This book will be of interest to academics, policymakers, public health officials, practitioners, charities, and other stakeholders interested in understanding how alcohol affects people psychologically. This book will also be a key resource for students and researchers from across the social sciences.

Recent Developments in Alcoholism Marc Galanter, 2013-11-22 Each topic is covered in sufficient depth, currency, and clarity to be of value to the neophyte and the seasoned researcher. Clinician American Journal of Psychiatry from a review of a previous volume. The current volume addresses a range of issues across this diverse field, including the effects on society, physiology and biochemistry, clinical pathology, and trends in treatment.

Alcoholism and Clinical Psychiatry Joel Solomon, 2012-12-06 It is well known that alcoholism continues to be one of this country's major public health problems. This issue is carefully documented by Dr Gerald Klerman, Chief of ADAMHA, in the second chapter of this volume. In spite of the major role that alcohol plays in the health care issues of internal medicine, neurology, and psychiatry, the subject continues to fall between the cracks of the various disciplines. For this reason, it has become almost a discipline of its own, yet there are no academic departments of alcoholism because academic departments are unidisciplinary, and alcoholism is clearly a multidisciplinary field within medicine. In spite of the many disciplines involved in the study and treatment of alcoholism, psychiatry continues to have a special, albeit often neglected, relationship to alcoholism, and it is the articulation of that relationship which prompted the Department of Psychiatry at the Downstate Medical Center to organize the conference upon which many chapters in this volume are based. Particular emphasis in selecting the topics to be covered was placed on the interface between alcoholism and clinical psychiatry, including affective

disorders schizophrenia suicide adolescence the special problems of women and psychotherapy to mention only some of them

Gerstein, Steve Olson, 1985-02-01 Alcohol is a killer 1 of every 13 deaths in the United States is alcohol related In addition 5 percent of the population consumes 50 percent of the alcohol The authors take a close look at the problem in a classy little study as The Washington Post called this book The Library Journal states This is one book that addresses solutions And it s enjoyably readable This is an excellent review for anyone in the alcoholism prevention business and good background reading for the interested layperson The Washington Post agrees the book likely will wind up on the bookshelves of counselors politicians judges medical professionals and law enforcement officials throughout the country *Alcoholism and Women* Marc Galanter, 2006-04-11 Solid plausible accurate and loaded with pertinent and highly referenced information regarding clinical and basic research in alcoholism among women and ethnic groups an essential text in the libraries of academicians teachers clinicians researchers and policy makers The quality and scope of the work are groundbreaking and it is convenient to have it all in one source American Journal of Psychiatry Volume 12 highlights the remarkable evolution of alcoholism research during the last few years focusing on gender in alcohol actions and consequences Correctional Counseling and Rehabilitation Patricia Van Voorhis, Michael C. Braswell, David Lester, 2010-04-06 This text presents foundations of correctional intervention including overviews of the major systems of therapeutic intervention diagnosis of mental illness and correctional assessment and classification Its detailed descriptions and cross approach comparisons can help professionals better determine which of several techniques might be especially useful in their particular setting Includes key concepts and terms as well as discussion questions

Substance Use in a Comparative Perspective Arnošt Veselý , Dagmar Dzúrová, 2013-10-01 The book follows two main objectives First it aims at putting together different pieces of evidence on developments of substance use and risk behavior in five post communist countries over time Thus first objective is to build a complex and reliable empirical evidence base for empirical comparison and identify evidence gaps Second we try to analyze and interpret such developments using both

quantitative and qualitative analysis and to relate them to the formulated theoretical framework Since available empirical evidence is often far from conclusive the findings presented are sometimes rather exploratory and should be tested by further and more detailed research The book is structured as follows At the beginning we review various factors that have been found to be associated with substance use We try to present them in a complex and systematic way and create a conceptual framework for understanding and explaining substance use in a comparative way Next chapter describes the developments of substance use over time in five countries analyzed This description is based upon publicly available WHO data along with supplementary comments and interpretations by national experts Next chapter is devoted to country profiles of all five countries involved in the project and in depth overviews of developments in their respective substance use situations All reviews are written according to the same structure thus facilitating comparison The last chapter presents a multilevel analysis of substance use in the Czech Republic combining data for individuals and regions
