Recent Developments in Alcoholism Marc Galanter,2013-11-11

From the President of the Research Society on Alcoholism The field of alcohol research has been slowly but continuously evolving taking into its domain an ever increasing array of scientific disciplines This series is designed to fill the need for a review publication that covers the broad range of research into alcohol actions and alcoholism Research in alcohol concerns social epidemiological and legal concerns in addition to biomedical and behavioral topics to greater degree than research with many other drugs A publication devoted to alcohol research should serve the broadest existing research community but perhaps more important it should also provide a means to recruit new investigators with fresh approaches to the field We can and must demonstrate that legitimate high quality research is being done but we must also highlight the opportunity for new workers to make a real impact on the problem The Research Society on Alcoholism seeks to provide such a service not only through this publication but also through other activities Richard A Deitrich Ph D

Drug and Alcohol Abuse Marc A. Schuckit,2012-12-06 When this series was

conceived a book on substance abuse including alcohol and alcoholism was to be of the highest priority This priority was a reflection of my view that the subject is often inadequately or insufficiently taught in many training programs Few clinicians have had comprehensive didactic education in this area despite the frequency with which these problems are encountered in practice All too often these encounters are in situations in which accurate diagnosis and rapid treatment are of critical importance We wanted a book that would be concise and easily readable but also comprehensive in its presentation of the basic principles underlying clinical manifestations diagnosis and management It was of particular importance that the book also serve as an easy reference guide in emergency situations Marc Schuckit a man with impeccable credentials as a scholar and an experienced clinician in this field produced just such a book with his critically acclaimed first edition That volume rapidly became a resource of great significance for psychiatrists psychotherapists and physicians in general It has been adopted as a text in medical schools and residency training as well as for courses in psychology emergency medicine social work and nursing The entire volume has been revised and updated to reflect changes in knowledge and clinical practice since the publication of the first edition and in order to keep the comprehensive references current There is a new chapter on phencyclidine and another on caffeine and nicotine
