Alcoholism Progress In Research And Treatment:

Alcoholism : progress in research and treatment Peter G. Bourne,1973 **Research Advances in Alcohol and Drug Problems** Reginald Smart,2013-11-22 This book continues the series of reviews of research advances first published in 1974 The editors aim here is to present critical and integrative reviews by internationally recognized scholars of areas in which there has been much recent research In this task we have been greatly helped by the staff of Plenum Press and the Advisory Panel listed at the front of this volume Several members of the Panel have retired Dr W M D Paton Dr K Bruun Dr K F Killam and Dr J R Seeley Dr Klaus Makela has accepted our invitation to join the Panel Unfortunately one member of the Panel Professor William McGlothlin died as a result of a tragic accident He was a gifted and sensitive researcher His work over many years was well known to those studying alcohol and drug problems We want to acknowledge his contributions to the Research Advances Series and to the field in general The editors wish to acknowledge the help of Julliana Newell Ayoub in preparation of this volume This volume contains three papers by H Fingarette R Room and B Kissin on The Disease Concept They were originally prepared for an earlier volume but could not be included because of scheduling problems The editors and not the authors are responsible for this delay Because they are primarily philosophical and theoretical in nature they are not diminished in value by the lesser number of references to recent research *Research Advances in Alcohol and Drug Problems* Yedy Israel,Frederick B. Glaser,Harold Kalant,Robert E. Popham,Wolfgang Schmidt,Reginald G. Smart,2013-11-11 Over the last decade the world has experienced a growing interest in problems associated with the nonmedical use of drugs This interest has corresponded to a real growth in the extent diversity and social impact of the use of alcohol and drugs in many societies As a result the amount of research and writing on the subject of drug problems has greatly increased and it has become very difficult for one individual to keep up with all the relevant literature There is thus an acute need in the field for critical reviews that assess current developments and the present series is intended to fill this need The series is not to be an annual review in the usual sense The aim is not to cover all the work reported during the preceding year in relation to a fixed selection of topics Rather it is to present each year evaluative papers on topics in which enough recent progress has been made to alter the general scope in a particular area Owing to the multidisciplinary nature of problems of drug use and dependence the papers published in each volume will be drawn from several disciplines However some volumes may be devoted to one particular problem with individual reviews and papers examining various aspects of it The composition of the editorial board and the international advisory board reflects these objectives The editors are members of the senior scientific staff of the Addiction Research Foundation of Ontario *Recent Developments in Alcoholism* Marc Galanter,1989-01-31 From the President of the Research Society on Alcoholism In the last decade research concerning the causes and consequences of alcohol abuse and alcoholism has come of age We have witnessed a plethora of scientific findings that have shed light on some of the actions of alcohol at the molecular level Interesting new data have been forthcoming on the

complexities of the development of tolerance to alcohol It is becoming increasingly appropriate to consider that tolerance to alcohol involves biological as well as psychological factors New scientific insights have been gained concerning the treatment of withdrawal as well as the presence of persistent withdrawal signs that may possibly be involved with relapse More recently new and compelling data indicating that alcoholism is a common familial disorder have appeared Clinical studies indicate that alcoholism is a heterogeneous disorder with multifactorial clinical symptomatology and genetic heterogeneity The heterogeneity of the clinical features and the heritability of the predisposing factors of alcoholism are currently under vigorous scientific investigation In the past several years sophisticated psychosocial studies have provided fundamental information on subjects at high risk for alcoholism Psychosocial and biological studies of families including alcoholics and subjects at high risk are likely to bring new insights to our understanding of etiological factors Moreover as a result of these studies we stand to develop better prevention initiatives and treatment approaches

Alcoholism and Other Drug Problems James E. Royce, 1996

Understanding and Treating Alcoholism Jill Littrell, 2014-01-02 There seems to be an abundance of factual information regarding alcoholism what causes it who is most susceptible how it affects its victims and how it should be treated However a definitive source of data supporting or refuting the numerous and diverse positions was never available Thus the goal of the author is to provide professionals with a solid understanding as to which factual statements about alcoholism are actually supported with evidence and some of the empirically validated ways to proceed with treatment Major methods of treatment are reviewed and empirically based approaches are compared and contrasted with one another Different and sometimes new focal points are explored such as the disease concept of alcoholism family members of alcoholics personality characteristics and effects of alcoholism exclusive to women Also notable is the nearly unprecedented look into the impact of alcohol on all types of mood and behavior rather than just on aggression a topic long since exhausted A comprehensive review of literature complemented with critiques of research this two volume set is a thorough informative source of reference for anyone who seeks to further their knowledge of this often misunderstood yet unfortunately all too common phenomenon

Research on Alcoholism Treatment Marc Galanter, 2006-04-11 From the President of the Research Society on Alcoholism The sixteenth volume of Recent Developments in Alcoholism contains the latest information on the field of alcoholism treatment research This scholarly volume includes comprehensive reviews of the methodologies available to evaluate treatment outcome state of the art psychosocial interventions and recent advances in pharmacological adjuncts to treatment that are currently available and those on the brink of application Other sections of the book address special issues in the treatment of alcohol dependence including the treatment of the adolescents and other unique populations the management of tobacco dependence and the role of spirituality in recovery among others The clinician will find these reviews an important resource for learning about evidence based treatments for alcoholism and the researcher will find the synthesis of recent developments informative and forward looking The research agenda for the future

rests soundly on the progress to date and additional advances in the treatment of alcoholism can be predicted in the near future Stephanie O Malley Ph D President Research Society on Alcoholism xi Preface From the President of the American Society of Addiction Medicine This excellent volume presents investigations covering a wide spectrum of scientific issues It is also evident that many of these articles have clinical significance ranging from assessments of disorder monitoring clinical progress and behavioral and pharmacological interventions

Research Advances in Alcohol and Drug Problems Reginald G. Smart, Howard D. Cappell, Frederick B Glaser, Yedy Israel, Harold Kalant, Robert E. Popham, Wolfgang Schmidt, Edward M. Sellers, 2013-03-13 This volume is the eighth in the Research Advances Series and the fifth published by Plenum Press The purpose of the series is to review new work in rapidly changing fields We do not expect reviews to cover the whole field of work on alcoholism and addiction Nor do we expect that they will be like annual reviews covering all work in a delimited field Our reviews are designed to explore only the most exciting parts of the total field and to focus on conclusions that can be made about them The series publishes one volume each year Volume 8 is an omnibus rather than a theme volume in that a wide range of topics is covered including research on alcohol opiates and tobacco As usual the greater emphasis is on alcohol research reflecting the importance of the problem and the volume of work to be reviewed With Volume 8 come some changes in the Editorial Board It will be the last volume in the series for Robert E Popham who has resigned from the Board He has been with the series since its inception and has contributed a great deal to its development The members of the Board are grateful for his help We are adding two new members Dr Howard Cappell whose field is experimental psychology and Dr Edward M Sellers in clinical medicine and pharmacology

Alcohol and Drug Problems in Women Oriana Josseau Kalant, 2013-11-11 Over the last decade the world has experienced a growing interest in problems associated with the nonmedical use of drugs This interest has corresponded to a real growth in the extent diversity and social impact of the use of alcohol and drugs in many societies As a result the amount of research and writing on the subject of drug problems has greatly increased and it has become very difficult for one individual to keep up with all the relevant literature There is thus an acute need in the field for critical reviews that assess current developments and the present series is intended to fill this need The series is not to be an annual review in the usual sense The aim is not to cover all the work reported during the preceding year in relation to a fixed selection of topics Rather it is to present each year evaluative papers on topics in which enough recent progress has been made to alter the general scope in a particular area Owing to the multidisciplinary nature of problems of drug use and dependence the papers published in each volume will be drawn from several disciplines However some volumes may be devoted to one particular problem with individual reviews and papers examining various aspects of it The composition of the editorial board and the international advisory board reflects these objectives The editors are members of the senior scientific staff of the Addiction Research Foundation of Ontario

Research Advances in Alcohol and Drug Problems H.M. Annis, H.D. Cappell, F.B. Glaser, M.S. Goodstadt, L.T. Kozlowski, 2013-11-11 This is the tenth volume

in the Research Advances series and the seventh published by Plenum Press Volume 10 is another omnibus volume providing specialized and advanced reviews in a number of areas related to the use of alcohol illicit drugs and tobacco We include also a brief history of the Center for Alcohol Studies that gives Mark Keller s unique perspective on this noted institution Two of the chapters are decidedly longer than the others very long chapters have appeared occasionally in the past and we think that it is one of the strengths of the series that we are able to accommodate such reviews Again the editorial board has changed After several years of service Reginald G Smart has stepped down New to the board are Helen M Annis Michael S Goodstadt Lynn T Kozlowski and Evelyn R Vingilis This is likely to be the sole volume for which Goodstadt is on the board since before completion of this volume he moved from the Addiction Research Foundation to the Center for Alcohol Studies Rutgers University Research Advances in Alcohol & Drug Problems ,1983 **Recent Advances in Studies of Alcoholism** Nancy K. Mello,Jack Harold Mendelson,1971 Recent Advances in Studies of Alcoholism National Institute of Mental Health (U.S.),1971 *Drug and Alcohol Abuse* M. A. Shuckit,2013-03-09 When this series was conceived a book on substance abuse including alcohol and alcoholism was to be of highest priority This priority was a reflection of my view that the subject is often taught inadequately or insufficiently in many training programs Yet these problems are com monly encountered in clinical practice and all too often in situations where accurate diagnosis and rapid treatment are of critical importance We wanted a book that would be concise and easily readable but also comprehensive in its presentation of the basic principles underlying clinical manifestations diagnosis and management It was of particular importance that the book also serve as an easy reference guide in emergency situations Marc Schuckit a man with impeccable credentials as a scholar and an experienced clinician in this field has produced just such a book Few psychiatrists psychotherapists or physicians will want to be without it The presentation is comprehensive and in depth yet so clear and well organized that it will also likely be of interest to medical students nurses and emergency personnel *Group Psychotherapy with Addicted Populations* Philip J. Flores,Jeffrey Roth,Barney Straus,2023-06-09 This newly updated and streamlined edition of *Group Psychotherapy with Addicted Populations* provides proven strategies for combating alcohol and drug addiction through group psychotherapy The interventions discussed in the book build on a foundation of addiction as an attachment disorder rooted in the understanding of addiction as a family disease An appreciation of group and organizational dynamics is used to address the complex experience of developmental trauma that underlies addiction Having identified the essential theoretical underpinnings of supporting recovery from addiction in Part One the second half of the book gives a thorough nuts and bolts description of constructing a psychotherapy group and engaging productively in the successive phases of its development from initiation of treatment to termination The book concludes with specific recommendations for group psychotherapists to increase their competence with groups deepen their appreciation of group and organizational dynamics and develop a community of support for their own well being These methods are important for psychotherapists working with addicted populations who

are inexperienced with group psychotherapy as well as seasoned group psychotherapists wishing to enhance their work
