 Nathaniel Coleman, 2007-05-07 Utopian thought though commonly characterized as projecting a future without a past depends on golden models for re invention of what is Through a detailed and innovative re assessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers Coleman offers the reader a unique perspective of idealism in architectural design With unparalleled depth and focus of vision on the work of Le Corbusier Louis I Kahn and Aldo van Eyck this book persuasively challenges predominant assumptions in current architectural discourse forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hyper modern stance and orthodox modernist architecture *Aldo Van Eyck* Francis Strauven, 1998 This is a monograph on the Dutch architect van Eyck who regarded the concept of relativity as the foundation of 20th century culture It includes an examination of his ideas his role in the Cobra movement Team 10 and De 8 en Opbouw and a close look at his projects and **Metaphorical Practices in Architecture** Sarah Borree, Stephanie Knuth, Moritz Röger, 2023-06-23 Metaphors are diversly and intricately embedded in architectural practice and discourse Precisely for this reason this volume argues and sets out to explore how they can be engaged to critically interrogate architecture s social cultural and political dimensions past and present and to productively challenge and intervene with established perspectives debates and practices Mapping out not just potentials but also addressing the challenges limitations and dangers inherent in using metaphors in architectural research and practice the volume prominently illustrates the ambiguity and contradictoriness inherent in both metaphors and the process of engaging and exploiting them Covering a broad range of historical and geographical cases and concerns the contributions illustrate effectively that metaphors can expand or narrow our engagement with architecture and consolidate or legitimise but also destabilise and challenge established social cultural disciplinary and political structures concepts and categories With its aim to explore metaphors as both subject and method to critically challenge and expand established practices perspectives and standards in architectural research and practice the volume will be of interest for scholars working across the architectural humanities including architectural history theory culture design and urbanism as well as for researchers concerned with architecture and the city from fields such as cultural visual and area studies as well as art history **Compositions in Architecture** Don Hanlon, 2009-03-23 Architecture Use the patterns of architectural composition to inspire creative design In *Compositions in Architecture* Don Hanlon offers students an excitingly original path to discovering architectural composition one that avoids the traditional either/or choice between theory and practice By exploring the underlying patterns of organization in architecture this book enables the reader to connect architectural theory with the design process And by relating what happens in the design studio with how the architect thinks about architectural composition the approach spurs creative thinking With examples that range across diverse cultures and historical periods from the famous to the obscure the author
